# Contents

Foreword  ......................................................... v  
*Teresa K. Woodruff and Karrie Ann Snyder*  

Foreword  ......................................................... vii  
*Lindsay Beck and Joyce Reinecke*  

Contributors  ................................................... xvii  

## Part I Introduction  

1. **The Emergence of a New Interdiscipline: Oncofertility**  
   *Teresa K. Woodruff*  
   
   - Oncofertility: The New Offensive in the War on Cancer  
   - Secondary Effects of Treatment on the Health and Quality of Life of Young Survivors of Cancer  
   - Fertility Threats Due to Cancer Treatment  
   - An Emerging Urgent Unmet Need for Young Cancer Patients: Balancing Life-Preserving but Fertility-Threatening Cancer Treatments  
   - Information GAP  
   - Data GAP  
   - Option GAP  
   - Conclusion  

## Part II Fertility Risk and Treatment Options  

2. **Fertility Management for Women With Cancer**  
   *Sanjay K. Agarwal and R. Jeffrey Chang*  
   
   - Ovarian Physiology  
   - Impact of Cancer Therapies on Ovarian Function  
   - Current Techniques of Fertility Preservation  
   - Embryo Freezing  
   - Ovarian Tissue Freezing  
3. Fertility Preservation in Adult Male Cancer Patients

Robert E. Brannigan

The Impact of Cancer on Male Reproductive Health

Endocrine Effects of Tumors

Cytotoxic Autoimmune Response

Systemic Physiological Changes

Psychological Changes Associated with Cancer

The Impact of Cancer Treatment on Male Reproductive Health

Effects of Radiation Therapy

Effects of Chemotherapy

Effects of Surgery

Effects of Opioids

Fertility Preservation in Male Cancer Patients

American Society of Clinical Oncology Guidelines

Sperm Cryopreservation

Overview of Sperm Collection Techniques

Testicular Tissue Cryopreservation (ONCO-TESE)

Future Directions in Fertility Preservation in Male Cancer Patients

Conclusion

References

4. Managing Fertility in Childhood Cancer Patients

Kimberley J. Dilley

Follow-up Guidelines Related to Male Fertility

Risk Factors

Surveillance and Screening

Additional Management Issues

Follow-up Guidelines Related to Female Fertility

Risk Factors

Surveillance and Screening

Additional Management Issues

Optimal Care for Pediatric Cancer Patients

References

5. Fertility Risk in Pediatric and Adolescent Cancers

Clarisa R. Gracia and Jill P. Ginsberg

Scope of the Problem

The Importance of Fertility to Cancer Patients
Contents

Common Cancers in Children and their Treatment ........................................ 58
Fertility Risks for Young Females .............................................................. 58
Gonadotoxicity of Cancer Treatments ......................................................... 58
Chemotherapy ............................................................................................. 59
Radiation ..................................................................................................... 59
Effects on the Hypothalamic-Pituitary-Ovarian Axis .................................... 61
Pregnancy Outcomes in Cancer Survivors .................................................... 63
Options for Preserving Fertility in Girls and Young Women ......................... 63
Fertility Risks for Young Men ....................................................................... 64
Chemotherapy ............................................................................................. 65
Radiotherapy ............................................................................................... 65
Options for Preserving Fertility in Boys and Young Men .............................. 66
Ethical Issues in Pediatric Patients .............................................................. 67
Conclusion .................................................................................................. 67
References .................................................................................................... 68

Part III Oncofertility Techniques and Research

6. Bioengineering and the Ovarian Follicle .................................................. 75
   Min Xu, Teresa K. Woodruff, and Lonnie D. Shea
   Follicle Growth In Vivo ............................................................................. 76
   Culture Systems for Follicle Growth ......................................................... 77
   Hydrogels for Three-Dimensional Culture In Vitro ................................... 78
   Ovarian Transplantation Using Biomaterials .............................................. 79
   Conclusion ................................................................................................ 80
   References ................................................................................................ 80

7. The Science of Cryobiology ..................................................................... 83
   Steven F. Mullen and John K. Critser
   Introduction ............................................................................................... 83
   Anatomy of Cryopreservation .................................................................. 83
   The Effects of Water Precipitation (as Ice) During Cooling ....................... 84
   Ice Nucleation, Crystallization, Vitrification, and Devitrification ............... 84
   Solute Concentration as a Result of Ice Crystallization, The
   Associated Osmotic Effects, and Cell Death at Supra-Optimal
   Cooling Rates .......................................................................................... 86
   Cell Death at Sub-Optimal Cooling Rates and the
   Role of Cryoprotectants in Mitigating Cell Damage ................................. 90
   Cryoprotectants: Beneficial Effects .......................................................... 91
   Cryoprotectants: Detrimental Effects ....................................................... 94
   Cell Death at Sub-Optimal Cooling Rates ............................................... 98
   Cooling and Cooling Injury/Cold Shock .................................................. 99
   Vitrification as an Alternate to Equilibrium cryopreservation ................. 102
   References ............................................................................................... 103
8. Ovarian Tissue Cryopreservation and Transplantation: Banking Reproductive Potential for the Future .................. 110
   David Lee

   Indications for Ovarian Tissue Banking ......................... 110
   Scope of the Clinical Problem and Incidence of Ovarian Failure ........ 110
   Gonadotoxicity of Chemotherapy ............................... 111
   Gonadotoxicity of Radiation Therapy .......................... 112
   Limitations of Fertility: Preserving Techniques ................ 113
   The Promise of Ovarian Tissue Banking ....................... 115
   Cryopreservation of Ovarian Tissue has been Successful .......... 116
   Autotransplantation of Ovarian Tissue has been Successful ...... 117
   Problems with Ovarian Transplantation: Re-Introduction of Cancer .... 123
   Xenografting as a Potential Solution .......................... 124
   Conclusion ..................................................... 126
   References ..................................................... 126

9. Progress, History and Promise of Ovarian Cryopreservation and Transplantation for Pediatric Cancer Patients .......... 130
   Yasmin Gosiengfiao

   References ..................................................... 132

Part IV Health Care Decision-Making

10. Oncofertility and the Social Sciences ......................... 137
    Karrie Ann Snyder

    Studying Cancer Within the Social Sciences ................... 138
    Gender and Oncofertility .................................... 139
    Gender and Patient-Physician Interactions .................... 140
    Gender and the Experience of Infertility ..................... 141
    Race/Ethnicity and Oncofertility ............................. 142
    Race/Ethnicity and Patient–Physician Interactions ............ 143
    Race/Ethnicity and Family and Community Involvement ........ 144
    The Digital Divide and Race/Ethnicity ......................... 145
    Conclusion ..................................................... 146
    References ..................................................... 147

11. Shared Decision Making: Fertility and Pediatric Cancers ........ 149
    Marla L. Clayman, Kathleen M. Galvin, and Paul Arntson

    The Current State of Pediatric Oncofertility .................. 150
    Family Communication in Context ............................. 151
    Shared Decision Making in Theory and in Practice ............ 152
15. **Fertility Preservation and Adolescent Cancer Patients: Lessons from Adult Survivors of Childhood Cancer and Their Parents**

*Carrie L. Nieman, Karen E. Kinahan, Susan E. Yount, Sarah K. Rosenbloom, Kathleen J. Yost, Elizabeth A. Hahn, Timothy Volpe, Kimberley J. Dilley, Laurie Zoloth, and Teresa K. Woodruff*

Methods .................................................. 203
Study Design and Sample Recruitment .................................. 203
Data Collection and Analysis ........................................ 203
Results ...................................................... 204
Sample Characteristics ........................................... 204
Content Analysis .............................................. 204
Discussion .................................................. 211
Conclusion .................................................. 215
References .................................................. 216

Part VI  Training in a New Medical Discipline and Medical Guidelines

16. **Oncofertility: A New Medical Discipline and the Emerging Scholar**

*Laxmi A. Kondapalli*

Infertility: An Unmet Clinical Need for Young Cancer Patients .... 222
Oncofertility and the Oncofertility Scholar .......................... 226
Reproductive Endocrinology and Infertility as the Springboard to a New Oncofertility Scholar ........................................... 226
Research Directions ........................................... 229
Future Directions ............................................. 230
Conclusion .................................................. 231
References .................................................. 233

17. **Oncofertility Consortium Consensus Statement: Guidelines for Ovarian Tissue Cryopreservation**

*Leilah E. Backhus, Laxmi A. Kondapalli, R. Jeffrey Chang, Christos Coutifaris, Ralph Kazer, and Teresa K. Woodruff*

References .................................................. 239

Part VII  Patient Stories and Oncofertility

18. **Personal Accounts of Cancer and Infertility**

*Provided by Fertile Hope*

A New Generation of Hope: Antoinette’s Story ........................ 243
Starting a Family One Day: Adriane’s Story ......................... 244
## Contents

An Improvised Script: Beverley’s Story .......................... 245  
Life is Worth Living: Brian’s Story .............................. 246  
Young and Hopeful for the Future: Dorothy’s Story .............. 246  
Hope, from Texas to Panama: Elia’s Story ......................... 247  

**Appendix A: Oncofertility Options** ............................ 249  
*Provided by Fertile Hope*

**Index**  ................................................................. 257
Oncofertility
Fertility Preservation for Cancer Survivors
Woodruff, T.; Snyder, K.A. (Eds.)
2007, XVIII, 263 p., Hardcover
ISBN: 978-0-387-72292-4
