Contents

1. The Development of Panel Studies of Delinquency ...................... 1

   Terence P. Thornberry and Marvin D. Krohn

   Introduction ......................................................... 1
   Panel Studies of Crime and Delinquency .......................... 3
      Common Elements ............................................... 3
      Diversity of Panel Studies ................................... 4
      Limitations of Panel Studies ................................. 5
   Taking Stock ...................................................... 6

2. Causes and Consequences of Delinquency: Findings from the Rochester Youth Development Study ......................... 11

   Terence P. Thornberry, Alan J. Lizotte, Marvin D. Krohn et al.

   Introduction ......................................................... 11
   Theoretical Framework ............................................ 12
      Interactional Theory ............................................ 12
      Social Network Theory ....................................... 15
   Design of the Rochester Youth Development Study ................ 16
      Sample .......................................................... 16
      Subject Retention ............................................. 17
      Measurement .................................................... 18
   Analytic Themes .................................................. 19
      Family and Delinquency ....................................... 20
      Maltreatment and Delinquency ................................ 24
      School and Delinquency ....................................... 26
      Peers, Beliefs, and Delinquency .............................. 28
      Social Networks and Delinquent Behavior .................... 29
      The Impact of Structural Position ............................ 34
      Long-Term Developmental Effects ............................. 36
3. Delinquency and Crime: Some Highlights from the Denver Youth Survey

David Huizinga, Anne Wylie Weiher, Rachele Espiritu et al.

Introduction ............................................................................................................. 47
Epidemiology of Delinquency, Drug Use, and Victimization .............................. 50
   Over-Time Changes in Delinquency and Drug Use: The 1970's and the 1990's ........................................................................................................... 50
   Epidemiology: Age, Gender, and Ethnicity ...................................................... 52
   Age of Initiation and Subsequent Delinquency .............................................. 53
   The Intermittency of Serious and Violent Offending .................................... 55
   Victimization ..................................................................................................... 55
   The Co-Occurrence or Overlap of Problem Behaviors ................................ 56
Peers and Delinquent Gangs .................................................................................. 63
   Delinquent Gangs ............................................................................................. 63
   Peers, Gangs, and Co-Offending ..................................................................... 68
Explanatory, Risk, and Protective Factors ............................................................ 70
   Risk and Protective Factors for Successful Adolescence ............................. 70
   Multiple Etiological Pathways to Delinquency .............................................. 73
   Developmental and Gender Differences in Explanatory Models .................. 75
   Intergenerational Transmission of Delinquency and Drug Use ................. 76
   Neighborhoods and Problem Behavior ........................................................ 77
Arrest and Imprisonment ....................................................................................... 79
   The Impact of Arrest ...................................................................................... 79
   Initiation of Violent Offending and Age at First Arrest ............................... 81
   Adolescent Precursors to Young Adult Imprisonment ................................ 82
Help-Seeking for Psychological Behavior Problems .......................................... 83
Some Final Comments and Plans for the Future ............................................... 85

4. The Development of Male Offending: Key Findings from Fourteen Years of the Pittsburgh Youth Study

Rolf Loeber, David P. Farrington, Magda Stouthamer-Loeber et al.

Introduction ............................................................................................................. 93
Design and Methods ............................................................................................. 96

7. The Montreal Longitudinal and Experimental Study: Rediscovering the Power of Descriptions
Richard E. Tremblay, Frank Vitaro, Daniel Nagin et al.

Aims and Design of the Study ............................................. 205
Key Findings ................................................................. 210
Kindergarten Disruptive Behavior Predicts Delinquency
During the Transition from Childhood to Early Adolescence .... 210
Kindergarten Personality Predicts Delinquency During the
Transition from Childhood to Adolescence .......................... 211
Biological Correlates of Delinquency ................................. 215
Family Poverty, Family Structure, Parenting Process, and
School Failure as Predictors of Delinquency ....................... 217
Deviant Friends During Pre-Adolescence and
Early Delinquency .......................................................... 220
Developmental Trajectories to Physically Violent and
Nonviolent Juvenile Delinquency ...................................... 224
A Preventive Experiment to Test Causal Hypotheses and
Identify Effective Interventions ....................................... 230
