## Contents

<b>1</b>	<b>The Binomial No-Arbitrage Pricing Model</b>	1
1.1	One-Period Binomial Model	1
1.2	Multiperiod Binomial Model	8
1.3	Computational Considerations	15
1.4	Summary	18
1.5	Notes	20
1.6	Exercises	20
<b>2</b>	<b>Probability Theory on Coin Toss Space</b>	25
2.1	Finite Probability Spaces	25
2.2	Random Variables, Distributions, and Expectations	27
2.3	Conditional Expectations	31
2.4	Martingales	36
2.5	Markov Processes	44
2.6	Summary	52
2.7	Notes	54
2.8	Exercises	54
<b>3</b>	<b>State Prices</b>	61
3.1	Change of Measure	61
3.2	Radon-Nikodým Derivative Process	65
3.3	Capital Asset Pricing Model	70
3.4	Summary	80
3.5	Notes	83
3.6	Exercises	83
<b>4</b>	<b>American Derivative Securities</b>	89
4.1	Introduction	89
4.2	Non-Path-Dependent American Derivatives	90
4.3	Stopping Times	96
4.4	General American Derivatives	101

4.5	American Call Options .....	111
4.6	Summary .....	113
4.7	Notes .....	115
4.8	Exercises .....	115
<b>5</b>	<b>Random Walk .....</b>	<b>119</b>
5.1	Introduction .....	119
5.2	First Passage Times .....	120
5.3	Reflection Principle .....	127
5.4	Perpetual American Put: An Example .....	129
5.5	Summary .....	136
5.6	Notes .....	138
5.7	Exercises .....	138
<b>6</b>	<b>Interest-Rate-Dependent Assets .....</b>	<b>143</b>
6.1	Introduction .....	143
6.2	Binomial Model for Interest Rates .....	144
6.3	Fixed-Income Derivatives .....	154
6.4	Forward Measures .....	160
6.5	Futures .....	168
6.6	Summary .....	173
6.7	Notes .....	174
6.8	Exercises .....	174
	<b>Proof of Fundamental Properties of Conditional Expectations .....</b>	<b>177</b>
	<b>References .....</b>	<b>181</b>
	<b>Index .....</b>	<b>185</b>
