Contents

Preface ................................................................. vii
Contributors ..................................................... xv

Part I:  Perioperative Management and Evaluation

1. Preoperative Evaluation of the Healthy Laparoscopic Patient ........................................ 3
   Stephanie B. Jones and Daniel B. Jones

2. Preoperative Evaluation of Complex Laparoscopic Patients ........................................ 8
   Dmitry Oleynikov and Karen D. Horvath IV

3. Preoperative Patient Instructions ............................................. 20
   Tracey D. Arnell

4. Contraindications to Laparoscopy ........................................... 25
   Steven P. Bowers and John G. Hunter

5. Perioperative Antibiotics in Laparoscopic Surgery ........................................... 33
   Tracey D. Arnell

Part II:  Intraoperative Management, Positioning, Setup, and Port Placement

Introduction to Part II: Introductory Remarks Concerning Operating Room Setup, Patient Positioning, and Port Placement Chapters .................................................. 41
Richard L. Whelan

6. Intraoperative Management of the Laparoscopic Patient .......................................... 48
   Carol E.H. Scott-Conner

7. Summary of Intraoperative Physiologic Alterations Associated with Laparoscopic Surgery ........................................... 56
   Arif Ahmad and Bruce D. Schirmer
8.1 Patient Positioning and Logistics in the Operating Room During Laparoscopic Biliary Surgery ............... 63
  George Berci

8.2 Hepatobiliary, Cholecystectomy, and Common Bile Duct Exploration (CBDE). Includes Cholangiography and Intraoperative Choledochoscopy: Port Placement Arrangements ....................... 69
  Dennis L. Fowler

9.1 Operating Room Setup and Patient Positioning for Laparoscopic Gastric Bypass and Laparoscopic Gastric Banding .......................................................... 76
  Philip R. Schauer, William Gourash, Giselle G. Hamad, and Sayeed Ikramuddin

9.2 Minimally Invasive Procedures for Morbid Obesity: Port Placement Arrangements ............................. 85
  Marc Bessler and Charles Cappandona

10.1 Patient Positioning and Operating Room Setup for Laparoscopic Treatment of Gastroesophageal Reflux Disease .......................................................... 92
  Dennis Blom and Jeffrey H. Peters

10.2 Port Placement Arrangements for Gastroesophageal Reflux Disease Surgery ................................. 97
  Jorge Cueto-Garcia and José Antonio Vazquez-Frias

11.1 Minimally Invasive Esophageal Resection: Patient Position and Room Setup ............................... 105
  James D. Luketich and Yaron Perry

11.2 Port Placement for Minimally Invasive Esophagectomy .......................................................... 108
  James D. Luketich and Yaron Perry

12.1 Hernia Repair: Patient Positioning and Operating Room Setup ................................................ 113
  David S. Thoman and Edward H. Phillips

12.2 Hernia: Port Placement Arrangements ......................... 117
  David S. Thoman and Edward H. Phillips
13.1 Spinal Access Operating Room Setup and Patient Positioning ........................................ 126
Namir Katkhouda and Sharan Manhas

13.2 Spinal Access Surgery Port Placement Arrangements. ........................................... 130
Namir Katkhouda and Sharan Manhas

14.1 Operating Room Setup and Patient Positioning for Laparoscopic Adrenalectomy and Donor Nephrectomy .............................................................. 134
Michael Edye

14.2 Port Placement in Laparoscopic Adrenalectomy and Donor Nephrectomy .............. 139
Samer G. Mattar and C. Daniel Smith

15.1 Colorectal Resections: Patient Positioning and Operating Room Setup ...................... 150
Tonia M. Young-Fadok

15.2 Port Placement Arrangements: Laparoscopic-Assisted Colorectal Resections ............. 163
Patrick Colquhoun and Steven D. Wexner

15.3 Port Placement Arrangements for Hand-Assisted Colorectal Resections ................. 177
Jeffrey L. Cohen

16.1 Patient Positioning and Operating Room Setup: Splenectomy ................................ 193
Joseph B. Petelin

16.2 Splenectomy: Port Placement Arrangements. ......................................................... 202
William E. Kelley Jr.

17.1 Laparoscopic Ultrasonography: Patient Positioning and Operating Room Setup ....... 212
Maurice E. Arregui and Matthew S. French

17.2 Laparoscopic Ultrasonography: Port Placement Arrangements. ............................... 219
Maurice E. Arregui and Matthew S. French

31. Resumption of Diet and Recovery of Bowel Function ................................ 326
   Robert W. Beart Jr. and James A. Olson

32. Wound Management and Complications ................................. 333
   Stanley C. Hewlett and Gary C. Vitale

33. Postoperative Restrictions After Laparoscopic Operations .............. 344
   Robert N. Cacchione and Gerald M. Larson

Part IV: Physiologic Implications of CO₂ Pneumoperitoneum and Minimally Invasive Methods

34. Cardiovascular Effects of CO₂ Pneumoperitoneum ............... 355
   Lee L. Swanström

35. Pulmonary Implications of CO₂ Pneumoperitoneum in Minimally Invasive Surgery ..................... 360
   Karen E. Deveney

36. Renal Ramifications of CO₂ Pneumoperitoneum ............... 366
   Ayal M. Kaynan and Sherry M. Wren

37. The Systemic Oncologic Implications of Surgery .......... 374
   Sang W. Lee

38. Liver Function and Portal Blood Flow .......................... 379
   Michael W. Potter, Shimul A. Shah, and Mark P. Callery

39. Port Site Tumors: Local Oncologic Effect ..................... 385
   James W. Fleshman Jr.

40. Port Site Tumors: Means of Prevention ..................... 393
   Marc A. Reymond, Hans Lippert, and Morris E. Franklin

41. Immunologic Consequences and Considerations of the Laparoscopic Approach ......................... 402
   Daniel L. Feingold, Joseph Carter, and Richard L. Whelan
Effect of Patient Position on Cardiovascular and Pulmonary Function
Eric J. Hazebroek and H. Jaap Bonjer

Pros and Cons of Alternate Gases and Abdominal Wall Lifting Methods
Robert Talac and Heidi Nelson

Risk of Gas Embolism with CO₂ and Other Gases
David I. Watson

Impact of CO₂ Pneumoperitoneum on Body Temperature and the Integrity of the Peritoneal Lining
Carsten N. Gutt, Christopher Heinbuch, and Parswa Ansari

Adhesion Formation
A. Brent Fruin, Arthur F. Stucchi, Ali M. Ghellai, and James M. Becker

Impact of Minimally Invasive Methods on Postoperative Pain and Pulmonary Function
Alessandro Fichera and Jeffrey W. Milsom

Ergonomics in Laparoscopic Surgery
Ramon Berguer

Operative Management and Evaluation:
Bowel Preparation
Peter Marcello
