<b>I</b>	<b>Steady-State Solutions of the Navier–Stokes Equations:</b>	
	<b>Statement of the Problem and Open Questions</b> . . . . .	1
	Introduction . . . . .	1
	I.1 Flow in Bounded Regions . . . . .	4
	I.2 Flow in Exterior Regions . . . . .	8
	I.2.1 Three-Dimensional Flow . . . . .	10
	I.2.2 Plane Flow . . . . .	14
	I.3 Flow in Regions with Unbounded Boundaries . . . . .	17
<b>II</b>	<b>Basic Function Spaces and Related Inequalities</b> . . . . .	25
	Introduction . . . . .	25
	II.1 Preliminaries . . . . .	25
	II.1.1 Basic Notation . . . . .	26
	II.1.2 Banach Spaces and their Relevant Properties . . . . .	29
	II.1.3 Spaces of Smooth Functions . . . . .	35
	II.1.4 Classes of Domains and their Properties . . . . .	36
	II.2 The Lebesgue Spaces $L^q$ . . . . .	40
	II.3 The Sobolev Spaces $W^{m,q}$ and Embedding Inequalities . . . . .	48
	II.4 Boundary Inequalities and the Trace of Functions of $W^{m,q}$ . . . . .	61
	II.5 Further Inequalities and Compactness Criteria in $W^{m,q}$ . . . . .	69
	II.6 The Homogeneous Sobolev Spaces $D^{m,q}$ and Embedding Inequalities . . . . .	80
	II.7 Approximation of Functions from $D^{m,q}$ by Smooth Functions and Characterization of Space $D_0^{m,q}$ . . . . .	102
	II.8 The Normed Dual of $D_0^{m,q}(\Omega)$ . The Spaces $D_0^{-m,q}$ . . . . .	109
	II.9 Pointwise behavior at Large Distances of Functions from $D^{1,q}$ . . . . .	115
	II.10 Boundary Trace of Functions from $D^{m,q}(\mathbb{R}_+^n)$ . . . . .	121
	II.11 Some Integral Transforms and Related Inequalities . . . . .	125
	II.12 Notes for the Chapter . . . . .	134

<b>III</b>	<b>The Function Spaces of Hydrodynamics</b> . . . . .	139
	Introduction . . . . .	139
III.1	The Helmholtz–Weyl Decomposition of the Space $L^q$ . . . . .	141
III.2	Relevant Properties of the Spaces $H_q$ and $G_q$ . . . . .	155
III.3	The Problem $\nabla \cdot \mathbf{v} = f$ . . . . .	161
III.4	The Spaces $H_q^1$ . . . . .	193
	III.4.1 Bounded Domains . . . . .	196
	III.4.2 Exterior Domains . . . . .	197
	III.4.3 Domains with Noncompact Boundary . . . . .	198
III.5	The Spaces $\mathcal{D}_0^{1,q}$ . . . . .	214
III.6	Approximation Problems in Spaces $H_q^1$ and $\mathcal{D}_0^{1,q}$ . . . . .	218
III.7	Notes for the Chapter . . . . .	226
<b>IV</b>	<b>Steady Stokes Flow in Bounded Domains</b> . . . . .	231
	Introduction . . . . .	231
IV.1	Generalized Solutions. Existence and Uniqueness . . . . .	233
IV.2	Existence, Uniqueness, and $L^q$ -Estimates in the Whole Space. The Stokes Fundamental Solution . . . . .	238
IV.3	Existence, Uniqueness, and $L^q$ -Estimates in a Half-Space. Evaluation of Green’s Tensor . . . . .	247
IV.4	Interior $L^q$ -Estimates . . . . .	263
IV.5	$L^q$ -Estimates Near the Boundary . . . . .	271
IV.6	Existence, Uniqueness, and $L^q$ -Estimates in a Bounded Domain . . . . .	279
IV.7	Existence and Uniqueness in Hölder Spaces. Schauder Estimates . . . . .	287
IV.8	Green’s Tensor, Green’s Identity and Representation Formulas . . . . .	288
IV.9	Notes for the Chapter . . . . .	294
<b>V</b>	<b>Steady Stokes Flow in Exterior Domains</b> . . . . .	299
	Introduction . . . . .	299
V.1	Generalized Solutions. Preliminary Considerations and Regularity Properties . . . . .	304
V.2	Existence and Uniqueness of Generalized Solutions for Three-Dimensional Flow . . . . .	306
V.3	Representation of Solutions. Behavior at Large Distances and Related Results . . . . .	310
V.4	Existence, Uniqueness, and $L^q$ -Estimates: Strong Solutions . . . . .	320
V.5	Existence, Uniqueness, and $L^q$ -Estimates: $q$ -generalized Solutions . . . . .	337
V.6	Green’s Tensor and Some Related Properties . . . . .	349
V.7	A Characterization of Certain Flows with Nonzero Boundary Data. Another Form of the Stokes Paradox . . . . .	351

V.8	Further Existence and Uniqueness Results for $q$ -generalized Solutions . . . . .	354
V.9	Notes for the Chapter . . . . .	362
<b>VI</b>	<b>Steady Stokes Flow in Domains with Unbounded Boundaries . . . . .</b>	<b>365</b>
	Introduction . . . . .	365
VI.1	Leray's Problem: Existence, Uniqueness, and Regularity . . . . .	370
VI.2	Decay Estimates for Flow in a Semi-infinite Straight Channel . . . . .	379
VI.3	Flow in Unbounded Channels with Unbounded Cross Sections. Existence, Uniqueness, and Regularity . . . . .	387
VI.4	Pointwise Decay of Flows in Channels with Unbounded Cross Section . . . . .	393
VI.5	Existence, Uniqueness, and Asymptotic Behavior of Flow Through an Aperture . . . . .	407
VI.6	Notes for the Chapter . . . . .	415
<b>VII</b>	<b>Steady Oseen Flow in Exterior Domains . . . . .</b>	<b>417</b>
	Introduction . . . . .	417
VII.1	Generalized Solutions. Regularity and Uniqueness . . . . .	420
VII.2	Existence of Generalized Solutions for Three-Dimensional Flow . . . . .	424
VII.3	The Oseen Fundamental Solution and the Associated Volume Potentials . . . . .	429
VII.4	Existence, Uniqueness, and $L^q$ -Estimates in the Whole Space . . . . .	445
VII.5	Existence of Generalized Solutions for Plane Flows in Exterior Domains . . . . .	459
VII.6	Representation of Solutions. Behavior at Large Distances and Related Results . . . . .	467
VII.7	Existence, Uniqueness, and $L^q$ -Estimates in Exterior Domains . . . . .	475
VII.8	Limit of Vanishing Reynolds Number. Transition to the Stokes Problem . . . . .	487
VII.9	Notes for the Chapter . . . . .	492
<b>VIII</b>	<b>Steady Generalized Oseen Flow in Exterior Domains . . . . .</b>	<b>495</b>
	Introduction . . . . .	495
VIII.1	Generalized Solutions. Regularity and Existence . . . . .	499
VIII.2	Generalized Solutions. Uniqueness . . . . .	505
VIII.3	The Fundamental Solution to the Time-Dependent Oseen Problem and Related Properties . . . . .	514
VIII.4	On the Unique Solvability of the Oseen Initial-Value Problem . . . . .	526

VIII.5	Existence, Uniqueness, and Pointwise Estimates of Solutions in the Whole Space . . . . .	546
VIII.6	On the Pointwise Asymptotic Behavior of Generalized Solutions . . . . .	554
VIII.7	Existence, Uniqueness, and $L^q$ -Estimates. The case $\mathcal{R} = 0$ . . .	560
VIII.8	Existence, Uniqueness, and $L^q$ -Estimates. The Case $\mathcal{R} \neq 0$ .	572
VIII.9	Notes for the Chapter . . . . .	578
<b>IX</b>	<b>Steady Navier–Stokes Flow in Bounded Domains . . . . .</b>	<b>583</b>
	Introduction . . . . .	583
IX.1	Generalized Solutions. Preliminary Considerations . . . . .	586
IX.2	On the Uniqueness of Generalized Solutions . . . . .	591
IX.3	Existence and Uniqueness with Homogeneous Boundary Data . . . . .	596
IX.4	Existence and Uniqueness with Nonhomogeneous Boundary Data . . . . .	602
IX.5	Regularity of Generalized Solutions . . . . .	621
IX.6	Limit of Infinite Viscosity: Transition to the Stokes Problem . . . . .	640
IX.7	Notes for the Chapter . . . . .	643
<b>X</b>	<b>Steady Navier–Stokes Flow in Three-Dimensional Exterior Domains. Irrotational Case . . . . .</b>	<b>649</b>
	Introduction . . . . .	649
X.1	Generalized Solutions. Preliminary Considerations and Regularity Properties . . . . .	653
X.2	On the Validity of the Energy Equation for Generalized Solutions . . . . .	659
X.3	Some Uniqueness Results . . . . .	668
X.4	Existence of Generalized Solutions . . . . .	676
X.5	On the Asymptotic Behavior of Generalized Solutions: Preliminary Results and Representation Formulas . . . . .	688
X.6	Global Summability of Generalized Solutions when $v_\infty \neq 0$ . . . . .	698
X.7	The Energy Equation and Uniqueness for Generalized Solutions when $v_\infty \neq 0$ . . . . .	705
X.8	The Asymptotic Structure of Generalized Solutions when $v_\infty \neq 0$ . . . . .	709
X.9	On the Asymptotic Structure of Generalized Solutions when $v_\infty = 0$ . . . . .	721
X.10	Limit of Vanishing Reynolds Number: Transition to the Stokes Problem . . . . .	731
X.11	Notes for the Chapter . . . . .	742

<b>XI</b>	<b>Steady Navier–Stokes Flow in Three-Dimensional Exterior Domains. Rotational Case</b> . . . . .	745
	Introduction . . . . .	745
XI.1	Generalized Solutions. Existence of the Pressure and Regularity Properties . . . . .	749
XI.2	On the Energy Equation and the Uniqueness of Generalized Solutions . . . . .	755
XI.3	Existence of Generalized Solutions . . . . .	762
XI.4	Global Summability of Generalized Solutions when $v_0 \cdot \omega \neq 0$ . . . . .	770
XI.5	The Energy Equation and Uniqueness for Generalized Solutions when $v_0 \cdot \omega \neq 0$ . . . . .	772
XI.6	On the Asymptotic Structure of Generalized Solutions When $v_0 \cdot \omega \neq 0$ . . . . .	775
XI.7	On the Asymptotic Structure of Generalized Solutions When $v_0 \cdot \omega = 0$ . . . . .	790
XI.8	Notes for the Chapter . . . . .	795
<b>XII</b>	<b>Steady Navier–Stokes Flow in Two-Dimensional Exterior Domains</b> . . . . .	797
	Introduction . . . . .	797
XII.1	Generalized Solutions and $D$ -Solutions . . . . .	800
XII.2	On the Uniqueness of Generalized Solutions . . . . .	801
XII.3	On the Asymptotic Behavior of $D$ -Solutions . . . . .	804
XII.4	Asymptotic Decay of the Vorticity and its Relevant Consequences . . . . .	824
XII.5	Existence and Uniqueness of Solutions for Small Data and $v_\infty \neq 0$ . . . . .	836
XII.6	A Necessary Condition for Non-Existence with Arbitrary Large Data . . . . .	853
XII.7	Global Summability of Generalized Solutions when $v_\infty \neq 0$ . . . . .	855
XII.8	The Asymptotic Structure of Generalized Solutions when $v_\infty \neq 0$ . . . . .	866
XII.9	Limit of Vanishing Reynolds Number: Transition to the Stokes Problem . . . . .	885
XII.10	Notes for the Chapter . . . . .	891
<b>XIII</b>	<b>Steady Navier–Stokes Flow in Domains with Unbounded Boundaries</b> . . . . .	897
	Introduction . . . . .	897
XIII.1	Leray’s Problem: Generalized Solutions and Related Properties. . . . .	900
XIII.2	On the Uniqueness of generalized Solutions to Leray’s Problem. . . . .	903

XIII.3	Existence and Uniqueness of Solutions to Leray's Problem . . . . .	910
XIII.4	Decay Estimates for Steady Flow in a Semi-Infinite Straight Channel . . . . .	916
XIII.5	Flow in an Aperture Domain. Generalized Solutions and Related Properties . . . . .	926
XIII.6	Energy Equation and Uniqueness for Flows in an Aperture Domain . . . . .	930
XIII.7	Existence and Uniqueness of Flows in an Aperture Domain . . . . .	935
XIII.8	Global Summability of Generalized Solutions for Flow in an Aperture Domain . . . . .	949
XIII.9	Asymptotic Structure of Generalized Solutions for Flow in an Aperture Domain . . . . .	958
XIII.10	Notes for the Chapter . . . . .	970
<b>Bibliography</b> . . . . .		975
<b>Index</b> . . . . .		1009

<http://www.springer.com/978-0-387-09619-3>

An Introduction to the Mathematical Theory of the  
Navier-Stokes Equations

Steady-State Problems

Galdi, G.P.

2011, XIV, 1018 p. 4 illus., Hardcover

ISBN: 978-0-387-09619-3
