Contents

**Foreword** ................................................................. v
*Teresa K. Woodruff and Karrie Ann Snyder*

**Foreword** ................................................................. vii
*Lindsay Beck and Joyce Reinecke*

**Contributors** ........................................................... xvii

**Part I Introduction**

1. **The Emergence of a New Interdiscipline: Oncofertility** ........ 3
   *Teresa K. Woodruff*
   - Oncofertility: The New Offensive in the War on Cancer ........... 3
   - Secondary Effects of Treatment on the Health and Quality
     of Life of Young Survivors of Cancer ........................... 4
   - Fertility Threats Due to Cancer Treatment ....................... 5
   - An Emerging Urgent Unmet Need for Young Cancer Patients:
     Balancing Life-Preserving but Fertility-Threatening
     Cancer Treatments ................................................ 6
   - *Information GAP* .................................................. 9
   - *Data GAP* .......................................................... 10
   - *Option GAP* ....................................................... 10
   - Conclusion .................................................................. 11

**Part II Fertility Risk and Treatment Options**

2. **Fertility Management for Women With Cancer** ............... 15
   *Sanjay K. Agarwal and R. Jeffrey Chang*
   - Ovarian Physiology .................................................. 15
   - Impact of Cancer Therapies on Ovarian Function .............. 18
   - Current Techniques of Fertility Preservation .................. 20
   - *Embryo Freezing* .................................................. 20
   - *Ovarian Tissue Freezing* ....................................... 22

Part III Oncofertility Techniques and Research

6. Bioengineering and the Ovarian Follicle .................................. 75
   Min Xu, Teresa K. Woodruff, and Lonnie D. Shea

   Follicle Growth In Vivo ....................................................... 76
   Culture Systems for Follicle Growth ...................................... 77
   Hydrogels for Three-Dimensional Culture In Vitro ..................... 78
   Ovarian Transplantation Using Biomaterials .............................. 79
   Conclusion ................................................................. 80
   References ................................................................. 80

7. The Science of Cryobiology ................................................... 83
   Steven F. Mullen and John K. Critser

   Introduction ................................................................. 83
   Anatomy of Cryopreservation .............................................. 83
   The Effects of Water Precipitation (as Ice) During Cooling ........... 84
   Ice Nucleation, Crystallization, Vitrification, and Devitrification .... 84
   Solute Concentration as a Result of Ice Crystallization, The
   Associated Osmotic Effects, and Cell Death at Supra-Optimal
   Cooling Rates ........................................................... 86
   Cell Death at Sub-Optimal Cooling Rates and the
   Role of Cryoprotectants in Mitigating Cell Damage ................. 90
   Cryoprotectants: Beneficial Effects ..................................... 91
   Cryoprotectants: Detrimental Effects .................................... 94
   Cell Death at Sub-Optimal Cooling Rates ................................ 98
   Cooling and Cooling Injury/Cold Shock ................................ 99
   Vitrification as an Alternate to Equilibrium cryopreservation ....... 102
   References ................................................................. 103
15. **Fertility Preservation and Adolescent Cancer Patients: Lessons from Adult Survivors of Childhood Cancer and Their Parents**

Methods .................................................. 203
Study Design and Sample Recruitment .................................................. 203
Data Collection and Analysis .................................................. 203
Results .................................................. 204
Sample Characteristics .................................................. 204
Content Analysis .................................................. 204
Discussion .................................................. 211
Conclusion .................................................. 215
