Contents

Section I. Hyperlipidaemia and Atherosclerosis

Chapter 1: Reverse Cholesterol Transport
Jim W. Burgess, Philip A. Sinclair, Christophe M. Chretien, Jonathon Boucher and Daniel L. Sparks

Chapter 2: The Role of LCAT in Atherosclerosis
Dominic S. Ng

Chapter 3: Howdy Partner: Apolipoprotein A-I-ABCA1 Interactions Mediating HDL Particle Formation
Sereyrath Ngeth and Gordon A. Francis

Chapter 4: Role of the Scavenger Receptor Class B Type I in Lipoprotein Metabolism and Atherosclerosis: Insights from Genetically Altered Mice
Bernardo Trigatti

Chapter 5: The Role of Scavenger Receptors in Signaling, Inflammation and Atherosclerosis
Daisy Sahoo and Victor A. Drover

Chapter 6: ABC Transporters and Apolipoprotein E: Critical Players in Macrophage Cholesterol Efflux and Atherosclerosis
Kathryn E. Naus and Cheryl L. Wellington

Chapter 7: Provision of Lipids for Very Low-Density Lipoprotein Assembly
Dean Gilham and Richard Lehner

Chapter 8: Oxidatively Modified Low-Density Lipoproteins and Thrombosis
Garry X. Shen
### Chapter 9: The Clinical Significance of Small, Dense Low-Density Lipoproteins
*Manfredi Rizzo and Kaspar Berneis*

Chapter 10: Bile Acids: At the Crossroads of Sterol, Fat and Carbohydrate Metabolism
*Luis B. Agellon*

### Section II. Diabetes and Hypertension Induced Atherosclerosis

**Chapter 11:** Lipoprotein Metabolism in Insulin-Resistant States
*Rita Kohen Avramoglu, Heather Basciano and Khosrow Adeli*

**Chapter 12:** The Roles of Protein Glycation, Glycoxidation, and Advanced Glycation End-Product Formation in Diabetes-Induced Atherosclerosis
*Imran Rashid, Bronwyn E. Brown, David M. van Reyk and Michael J. Davies*

**Chapter 13:** Molecular and Cellular Mechanisms by Which Diabetes Mellitus Promotes the Development of Atherosclerosis
*Geoff H. Werstuck*

**Chapter 14:** Hypertension and Atherosclerosis: Advanced Glycation End Products—A Common Link
*Sudesh Vasdev and Vicki Gill*

### Section III. Hyperhomocysteinemia and Atherosclerosis

**Chapter 15:** Homocysteine Metabolism
*Enoka P. Wijekoon, Margaret E. Brosnan and John T. Brosnan*

**Chapter 16:** Role of Hyperhomocysteinemia in Atherosclerosis
*Stephen M. Colgan, Donald W. Jacobsen and Richard C. Austin*

**Chapter 17:** Molecular and Biochemical Mechanisms of Hyperhomocysteinemia-Induced Cardiovascular Disorders
*Karmin O, Yaw L. Siow, Patrick C. Choy and Grant M. Hatch*
Section IV. Other Factors in Atherosclerosis and the Associated Complications

Chapter 18: The Role of the Immune System in Atherosclerosis: Lessons Learned from Using Mouse Models of the Disease
Stewart C. Whitman and Tanya A. Ramsamy

Chapter 19: The Role of Infectious Agents in Atherogenesis
Paul K.M. Cheung and Grant N. Pierce

Chapter 20: Transplant Arteriopathy: Role of Nitric Oxide Synthase
Nandini Nair, Hannah Valantine and John P. Cooke

Chapter 21: Insights into the Molecular Mechanisms of Plaque Rupture and Thrombosis
P.K. Shah and Behrooz Sharifi

Section V. Management of Atherosclerosis

Chapter 22: Modification of Biochemical and Cellular Processes in the Development of Atherosclerosis by Red Wine
Harjot K. Saini, Parambir Dhami, Yan-Jun Xu, Sukhinder Kaur Cheema, Amarjit S. Arneja and Naranjan S. Dhalla

Chapter 23: Endothelial Dysfunction and Atherosclerosis: Role of Dietary Fats
Kanta Chechi, Pratibha Dubey and Sukhinder Kaur Cheema

Chapter 24: Oxidized LDL and Antioxidants in Atherosclerosis
Lesley MacDonald-Wicks and Manohar Garg

Chapter 25: Dietary Fatty Acids and Stroke
Gene R. Herzberg

Index
Biochemistry of Atherosclerosis
Kaur, S.C. (Ed.)
2006, XVI, 572 p., Hardcover
ISBN: 978-0-387-31252-1
