Contents

Section A: Introduction

Introduction .......................................................... 3
Harry Whitaker, C.U.M. Smith, and Stanley Finger

Chronology ......................................................... 5
C.U.M. Smith

Section B: Background

Introduction .......................................................... 13
The Editors

1: Brain and Mind in the ‘Long’ Eighteenth Century .................. 15
C.U.M. Smith

2: Enlightening Neuroscience: Microscopes and Microscopy in the Eighteenth Century .......................................................... 29
Brian J. Ford

3: Corpus Curricula: Medical Education and the Voluntary Hospital Movement .......................................................... 43
Jonathan Reinarz

4: Some Thoughts on the Medical Milieu in the Last Quarter of the Eighteenth Century as Reflected in the Life and Activities of James Parkinson (1755–1824) .......................................................... 53
Christopher Gardner-Thorpe

Section C: The Nervous System

Introduction .......................................................... 63
The Editors

5: John Hunter’s Contributions to Neuroscience ....................... 67
James L. Stone, James T. Goodrich, and George R. Cybulski
6: William Cullen (1710–1790) and Robert Whytt (1714–1766)
on the Nervous System .................................................. 85
Julius Rocca

7: 1710: The Introduction of Experimental Nervous System
Physiology and Anatomy by François Pourfour du Petit .................. 99
Lawrence Kruger and Larry W. Swanson

8: Irritable Glue: The Haller–Whytt Controversy on the Mechanism
of Muscle Contraction .................................................. 115
Eugenio Frixione

9: The Taming of the Electric Ray: From a Wonderful and Dreadful
“Art” to “Animal Electricity” and “Electric Battery” ....................... 125
Marco Piccolino

10: Luigi Galvani, Physician, Surgeon, Physicist: From Animal
Electricity to Electro-Physiology ........................................ 145
Miriam Focaccia and Raffaella Simili

Section D: Brain and Behaviour

Introduction ................................................................. 161
The Editors

11: The Vision of William Porterfield .................................. 163
Nicholas J. Wade

12: David Hartley’s Neural Vibrations and Psychological Associations .......... 177
Robert B. Glassman and Hugh W. Buckingham

13: Charles Bonnet’s Neurophilosophy ................................ 191
Harry A. Whitaker and Yves Turgeon

14: Swedenborg and Localization Theory ................................ 201
Ulf Norrsell

Section E: Medical Theories and Applications

Introduction ................................................................. 211
The Editors

15: Neuroscience in the Work of Boerhaave and Haller .................... 213
Peter J. Koehler

Catherine E. Storey
17: Benjamin Franklin and the Electrical Cure for Disorders of the Nervous System ................................................. 245
Stanley Finger

18: Gentleman's Magazine, the Advent of Medical Electricity, and Disorders of the Nervous System ............................................. 257
Hannah Sypher Locke and Stanley Finger

19: Therapeutic Attractions: Early Applications of Electricity to the Art of Healing .................................................. 271
Paola Bertucci

20: John Wesley on the Estimation and Cure of Nervous Disorders ...................................................... 285
James G. Donat

21: Franz Anton Mesmer and the Rise and Fall of Animal Magnetism: Dramatic Cures, Controversy, and Ultimately a Triumph for the Scientific Method ............ 301
Douglas J. Lanska and Joseph T. Lanska

22: Hysteria in the Eighteenth Century .......................................................... 321
Diana Faber

**Section F: Cultural Consequences**

Introduction ................................................................. 333
The Editors

23: Technological Metaphors and the Anatomy of Representations in Eighteenth-Century French Materialism and Dualist Mechanism .................................. 335
Timo Kaitaro

24: Explorations of the Brain, Mind and Medicine in the Writings of Jonathan Swift .................................................. 345
Marjorie Perlman Lorch

25: Temperament and the Long Shadow of Nerves in the Eighteenth Century .................................................. 353
George Rousseau

Index .................................................................................. 371
Brain, Mind and Medicine:
Essays in Eighteenth-Century Neuroscience
Whitaker, H.; Smith, C.U.M.; Finger, S. (Eds.)
2007, XIII, 376 p., Hardcover
