Contents

Part I Collection of influential papers

1 A New Model of Personal Income Distribution: Specification and Estimation .......................... 3
   Camilo Dagum
2 A Function for Size Distribution of Incomes .................................................. 27
   S. K. Singh and G. S. Maddala
3 Some Generalized Functions for the Size Distribution of Income .................................... 37
   James B. McDonald
4 Efficient Estimation of the Lorenz Curve and Associated Inequality Measures from Grouped Observations .................................................. 57
   N. C. Kakwani and N. Podder
5 Distribution and Mobility of Wealth of Nations .................................................. 71
   Richard Paap and Herman K. van Dijk

Part II Survey papers on Lorenz functions and the generalizations and extensions of income distributions

6 A Guide to the Dagum Distributions ........................................................................ 97
   Christian Kleiber
7 Pareto and Generalized Pareto Distributions ........................................................ 119
   Barry C. Arnold
8 The Generalized Beta Distribution as a Model for the Distribution of Income: Estimation of Related Measures of Inequality .................................................. 147
   James B. McDonald and Michael Ransom
9 Parametric Lorenz Curves: Models and Applications ............................................ 167
   José María Sarabia
Part III Current research

10 Maximum Entropy Estimation of Income Distributions from Bonferroni Indices
Hang Keun Ryu

11 New Four- and Five-Parameter Models for Income Distributions
William J. Reed and Fan Wu

12 Fuzzy Monetary Poverty Measures under a Dagum Income Distributive Hypothesis
Gianni Betti, Antonella D’Agostino and Achille Lemmi

13 Modelling Lorenz Curves: Robust and Semi-parametric Issues
Frank A. Cowell and Maria-Pia Victoria-Feser

14 Modelling Inequality with a Single Parameter
J. M. Henle, N. J. Horton, and S. J. Jakus

15 Lorenz Curves and Generalised Entropy Inequality Measures
Nicholas Rohde

16 Estimating Income Distributions Using a Mixture of Gamma Densities
Duangkamon Chotikapanich and William E Griffiths

17 Inequality in Multidimensional Indicators of Well-Being: Methodology and Application to the Human Development Index
Quentin Wodon and Shlomo Yitzhaki

Index
Modeling Income Distributions and Lorenz Curves
Chotikapanich, D. (Ed.)
2008, XIV, 322 p., Hardcover
