ISSN: 1432-2072 (electronic version)
Journal no. 213
Springer

General Guidelines
Legal Requirements
The author(s) guarantee(s) that the manuscript will not be published elsewhere in any language without the consent of the copyright owners, that the rights of third parties will not be violated, and that the publisher will not be held legally responsible should there be any claims for compensation. For more details, please visit the journal’s website and refer to the section on “Copyright Information” under “For Authors and Editors.”

Authorship
Psychopharmacology adheres to the following principles, as set out by The Society for Neuroscience in its guidelines on "Responsible Conduct Regarding Scientific Communication" (http://www.sfn.org/index.cfm?pagename=responsibleConduct): "Authorship should be based on a substantial intellectual contribution. . . . Authorship must be reserved for individuals who have met each of the following conditions: (a) made a significant contribution to the conception and design or the analysis and interpretation of data, (b) participated in drafting the article or reviewing and/or revising it for intellectual content, and (c) approved the final version of the manuscript. (Deceased persons deemed appropriate as authors should be so included with a footnote reporting their death.)"
Permissions
Authors wishing to include figures or text passages that have already been published elsewhere are required to obtain permission from the copyright owner(s) and to include evidence that such permission has been granted when submitting their papers. Any material received without such evidence will be assumed to originate from the authors. Once your paper has been accepted for publication, you will receive per e-mail a link to the "Copyright Transfer Statement," which must be signed and submitted before your paper can be published.

Ethical Standards
Manuscripts submitted for publication must contain a statement to the effect that all human studies have been approved by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in the 1964 Declaration of Helsinki. It should also be stated clearly in the text that all persons gave their informed consent prior to their inclusion in the study. Details that might disclose the identity of the subjects under study should be omitted.
Reports of animal experiments must state that the “Principles of laboratory animal care” were followed, as well as specific national laws (e.g., the current version of the German Law on the Protection of Animals) where applicable. Authors should refer to the “Guidelines for the Care and Use of Mammals in Neuroscience and Behavioral Research” (National Research Council 2003). (See also http://www.nap.edu/readingroom/books/labrats/.) Please include at the end of the acknowledgements a declaration that the experiments comply with the current laws of the country in which they were performed.

The editors reserve the right to reject manuscripts that do not comply with the above-mentioned requirements. The author will be held responsible for false statements or failure to fulfill the above-mentioned requirements.

Conflict of Interest
Authors must indicate whether or not they have a financial relationship with the Organization that sponsored the research. This information should be included on the title page of any manuscript submitted (see “Title Page” in the section on “Manuscript Structure” below) and also noted in the author’s cover letter.
If the study is supported by or any income is received from a commercial sponsor, the authors must document the input of the sponsoring company in the study design, collection, analysis, and interpretation of data and writing the reports. Specifically, authors should state if the company was involved in original concepts and systematic review of existing trial evidence, the design, the choice of investigators, the control of allocation schedule, the conduct of the trial,
the collection and monitoring of data, the analysis and interpretation, and the writing and approval of the report. Authors should state that they have full control of all primary data and that they agree to allow the journal to review their data if requested. Authors should also declare any other circumstances that could be perceived as a potential conflict of interest. The manuscript must be accompanied by the “Conflict of Interest Disclosure Form.” This form can be obtained from www.springer.com/journal/00213.

Open Choice Publication
In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer now provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular ‘subscription-based’ article, but in addition is made available publicly through Springer’s online platform SpringerLink. We regret that Springer Open Choice cannot be ordered for published articles. For more details, please visit the journal’s website and refer to the section on “Open Choice” under “For Authors and Editors” (http://springer.com/openchoice).

Editorial Procedure
Manuscripts should be prepared carefully in accordance with the following points.

1. Manuscripts should be submitted online using the link on the journal’s homepage or directly via http://mc.manuscriptcentral.com/psychopharmacology and following the on-screen instructions. The email address and fax number of the corresponding author should be provided.
2. Please identify the appropriate Principal Editor for your submission. Manuscripts which fall under more than one category or about which the author has some doubt should identify the Coordinating Editors for America (Miczek) or the rest of the world (Robbins), who will take appropriate action.

For North and South America:
Clinical psychopharmacology
Lawrence H. Price, MD
Professor of Psychiatry and Human Behavior
Brown Medical School
Clinical Director and Director of Research
Butler Hospital, 345 Blackstone Blvd.
Molecular neuropsychopharmacology
A. Leslie Morrow, PhD
Departments of Psychiatry and Pharmacology
University of North Carolina School of Medicine
3027 Thurston-Bowles Building | CB 7178
Chapel Hill, NC 27599-7178, USA
e-mail: morrow@med.unc.edu
Fax: +1-919-966-9099

Behavioral pharmacology in laboratory animals
Klaus A. Miczek, PhD
Bacon Hall, Tufts University
530 Boston Avenue
Medford, MA 02155, USA
e-mail: klaus.miczek@tufts.edu
Fax: +1-617-627-3939

Preclinical psychopharmacology
Irwin Lucki, PhD
University of Pennsylvania
Department of Psychiatry
125 South 31st St, Rm 2204
Philadelphia PA 19104-3403, USA
e-mail: lucki@mail.med.upenn.edu

Human experimental psychopharmacology
Harriet de Wit, PhD
Department of Psychiatry and Behavioral Neuroscience
University of Chicago MC3077
5841 S. Maryland Avenue
Chicago, IL 60637, USA
e-mail: hdew@uchicago.edu
Fax: +1-773-834-7698

For the rest of the world:
Clinical psychopharmacology
Phil J. Cowen, MD
Psychopharmacology Research Unit
Warneford Hospital
Headington, Oxford OX3 7JX, UK
e-mail: phil.cowen@psychiatry.oxford.ac.uk
Fax: +44-1865-251076

Molecular neuropsychopharmacology
Daniel Hoyer, PhD
Psychiatry/Neuroscience Research
Novartis Institutes for Biomedical Research, WSJ-386/745
4002 Basel, Switzerland
e-mail: daniel.hoyer@novartis.com
Fax: +41-61-324-4866

Behavioral pharmacology in laboratory animals
Trevor W. Robbins, PhD
Dept. of Experimental Psychology
University of Cambridge
Downing Street, Cambridge CB2 3EB, UK
e-mail: twr2@hermes.cam.ac.uk
Fax: +44-1223-333564

Preclinical psychopharmacology
Thomas Steckler, MD
Division of Psychiatry
Johnson & Johnson Pharmaceutical Research and Development
Turnhoutseweg 30
2340 Beerse, Belgium
e-mail: tsteckle@its.jnj.com

Human experimental psychopharmacology
H. Valerie Curran, PhD
Clinical Psychopharmacology Unit
Clinical Health Psychology, University College London
Gower Street, London WC1E 6BT, UK
e-mail: v.curran@ucl.ac.uk
Fax: +44-207-916-1989
Types of Papers

The following types of articles may be submitted for publication in the journal:

- Review Articles should not exceed 25 pages of text (excluding title page, abstract, references, tables, and figures).
- Original Investigations should not exceed 15 pages of text (excluding title page, abstract, references, tables, and figures). It should be noted that *Psychopharmacology* does not impose a minimum length on original investigations.
- Letters to the Editor and Commentaries are generally in the form of technical comments or points of controversy and should not exceed 3 pages of text.

Manuscript Structure

Title page
The title page should include:

- The name(s) of the author(s)
- A concise and informative title (avoid assertive sentences)
- The affiliation(s) and address(es) of the author(s)
- The e-mail address, telephone, and fax numbers of the communicating author
- Acknowledgments of funding and grants and of any conflict of interest or of any circumstances that could be perceived as a potential conflict of interest

Abstract
Each paper should be preceded by a structured Abstract in English of not more than 250 words. Abstracts should contain the following subheadings (in italic type), in the following order: Rationale, Objectives, Methods (if applicable), Results, Conclusions.

Keywords
Up to 10 keywords should be supplied after the Abstract for indexing purposes.

Abbreviations
Abbreviations should be defined at first mention in the abstract and again in the main body of the text and used consistently thereafter. Abbreviations and metric units should conform to the International System of Units (SI).

Text
Manuscripts should be submitted in Word.

- Use a normal, plain font (e.g., 12-pt Times Roman) for text.
- Use italics for emphasis.
- Use the automatic page numbering function to number the pages.
- Do not use field functions.
- Use tab stops or other commands for indents, not the space bar.
- Use the table function, not spreadsheets, to make tables.
- Use the equation editor of your word processing program or MathType for equations.
- Note: If you use Word 2007, do not create the equations with the default equation editor but use the Microsoft equation editor or MathType instead.
- Save your file as RTF (Rich Text Format) or Microsoft Word compatible formats. Do not submit docx files.
- Please use no more than three levels of displayed headings.
- Footnotes can be used to give additional information, which may include the citation of a reference included in the reference list. They should not consist solely of a reference citation, and they should never include the bibliographic details of a reference. They should also not contain any figures or tables. Footnotes to the text are numbered consecutively. Footnotes to the title or the authors of the article are not given reference symbols. Always use footnotes instead of endnotes.
- A template is available at http://www.springer.com/authors/journal+authors

References
-Citation
Cite references in the text by name and year in parentheses. Several publications by the same author or group of authors should be listed in chronological order; those that appeared in the same year should be distinguished by a, b, c, etc. Where there are two authors, both should be named, but with three or more only the first author’s name plus “et al.” should be given. Some examples:

Negotiation research spans many disciplines (Thompson 1990).
This result was later contradicted (Becker and Seligman 1996).
Mann (1966) reported that...
This effect has been widely studied (Abbott 1991; Barakat et al. 1995; Kelso and Smith 1998; Medvec et al. 1993).

-Reference List
The list of references should only include works that are cited in the text and that have been published or accepted for publication. Personal communications and unpublished works should only be mentioned in the text. Do not use footnotes or endnotes as a substitute for a reference list.
Reference list entries should be alphabetized by the last names of the first author of each work.
Journal article

Ideally, the names of all authors should be provided, but the usage of “et al” in long author lists will also be accepted:

Article by DOI

Book

Book chapter

Online document

Dissertation
Trent JW (1975) Experimental acute renal failure. Dissertation, University of California

Always use the standard abbreviation of a journal’s name according to the ISSN List of Title Word Abbreviations (see: www.issn.org/2-22661-LTWA-online.php).
Illustrations

For the best quality final product, it is highly recommended that you submit all of your artwork – photographs, line drawings, etc. – in an electronic format. Your art will then be produced to the highest standards with the greatest accuracy to detail. The published work will directly reflect the quality of the artwork provided.

Electronic Figure Submission
Supply all figures electronically.
Figures should be integrated within the text.
Indicate what graphics program was used to create the artwork.
For vector graphics, the preferred format is EPS; for halftones, please use TIFF format. MS Office files are also acceptable.
Vector graphics containing fonts must have the fonts embedded in the files.
Name your figure files with "Fig" and the figure number, e.g., Fig1.eps.

Line Art
Definition: Black and white graphic with no shading.
Do not use faint lines and/or lettering and check that all lines and lettering within the figures are legible at final size.
All lines should be at least 0.1 mm (0.3 pt) wide.
Scanned line drawings and line drawings in bitmap format should have a minimum resolution of 1200 dpi.
Vector graphics containing fonts must have the fonts embedded in the files.

Halftone Art
Definition: Photographs, drawings, or paintings with fine shading, etc.
If any magnification is used in the photographs, indicate this by using scale bars within the figures themselves.
Halftones should have a minimum resolution of 300 dpi.
Combination Art

Definition: a combination of halftone and line art, e.g., halftones containing line drawing, extensive lettering, color diagrams, etc.

Combination artwork should have a minimum resolution of 600 dpi.
Color Art

Color art is free of charge for online publication. If black and white will be shown in the print version, make sure that the main information will still be visible. Many colors are not distinguishable from one another when converted to black and white. A simple way to check this is to make a xerographic copy to see if the necessary distinctions between the different colors are still apparent. If the figures will be printed in black and white, do not refer to color in the captions. Color illustrations should be submitted as RGB (8 bits per channel).

Figure Lettering
To add lettering, it is best to use Helvetica or Arial (sans serif fonts). Keep lettering consistently sized throughout your final-sized artwork, usually about 2–3 mm (8–12 pt). Variance of type size within an illustration should be minimal, e.g., do not use 8-pt type on an axis and 20-pt type for the axis label. Avoid effects such as shading, outline letters, etc. Do not include titles or captions within your illustrations. Magnification should be indicted by scale bars.

Figure Numbering
All figures are to be numbered using Arabic numerals. Figures should always be cited in text in consecutive numerical order. Figure parts should be denoted by lowercase letters (a, b, c, etc.). If an appendix appears in your article and it contains one or more figures, continue the consecutive numbering of the main text. Do not number the appendix figures, "A1, A2, A3, etc." Figures in online appendices (Electronic Supplementary Material) should, however, be numbered separately.

Figure Captions
Each figure should have a concise caption describing accurately what the figure depicts. Include the captions in the text file of the manuscript, not in the figure file. Figure captions begin with the term Fig. in bold type, followed by the figure number, also in bold type. No punctuation is to be included after the number, nor is any punctuation to be placed at the end of the caption. Identify all elements found in the figure in the figure caption; and use boxes, circles, etc., as coordinate points in graphs. Identify previously published material by giving the original source in the form of a reference citation at the end of the figure caption.
Figure Placement and Size
When preparing your figures, size figures to fit in the column width. The figures should be 39 mm, 84 mm, 129 mm, or 174 mm wide and not higher than 234 mm. The publisher reserves the right to reduce or enlarge illustrations.

Permissions
If you include figures that have already been published elsewhere, you must obtain permission from the copyright owner(s) for both the print and online format. Please be aware that some publishers do not grant electronic rights for free and that Springer will not be able to refund any costs that may have occurred to receive these permissions. In such cases, material from other sources should be used.

Tables
All tables are to be numbered using Arabic numerals. Tables should always be cited in text in consecutive numerical order. For each table, please supply a table caption (title) explaining the components of the table and a legend explaining any abbreviations used in that table. Identify any previously published material by giving the original source in the form of a reference at the end of the table caption. Footnotes to tables should be indicated by superscript lower-case letters (or asterisks for significance values and other statistical data) and included beneath the table body.

Electronic Supplementary Material
Springer accepts electronic multimedia files (animations, movies, audio, etc.) and other supplementary files to be published online along with an article or a book chapter. This feature can add dimension to the author's article, as certain information cannot be printed or is more convenient in electronic form. Electronic supplementary material for an article in the journal will be published in SpringerLink provided the material is:

- submitted to the Editor(s) in electronic form together with the paper and is subject to peer review
- accepted by the journal's Editor(s)
Submission
Supply all supplementary material in standard file formats.
Please include in each file the following information: article title, journal name, author names; affiliation and e-mail address of the corresponding author.
To accommodate user downloads, please keep in mind that larger-sized files may require very long download times and that some users may experience other problems during downloading.

Audio, Video, and Animations
Always use MPEG-1 (.mpg) format.

Text and Presentations
Submit your material in PDF format; .doc or .ppt files are not suitable for long-term viability. A collection of figures may also be combined in a PDF file.

Spreadsheets
Spreadsheets should be converted to PDF if no interaction with the data is intended. If the readers should be encouraged to make their own calculations, spreadsheets should be submitted as .xls files (MS Excel).

Specialized Formats
Specialized format such as .pdb (chemical), .wrl (VRML), .nb (Mathematica notebook), and .tex can also be supplied.

Collecting Multiple Files
It is possible to collect multiple files in a .zip or .gz file.

Numbering
If supplying any supplementary material, the text must make specific mention of the material as a citation, similar to that of figures and tables. Refer to the supplementary files as “Online Resource”, e.g., “… as shown in the animation (Online Resource 3)”, “… additional data are given in Online Resource 4”. Name the files consecutively, e.g. “ESM_3.mpg”, “ESM_4.pdf”.

Captions
For each supplementary material, please supply a concise caption describing the content of the file.

Processing of Supplementary Files
Electronic supplementary material will be published as received from the author without any conversion, editing, or reformatting.
After Acceptance

Open Choice
In addition to the normal publication process (whereby an article is submitted to the journal and access to that article is granted to customers who have purchased a subscription), Springer provides an alternative publishing option: Springer Open Choice. A Springer Open Choice article receives all the benefits of a regular subscription-based article, but in addition is made available publicly through Springer’s online platform SpringerLink. We regret that Springer Open Choice cannot be ordered for published articles (http://springer.com/openchoice).

Copyright Transfer
Authors will be asked to transfer copyright of the article to the Publisher (or grant the Publisher exclusive publication and dissemination rights). This will ensure the widest possible protection and dissemination of information under copyright laws. Open Choice articles do not require transfer of copyright as the copyright remains with the author. In opting for open access, they agree to the Springer Open Choice Licence.

Offprints
Two complimentary copies of the respective issue are supplied. Orders for offprints can be placed by returning the order form with the corrected proofs.

Color Illustrations
Online publication of color illustrations is free of charge. For color in the print version, authors will be expected to make a contribution towards the extra costs.

Proofreading
The purpose of the proof is to check for typesetting or conversion errors and the completeness and accuracy of the text, tables and figures. Substantial changes in content, e.g., new results, corrected values, title and authorship, are not allowed without the approval of the Principal Editor. After online publication, further changes can only be made in the form of an Erratum, which will be hyperlinked to the article.

Online First
The article will be published online after receipt of the corrected proofs. This is the official first publication citable with the DOI. After release of the printed version, the paper can also be cited by issue and page numbers.
