Introduction .................................................................1
Richard Whittington and Dirk Richter

1 Introduction .............................................................1
References ........................................................................7

I MEASUREMENT AND EPIDEMIOLOGY

1 Assessing Aggression of Psychiatric Patients: Methods
   of Measurement and Its Prevalence ..............................11
Henk Nijman, Stål Bjørkly, Tom Palmstierna, and Roger Almvik

1 Introduction .............................................................11
2 Assessing the Aggression of Psychiatric Patients with Self-Report
   Questionnaires ............................................................12
3 Assessing the Aggression of Psychiatric Patients with
   Observation Scales ........................................................14
4 The Prevalence of Inpatient Aggression ............................19
References ......................................................................21

II THE PSYCHOLOGY AND SOCIOLOGY OF THE
   VIOLENT INCIDENT

2 Psychological Theories of Aggression: Principles and
   Application to Practice ................................................27
Stål Bjørkly

Abstract .................................................................27
1 Introduction .............................................................27
2 Psychoanalytic Theory ..................................................29
3 Drive Theory .............................................................33
4 Social Learning Theory ............................................. 37
5 Concluding Remarks ............................................. 41
   References ..................................................... 44

3 From the Individual to the Interpersonal: Environment and Interaction in the Escalation of Violence in Mental Health Settings .................................................. 47
Richard Whittington and Dirk Richter

   1 The Individual and the Interpersonal as Explanations for Violence ...... 47
   2 The Limitations of Current Interventions ................................... 50
   3 The Provoking Environment: Aversive Stimulation ....................... 51
   4 The Biological Basis of Violence and Aggression ......................... 53
   5 Psychopathology, Personality, and Violence ............................... 54
   6 The Missing Link: Interaction .......................................... 55
   7 Psychological System .................................................. 56
   8 Social System ....................................................... 60
   9 Conclusion ......................................................... 64
   References ......................................................... 65

4 Users’ Perceptions and Views on Violence and Coercion in Mental Health .................................................. 69
Christoph Abderhalden, Sabine Hahn, Yvonne D. B. Bonner, and Gian Maria Galeazzi

   1 Introduction ..................................................... 69
   2 Users’ Views of Violent Incidents ...................................... 73
   3 Users’ Subjective Experience of Coercive Practices ...................... 76
   4 Research Results and Suggestions ...................................... 83
   References ......................................................... 87

III PREDICTION AND MANAGEMENT

5 Diversity and Consistency in the Legal Management of Involuntary Admission and Treatment Across Europe .............. 95
Trond Hatling, Athanassios Douzenis, and Jim Maguire

   1 Introduction ..................................................... 95
   2 Compulsory Admissions ............................................. 97
   3 Involuntary Treatment in Europe ...................................... 103
   References ......................................................... 107
3 Randomized Controlled Trials Addressing the Pharmacotherapy of Aggression .............................................174
4 Recommendations for Future Research ........................................185
References ........................................185

IV IMPROVING STAFF SKILLS IN HANDLING MANAGEMENT

10 Aggression Management Training Programs: Contents, Implementation, and Organization ..................193
Nico E. Oud

1 Introduction ........................................193
2 Reaching a Safe and Secure Workplace Environment ........................................195
3 General Guidelines Regarding Training ........................................197
4 Recommended Content of Training ........................................198
5 Training Course Aims ........................................201
6 Focus, Duration, and Effects of Training ........................................202
7 Training Trainers ........................................203
8 Conclusion ........................................205
9 Appendix ........................................205
References ........................................209

11 The Effects of Aggression Management Training for Mental Health Care and Disability Care Staff: A Systematic Review ..................................................211
Dirk Richter, Ian Needham, and Stefan Kunz

1 Summary ........................................211
2 Introduction ........................................212
3 Discussion ........................................222
4 Conclusions ........................................224
References ........................................225

V THE ORGANIZATIONAL CONTEXT

12 Locating Training Within a Strategic Organizational Response to Aggression and Violence ..........................231
Kevin J. McKenna and Brodie Paterson

1 Background ........................................231
2 Training ........................................234

VI CONSEQUENCES: HANDLING THE AFTERMATH

15 Psychological Responses Following Exposure to Violence ............................................. 295
Ian Needham

1 Introduction ............................................................. 295
2 Results ................................................................. 298
3 Discussion of Psychological Responses .................................................. 303
4 The Dynamics of Psychological Responses .............................................. 305
5 Dealing with the Aftermath of Patient Violence .......................................... 306
6 Areas for Future Research ...................................................... 307
7 Appendix: Articles Used in the Systematic Review ........................................... 309
   Acknowledgement .......................................................... 315
   References ................................................................. 315

VII CONCLUSIONS

Toward an Evidence-Based Approach in the Management of Violence in Mental Health Settings .................. 321
Dirk Richter and Richard Whittington

1 Introduction ............................................................. 321
2 Measuring and Predicting Violence ...................................................... 323
3 Causes of Violence in Psychiatric Settings ........................................... 324
4 Organizational Issues of Prevention and Management of Violence .............. 325
5 Imminent Behavior and Aggression Management ...................................... 326
6 Postincident Care .......................................................... 327
7 Conclusions ................................................................. 329
   References ................................................................. 329
