

# Contents

Series Preface	v
Preface	vii
<b>Chapter 1. Introduction to Dynamic Modeling</b>	<b>1</b>
1.1 Introduction	1
1.2 Static, comparative static, and dynamic models	3
1.3 Model components	5
1.4 Modeling in itthink	7
1.5 The detailed modeling process	18
<b>Chapter 2. Modeling of Dynamic Business Systems</b>	<b>21</b>
2.1 Introduction	21
2.2 Making the organization more manageable: Systems and processes	23
2.3 Creating and using a model	26
2.4 Structural complexity: A market share model	31
2.5 Complexity due to random variation: An order control process	38
2.6 Further benefits of dynamic modeling	42
2.7 Organizing principle of this book	45
<b>Chapter 3. Measuring Process Performance</b>	<b>48</b>
3.1 Introduction	48
3.2 Financial measures of performance	49
3.3 The basic profit model	49
3.4 The role of time, borrowing, and lending	51
3.5 Choosing among alternatives	55
3.6 Optimizing at the level of the firm	59
3.7 Issues with financial measures	62
3.8 Beyond process output measures	64
3.9 The process model approach	66

<b>Chapter 4. Single-Step Processes</b>	<b>76</b>
4.1 Introduction	76
4.2 The basic process model and Little's Law	77
4.3 Queuing systems	86
4.4 Transient queuing behavior	101
4.5 Further modeling with queuing systems	104
<b>Chapter 5. Multistep Serial Workflow Processes</b>	<b>106</b>
5.1 Introduction	106
5.2 Modeling multistep processes in ithink	108
5.3 Specifying models/modeling objectives	109
5.4 An uncoupled process: An order handling process	110
5.5 A tightly coupled process: A fast food restaurant process	121
5.6 Other configurations	129
5.7 Material control systems	131
<b>Chapter 6. Multistep Parallel Workflow Processes</b>	<b>140</b>
6.1 Introduction	140
6.2 Parallel queuing models: Designing a checkout system	141
6.3 Resource implications: The fast food restaurant revisited	144
6.4 Telephone call center model: Balking	149
6.5 Machine repair model	154
6.6 Batching: A laboratory analysis model	162
<b>Chapter 7. The Supplier Interface: Managing Risk</b>	<b>170</b>
7.1 Introduction	170
7.2 First-moment managers	171
7.3 Second-moment managers	171
7.4 Third-moment managers	175
7.5 Fourth-moment managers	176
<b>Chapter 8. Customer Interface</b>	<b>179</b>
8.1 Introduction	179
8.2 Controlling the inventory level: Make-to-Stock model	180
8.3 The Make-to-Order process: Customer interface	187
<b>Chapter 9. The Tradeoffs Among Quality, Speed, and Cost</b>	<b>192</b>
9.1 Introduction	192
9.2 Model development	193
9.3 The tradeoffs	195
9.4 Coping with uncertainty	198

<b>Chapter 10. Modeling Supply Chains</b>	<b>200</b>
10.1 Introduction	200
10.2 Introduction to the Beer Game	203
10.3 The Beer Game model	205
10.4 Further analysis of the Beer Game model	218
10.5 Modifications to the basic model	222
10.6 Using the Beer Game model in game mode	223
<b>Chapter 11. The Dynamics of Management Strategy: An Ecological Metaphor</b>	<b>226</b>
11.1 Introduction	226
11.2 Hierarchy in nature	227
11.3 A model demonstrating the hierarchical nature of an expanding business	228
11.4 Equations for the complete model	236
<b>Chapter 12. Modeling Improvement Processes</b>	<b>240</b>
12.1 Introduction	240
12.2 Learning curves	241
12.3 Modeling an improvement process	247
12.4 Model results	251
12.5 Other types of learning curves	257
<b>Appendix A. Modeling Random Variation in Business Systems</b>	<b>259</b>
A.1 Introduction	259
A.2 The uniform distribution	262
A.3 The triangular distribution	263
A.4 The normal distribution: Common cause process variation	265
A.5 The exponential distribution: Equipment failure times	267
A.6 The Poisson distribution: Modeling defects in products	269
A.7 The pass/fail and binomial distribution: Product failures	271
A.8 Bimodal distributions: Parallel process flows	273
A.9 Custom distributions	274
A.10 The relative comparison of random variation	276
<b>Appendix B. Economic Value Added</b>	<b>279</b>
<b>Appendix C. Derivation of Equations 6.2, 6.3, and 6.4</b>	<b>282</b>

<b>Appendix D. Optimization Techniques for the Customer Interface Model</b>	<b>284</b>
D.1 Optimizing the model	284
D.2 Optimizing the physical model	284
D.3 Disappointment with the physical criterion for optimization	286
D.4 Finding the optimal financial controls	287
<b>Appendix E. System Requirements for the CD-ROM</b>	<b>293</b>
<b>Bibliography</b>	<b>000</b>
<b>Index</b>	<b>000</b>

Dynamic Modeling for Business Management

An Introduction

McGarvey, B.; Hannon, B.

2004, XIV, 308 p. 20 illus. With online files/update.,

Hardcover

ISBN: 978-0-387-40461-5
