Preface to the First Edition .................................................... ix  
Contributors ........................................................................... xiii  

## Part I  Introduction to Clinical Geriatrics

1  The Practice of Geriatric Anesthesia ................................. 3  
   Jeffrey H. Silverstein  

2  Demographics and Economics of Geriatric Patient Care ............ 15  
   Maria F. Galati and Roger D. London  

3  Theories of Aging ................................................................. 29  
   Stanley Muravchick  

4  Ethical Management of the Elderly Patient ............................ 38  
   Paul J. Hoehner  

5  Teaching Geriatric Anesthesiology to Practitioners, Residents,  
   and Medical Students .......................................................... 58  
   Sheila J. Ellis  

6  Research Priorities in Geriatric Anesthesiology ...................... 66  
   Christopher J. Jankowski and David J. Cook  

## Part II  Cardinal Manifestations of Aging and Disease in the Elderly

7  Alterations in Metabolic Functions and Electrolytes .......... 97  
   Michael C. Lewis  

8  Perioperative Thermoregulation ........................................ 107  
   Daniel I. Sessler  

9  Postoperative Central Nervous System Dysfunction ............... 123  
   Deborah J. Culley, Terri G. Monk, and Gregory Crosby  

10 Alterations in Circulatory Function .................................... 137  
    Thomas J. Ebert and G. Alec Rooke  

11 The Aging Respiratory System: Anesthetic Strategies to  
    Minimize Perioperative Pulmonary Complications ................. 149  
    Rodrigo Cartin-Ceba, Juraj Sprung, Ognjen Gajic, and  
    David O. Warner
Operative Debridements of Chronic Wounds

Andrew M. Hanflik, Michael S. Golinko, Melissa Doft, Charles Cain, Anna Flattau, and Harold Brem

Part III Anesthetic Management of the Aged Surgical Candidate

13 Preoperative Risk Stratification and Methods to Reduce Risk

Linda L. Liu and Jacqueline M. Leung

14 Anesthetic Implications of Chronic Medications

Tamas A. Szabo and R. David Warters

15 The Pharmacology of Opioids

Steven L. Shafer and Pamela Flood

16 Intravenous Hypnotic Anesthetics

Matthew D. McEvoy and J.G. Reves

17 Inhalational Anesthetics

Gary R. Haynes

18 Relaxants and Their Reversal Agents

Cynthia A. Lien and Takahiro Suzuki

19 Management of Regional Anesthesia

Bernadette Veering

20 Fluid Management

Jessica Miller, Lee A. Fleisher, and Jeffrey L. Carson

21 Pain Management

Jack M. Berger

22 Anesthesia Considerations for Geriatric Outpatients

Kathryn E. McGoldrick

Part IV Anesthesia for Common Surgical Procedures in the Aged

23 Sedation and Monitoring

Sheila R. Barnett

24 Total Hip Replacement, Joint Replacement, and Hip Fracture

Idit Matot and Shaul Beyth

25 Transurethral Prostatectomy Syndrome and Other Complications of Urologic Procedures

Daniel M. Gainsburg

26 Thoracic Procedures

Steven M. Neustein and James B. Eisenkraft

27 Cardiac Procedures

James H. Abernathy III

28 Vascular Procedures

Leanne Groban and Sylvia Y. Dolinski

29 Abdominal Procedures

Jeffrey H. Silverstein

Index
Geriatric Anesthesiology
Silverstein, J.; Rooke, A.; Reves, J.G.; McLeskey, C.H.
(Eds.)
2008, XVI, 440 p. 141 illus., Hardcover
