
Contents

Preface	xi
To the Student	xxi
To the Instructor	xxvii
1 Construction of the Real Numbers	1
1.1 Introduction	1
1.2 Entry 1: Axioms for the Natural Numbers	2
1.3 Constructing the Integers	11
1.4 Entry 2: Axioms for the Integers	19
1.5 Constructing the Rational Numbers	27
1.6 Dedekind Cuts	33
1.7 Constructing the Real Numbers	41
1.8 Historical Remarks	51
2 Properties of the Real Numbers	61
2.1 Introduction	61
2.2 Entry 3: Axioms for the Real Numbers	62
2.3 Algebraic Properties of the Real Numbers	65
2.4 Finding the Natural Numbers, the Integers and the Rational Numbers in the Real Numbers	75
2.5 Induction and Recursion in Practice	83
2.6 The Least Upper Bound Property and Its Consequences	96
2.7 Uniqueness of the Real Numbers	107
2.8 Decimal Expansion of Real Numbers	113
2.9 Historical Remarks	128
3 Limits and Continuity	129
3.1 Introduction	129
3.2 Limits of Functions	129

3.3	Continuity	146
3.4	Uniform Continuity	156
3.5	Two Important Theorems	163
3.6	Historical Remarks	171
4	Differentiation	181
4.1	Introduction	181
4.2	The Derivative	181
4.3	Computing Derivatives	192
4.4	The Mean Value Theorem	198
4.5	Increasing and Decreasing Functions, Part I: Local and Global Extrema	207
4.6	Increasing and Decreasing Functions, Part II: Further Topics	215
4.7	Historical Remarks	225
5	Integration	231
5.1	Introduction	231
5.2	The Riemann Integral	231
5.3	Elementary Properties of the Riemann Integral	242
5.4	Upper Sums and Lower Sums	247
5.5	Further Properties of the Riemann Integral	258
5.6	Fundamental Theorem of Calculus	267
5.7	Computing Antiderivatives	277
5.8	Lebesgue's Theorem	283
5.9	Area and Arc Length	293
5.10	Historical Remarks	312
6	Limits to Infinity	321
6.1	Introduction	321
6.2	Limits to Infinity	322
6.3	Computing Limits to Infinity	331
6.4	Improper Integrals	341
6.5	Historical Remarks	354
7	Transcendental Functions	357
7.1	Introduction	357
7.2	Logarithmic and Exponential Functions	358
7.3	Trigonometric Functions	369
7.4	More about π	379
7.5	Historical Remarks	391
8	Sequences	399
8.1	Introduction	399
8.2	Sequences	399
8.3	Three Important Theorems	412
8.4	Applications of Sequences	423

8.5	Historical Remarks	439
9	Series	443
9.1	Introduction	443
9.2	Series	443
9.3	Convergence Tests	451
9.4	Absolute Convergence and Conditional Convergence	459
9.5	Power Series as Functions	473
9.6	Historical Remarks	482
10	Sequences and Series of Functions	489
10.1	Introduction	489
10.2	Sequences of Functions	489
10.3	Series of Functions	502
10.4	Functions as Power Series	509
10.5	A Continuous but Nowhere Differentiable Function	527
10.6	Historical Remarks	534
	Bibliography	539
	Index	545

The Real Numbers and Real Analysis

Bloch, E.D.

2011, XXVIII, 554 p., Hardcover

ISBN: 978-0-387-72176-7
