Foreword .......................................................... v
Teresa K. Woodruff and Karrie Ann Snyder

Foreword .......................................................... vii
Lindsay Beck and Joyce Reinecke

Contributors ..................................................... xvii

Part I Introduction

1. The Emergence of a New Interdiscipline: Oncofertility .......... 3
   Teresa K. Woodruff
   Oncofertility: The New Offensive in the War on Cancer .......... 3
   Secondary Effects of Treatment on the Health and Quality
   of Life of Young Survivors of Cancer ......................... 4
   Fertility Threats Due to Cancer Treatment .................... 5
   An Emerging Urgent Unmet Need for Young Cancer Patients:
   Balancing Life-Preserving but Fertility-Threatening
   Cancer Treatments ........................................... 6
   Information GAP .............................................. 9
   Data GAP ...................................................... 10
   Option GAP ................................................... 10
   Conclusion ................................................... 11

Part II Fertility Risk and Treatment Options

2. Fertility Management for Women With Cancer ................. 15
   Sanjay K. Agarwal and R. Jeffrey Chang
   Ovarian Physiology ........................................... 15
   Impact of Cancer Therapies on Ovarian Function ............. 18
   Current Techniques of Fertility Preservation .................. 20
   Embryo Freezing ............................................. 20
   Ovarian Tissue Freezing ..................................... 22
3. Fertility Preservation in Adult Male Cancer Patients

Robert E. Brannigan

The Impact of Cancer on Male Reproductive Health
Endocrine Effects of Tumors
Cytotoxic Autoimmune Response
Systemic Physiological Changes
Psychological Changes Associated with Cancer
The Impact of Cancer Treatment on Male Reproductive Health
Effects of Radiation Therapy
Effects of Chemotherapy
Effects of Surgery
Effects of Opioids
Fertility Preservation in Male Cancer Patients
American Society of Clinical Oncology Guidelines
Sperm Cryopreservation
Overview of Sperm Collection Techniques
Testicular Tissue Cryopreservation (ONCO-TESE)
Future Directions in Fertility Preservation in Male Cancer Patients
Conclusion
References

4. Managing Fertility in Childhood Cancer Patients

Kimberley J. Dilley

Follow-up Guidelines Related to Male Fertility
Risk Factors
Surveillance and Screening
Additional Management Issues
Follow-up Guidelines Related to Female Fertility
Risk Factors
Surveillance and Screening
Additional Management Issues
Optimal Care for Pediatric Cancer Patients
References

5. Fertility Risk in Pediatric and Adolescent Cancers

Clarisa R. Gracia and Jill P. Ginsberg

Scope of the Problem
The Importance of Fertility to Cancer Patients
8. Ovarian Tissue Cryopreservation and Transplantation: Banking Reproductive Potential for the Future

David Lee

Indications for Ovarian Tissue Banking

Scope of the Clinical Problem and Incidence of Ovarian Failure

Gonadotoxicity of Chemotherapy

Gonadotoxicity of Radiation Therapy

Limitations of Fertility: Preserving Techniques

The Promise of Ovarian Tissue Banking

Cryopreservation of Ovarian Tissue has been Successful

Autotransplantation of Ovarian Tissue has been Successful

Problems with Ovarian Transplantation: Re-Introduction of Cancer

Xenografting as a Potential Solution

Conclusion

References

9. Progress, History and Promise of Ovarian Cryopreservation and Transplantation for Pediatric Cancer Patients

Yasmin Gosienfiao

References

Part IV Health Care Decision-Making

10. Oncofertility and the Social Sciences

Karrie Ann Snyder

Studying Cancer Within the Social Sciences

Gender and Oncofertility

Gender and Patient-Physician Interactions

Gender and the Experience of Infertility

Race/Ethnicity and Oncofertility

Race/Ethnicity and Patient-Physician Interactions

Race/Ethnicity and Family and Community Involvement

The Digital Divide and Race/Ethnicity

Conclusion

References

11. Shared Decision Making: Fertility and Pediatric Cancers

Marla L. Clayman, Kathleen M. Galvin, and Paul Arntson

The Current State of Pediatric Oncofertility

Family Communication in Context

Shared Decision Making in Theory and in Practice
12. Today’s Research, Tomorrows Cures: The Ethical Implications of Oncofertility
Leilah E. Backhus and Laurie Zoloth

Expanding Options for Women – Follicle Preservation and Maturation
A Prairie Horizon: The Long View of Research on Fertility
The Role of Oncologists and Infertility Specialists
Ethical Issues in the Case of Childhood Cancers
The Special Case of Young Girls
Research in Children
Assessing the Intervention: A Community Consent Process in Action
The Ethical Implications for a New Terrain: Therapy or Enhancement?
Recalling a Complex History
Conclusion
References

13. The Psychosocial Context of Cancer-Related Infertility
Matthew J. Loscalzo and Karen L. Clark

The Social Context
Psychosocial Screening for Infertility Concerns
Biopsychosocial Screening Instrument: How Can We Help You and Your Family?
Discussion and Implications
References

14. Childhood Cancer: Fertility and Psychosocial Implications
Karen E. Kinahan, Aarati Didwania, and Carrie L. Nieman

Recent Research on Late Effects and Infertility
Addressing the Threat of Infertility
Childhood Cancer Survivors and Fertility Preservation
Male Infertility
Access to Care
Conclusion
References
15. Fertility Preservation and Adolescent Cancer Patients: Lessons from Adult Survivors of Childhood Cancer and Their Parents

Methods ........................................ 203
Study Design and Sample Recruitment ........................................ 203
Data Collection and Analysis ........................................ 203
Results ........................................ 204
Sample Characteristics ........................................ 204
Content Analysis ........................................ 204
Discussion ........................................ 211
Conclusion ........................................ 215
References ........................................ 216

Part VI Training in a New Medical Discipline and Medical Guidelines

16. Oncofertility: A New Medical Discipline and the Emerging Scholar

Laxmi A. Kondapalli

Infertility: An Unmet Clinical Need for Young Cancer Patients ........ 222
Oncofertility and the Oncofertility Scholar ................................. 226
Reproductive Endocrinology and Infertility as the Springboard to a New Oncofertility Scholar ........................................ 226
Research Directions ........................................ 229
Future Directions ........................................ 230
Conclusion ........................................ 231
References ........................................ 233

17. Oncofertility Consortium Consensus Statement: Guidelines for Ovarian Tissue Cryopreservation

Leilah E. Backhus, Laxmi A. Kondapalli, R. Jeffrey Chang, Christos Coutifaris, Ralph Kazer, and Teresa K. Woodruff

References ........................................ 239

Part VII Patient Stories and Oncofertility

18. Personal Accounts of Cancer and Infertility

Provided by Fertile Hope

A New Generation of Hope: Antoinette’s Story ............................. 243
Starting a Family One Day: Adriane’s Story ................................. 244
