Chapter 1  Culture and Medical Practice ................................. 1
 What Is Culture? ................................................................. 1
  Culture ................................................................. 1
  Race ................................................................. 2
  Ethnicity ............................................................. 2
  Minority ............................................................ 2
  Social Class .......................................................... 3
 Culture and Illness Behavior ............................................... 3
 The Distinction between “Disease” and “Illness” ..................... 4
 Folk Concepts and Explanations of Illness ........................... 4
  Supernatural Explanations ........................................... 4
  Natural Explanations ............................................... 6
  Somato-Medical Explanations ...................................... 6
 Traditional Medicine: Theory and Practice .......................... 7
 Culture of Patients, Physicians, and “Medical Culture” ........... 8
  The Culture of Patient ............................................... 8
  The Culture of Physician .......................................... 8
  The Medical Culture ............................................. 9
 The Relationship Between Medical Providers and the Patient ... 9
  The Physician-Patient Relationship ................................. 9
  Patient’s Relation with the Medical Team ........................ 10
  Patient’s Commitment to a Physician ............................. 11
  Patient’s Satisfaction with Physician ............................ 11
 Privacy and Confidentiality ............................................ 12
  Privacy ................................................................. 12
  Confidentiality ..................................................... 12
 Cultural Competence: Fundamental Requirements ............... 12

Chapter 2  Cultural Competence in Healthcare Specialties ........... 15
 Care by Physicians .......................................................... 15
 Care by Nurses .............................................................. 18
 General Issues ............................................................... 18
Special Issues Relating to Nursing Care ................. 19
Care by Social Workers ........................................... 20
Common Issues ....................................................... 20
Special Functions and Services .............................. 21
Care by Physical Therapists ................................. 21
The Concept of Physical Therapy ......................... 21
Cultural Aspects of Physical Contact ..................... 22
Dietary ............................................................... 22
Cultural Aspects of Food ........................................ 22

Chapter 3  Culture and Clinical Assessment ................ 27
Presentation of Problems ........................................ 27
Understanding Patient’s Medical Knowledge ............ 28
History Taking ....................................................... 29
Doctor-Patient Relationship .................................. 30
The Use of Interpreters .......................................... 31
Subjects Likely to be Culturally Influenced ............ 32
Care of Children ................................................... 32
Pregnancy, Childbirth, and Postpartum Care .......... 33
Breast Cancer ......................................................... 33
Sexual Orientation and Behavior .......................... 34
Menstruation and Menopause .............................. 34
Death ................................................................. 34
The Physical Examination .................................... 35
Diagnostic Tests .................................................. 37

Chapter 4  Healthcare for People of Different Ethnicities .. 41
African-Americans ................................................. 41
Overview ............................................................ 41
Biological Variations ............................................. 42
Medical Disorders ................................................ 42
Health Beliefs and Practice .................................. 43
Some Issues Relating to Clinical Care .................... 43
Native American Groups ...................................... 44
Overview ............................................................ 44
Common Concepts and Beliefs Relating to Health and Illness ........................................ 45
Common Medical Disorders ................................ 45
Issues Related to Healthcare ............................... 45
Muslims and Arab Americans ................................ 47
Overview ............................................................ 47
Common Concepts, Beliefs, and Attitudes Relating to Health ........................................ 47
**Contents**

- Cultural Considerations Relating to Some Medical Practices .................................. 48
  - Asian-American Groups .................................................. 49
    - Overview ................................................................. 49
  - Common Concepts and Beliefs Relating to Health .............................................. 50
  - Medical Disorders More Common in Asians ...................................................... 51
  - Cultural Considerations in Certain Medical Issues ........................................... 51
- Caucasian-American Groups ................................................................. 52
  - Overview ................................................................. 52
  - Irish-Americans .......................................................... 53
  - Italian Americans ......................................................... 54
  - Jewish-Americans .......................................................... 55
  - The Amish ................................................................. 56
- Hispanic-American Groups ................................................................. 58
  - Overview ................................................................. 58
  - Common Concepts and Beliefs Relating to Health .............................................. 58
  - Medical Disorders Common in Hispanics ...................................................... 59
  - Healthcare Issues .......................................................... 59

**Chapter 5  Culture and Medical Diseases** ................................................. 63

- Culture-Related Perceptions of Certain Medical Diseases ........................................ 63
  - Venereal Diseases, Including AIDS ......................................................... 63
  - Cancer ................................................................. 64
  - Leprosy ................................................................. 65
  - Pulmonary Tuberculosis ................................................................. 65
  - Epilepsy ................................................................. 66
  - Malaria ................................................................. 67
  - Dementia ................................................................. 67
  - Case Vignette ............................................................... 69
- Culture and Prevalence of Certain Medical Disorders ........................................ 69
  - Coronary Heart Disease ................................................................. 70
  - Cervical Cancer ................................................................. 71
  - Obesity ................................................................. 71
  - Culture, Food Intake, and Medical Disorders .............................................. 72

**Chapter 6  Culture and Mental Disorders** ................................................. 75

- Cultural Aspects of Psychiatric Issues in the Care of Patients ................................ 75
  - Psychological Problems: Normality versus Pathology ........................................ 75
    - Professional Definition ................................................................. 76
    - Deviation from the Mean ................................................................. 77
    - Assessment of Function ................................................................. 77
    - Social Definition ................................................................. 78
  - Presentation of Problems and Clinical Assessment ........................................... 78
## Chapter 7 Culture and Medical Care
