

CONTENTS

FOREWORD		xi
ACKNOWLEDGMENTS		xv
CHAPTER 1	INTRODUCTION	1
CHAPTER 2	APOLLO: THE LEGACY	11
	2.1 Introduction	11
	2.2 Origins of Apollo	12
	2.3 Cold War Legacy	17
	2.4 Human Legacy	18
	2.5 Scientific Legacy	20
	Notes and References	21
CHAPTER 3	ENERGY: THE GLOBAL FUTURE	25
	3.1 Introduction	25
	3.2 “In the Box” Energy Sources	28
	3.2.1 Fossil Fuels	28
	3.2.2 Nuclear Fission	31

Contents

	3.2.3	Terrestrial Solar Power	34
	3.2.4	Conservation	36
	3.2.5	The “Portfolio” Approach	37
3.3		“Out of the Box” Energy Sources	38
	3.3.1	Hydrogen	40
	3.3.2	Deuterium–Tritium Fusion	40
	3.3.3	Space Solar Energy	42
	3.3.4	Lunar Helium-3 Fusion	43
		Notes and References	47
CHAPTER 4		BOOSTER: MOON ROCKET ECONOMICS	53
	4.1	Introduction	53
	4.2	The Saturn VI	54
	4.2.1	The Saturn V Benchmark	54
	4.2.2	Booster Operational Costs	57
	4.3	Alternatives to a “Saturn VI”	59
	4.3.1	Shuttle Derived Booster	59
	4.3.2	Energia	60
	4.3.3	Multiple Expendable Launch Vehicles	60
		Notes and References	61
CHAPTER 5		FUSION: HELIUM-3 POWER ECONOMICS	63
	5.1	Introduction	63
	5.2	Potential Approaches to Fusion Power	64
	5.2.1	Deuterium–Tritium Fusion	64
	5.2.2	Helium-3 and Deuterium–Helium-3 Fusion	65
	5.2.3	Hydrogen–Boron-11 Fusion	67
	5.3	Economics of Deuterium–Helium-3 Fusion	68
	5.4	Summary	73
		Notes and References	74
CHAPTER 6		RESOURCES: LUNAR HELIUM-3 ECONOMICS	77
	6.1	Introduction	77
	6.2	Geology of Lunar Helium	80
	6.2.1	General Background	80
	6.2.2	Helium-3 in the Regolith	84
	6.2.3	Helium-3 and Titanium	84
	6.2.4	Regolith Breccia vs Regolith Fines	86
	6.2.5	Helium Concentration vs Grain Size	88

Contents

	6.2.6	Agitation Losses	89
	6.2.7	Summary	92
6.3		Economic Geology of Lunar Helium-3	92
	6.3.1	General Background	92
	6.3.2	Mining Analysis	93
	6.3.3	Mining-Processing Costs	96
		Notes and References	99
CHAPTER 7		SETTLEMENT: HELIUM-3 PRODUCTION ECONOMICS	109
	7.1	Introduction	109
	7.2	Mining, Processing, and Refining	111
	7.2.1	Mining Strategy: Spiral vs Rectilinear	111
	7.2.2	Equipment Design	114
	7.3	Dust: A Special Problem	123
	7.4	Thermal and Electrical Power	124
	7.4.1	Solar Energy	125
	7.4.2	Solar and Lunar Hydrogen–Oxygen Energy Cycle	125
	7.4.3	Nuclear Fission	127
	7.4.4	Helium-3 Fusion	127
	7.5	Export to Earth and Space	127
	7.6	Risk Management	129
	7.7	Employee Selection and Training	131
	7.8	Employee Compensation	133
	7.9	Imported Consumables and Other Support	133
	7.10	Production Economics	134
	7.10.1	Non-recurring Costs for Initiating Helium-3 Production	135
	7.10.2	Summary	142
		Notes and References	143
CHAPTER 8		APPROACHES: ORGANIZATIONAL OPTIONS FOR A RETURN	149
	8.1	Introduction	149
	8.2	Financing	153
	8.2.1	Minimum Start-Up Capital Required	153
	8.2.2	Minimum Tax Revenues Required	155
	8.2.3	Minimum Private Capital Required	155
	8.2.4	Minimum Cost of Capital	155
	8.2.5	Maximum Financing Feasibility	156

Contents

8.2.6	Least Regulatory Costs	156
8.2.7	Minimum Operating Costs	157
8.2.8	Maximum Return on Investment	157
8.2.9	Maximum Staying Power	157
8.3	Management	158
8.3.1	Minimum Complexity of Management	159
8.3.2	Minimum Complexity of Operations	159
8.3.3	Access to Largest Technical Base	159
8.3.4	Quality in Planning, RDT&E, Production, and Operations	160
8.3.5	Quality in Marketing and Sales and Product Distribution	160
8.3.6	Maximum Sales Margins	160
8.3.7	Quality in Financial Controls	161
8.3.8	Quality of Work Force	162
8.3.9	Motivation of Work Force	162
8.4	External Issues	162
8.4.1	Maximum Net Environmental Protection	163
8.4.2	Maximum Potential for Technology Spinoff	163
8.4.3	Maximum Economic Benefit	164
8.4.4	Maximum World Benefit	164
8.4.5	Maximum Potential for Space Settlement	165
8.5	Aggregate Approach Evaluation	166
	Notes and References	167
CHAPTER 9	MANAGEMENT: LESSONS FROM APOLLO	169
9.1	Introduction	169
9.2	Apollo Management	170
9.2.1	Evolution of an Approach to Management	170
9.2.2	The Fire	177
9.2.3	Professional Values and Consequences	181
9.2.4	Internal Engineering Capability	185
9.2.5	Competitive Development of Critical Systems	186
9.2.6	Value of Youth	187
9.2.7	Management Oversight	187
9.2.8	Political Support	188

Contents

	9.3 Essential Conditions for Success	191
	Notes and References	193
CHAPTER 10	NASA: RESTRUCTURING FOR DEEP SPACE	197
	10.1 NASA in Political Terms	198
	10.2 Management Restructuring	202
	10.3 Centers' Roles and Missions	205
	10.4 Long Duration Space Shuttle	208
	10.5 NASA and Space Tourism	210
	10.6 Aeronautics	214
	10.7 Space Biomedicine	217
	10.8 Space Launch Initiative	222
	10.9 Space Science	230
	10.10 Major Recent Events	236
	Notes and References	238
CHAPTER 11	INVESTORS: THE BEST APPROACH	239
	11.1 Introduction	239
	11.2 Commercial Precedents in Space	241
	11.2.1 Communications	241
	11.2.2 Other Commercial Space Endeavors	242
	11.3 Phase I: Commercial Fusion Technology	242
	11.3.1 Diagnostic Medical Isotope Production	245
	11.3.2 Neutron Diagnostic Imaging	250
	11.3.3 Therapeutic Medical Isotope Production	250
	11.3.4 Detection of Landmines and Other Threats	252
	11.3.5 Nuclear Materials Disposal (Transmutation)	252
	11.3.6 Mobile Power Sources	253
	11.4 Phase II: Fusion Power Demonstration	253
	11.5 Phase III: Saturn VI and Lunar Production	255
	11.6 Management Structure	259
	11.6.1 Organization	260
	11.6.2 Internal Financial and Technical Controls	264
	11.6.3 Modern Management Techniques	265
	11.6.4 Personnel	265
	11.6.5 Launch and Space Operations	265
	11.7 Ancillary Businesses	268

Contents

11.8	Summary	270
	Notes and References	271
CHAPTER 12	LAW: SPACE RESOURCES	275
12.1	Introduction	275
12.2	Relevant Law and Precedents	277
12.3	Antarctic Treaty System	277
12.4	Space Law	280
	12.4.1 Outer Space Treaty of 1967	280
	12.4.2 Moon Agreement of 1979	286
	12.4.3 Intelsat and Inmarsat	289
12.5	Law of the Sea Convention	289
12.6	United States' Space Law	291
12.7	Property and Mineral Rights	291
12.8	Conclusion	295
	Notes and References	296
CHAPTER 13	HUMANS: ROLES IN SPACE	299
13.1	Introduction	299
13.2	Adaptation to Space	303
	13.2.1 Physiological Adaptation	305
	13.2.2 Lunar Habitats and Spacesuits	312
	13.2.3 Cultural and Social Adaptation	313
13.3	Space Radiation	315
13.4	Dust	317
13.5	Lunar Occupational Medicine	317
13.6	Family Development	318
13.7	Implications of Humans in Space	318
	Notes and References	319
CHAPTER 14	IMPLICATIONS	325
	References	328
INDEX		329
