Preface to the Second Edition	vii
Preface to the First Edition	ix
<b>1 Introduction</b>	<b>1</b>
1.1 The Analysis of Categorical Data	1
1.2 Forms of Multivariate Analysis	2
1.3 Some Historical Background	4
1.4 A Medical Example	6
<b>2 Two-Dimensional Tables</b>	<b>8</b>
2.1 Two Binomials	8
2.2 The Model of Independence	10
2.3 The Loglinear Model	13
2.4 Sampling Models	15
2.5 The Cross-Product Ratio and $2 \times 2$ Tables	16
2.6 Interrelated Two-Dimensional Tables	20
2.7 Correction for Continuity	21
2.8 Other Scales for Analyzing Two-Dimensional Tables	22
Problems	23
<b>3 Three-Dimensional Tables</b>	<b>27</b>
3.1 The General Loglinear Model	27
3.2 Sampling Models	29
3.3 Estimated Expected Values	32
3.4 Iterative Computation of Expected Values	37
3.5 Goodness-of-Fit Statistics	40
3.6 Hierarchical Models	43
3.7 A Further Example	44
3.8 Collapsing Tables	48
Problems	51
<b>4 Selection of a Model</b>	<b>56</b>
4.1 General Issues	56
4.2 Conditional Test Statistics	56
4.3 Partitioning Chi-Square	57
4.4 Using Information about Ordered Categories	61
Problems	68

<b>5</b>	<b>Four- and Higher-Dimensional Contingency Tables</b>	71
5.1	The Loglinear Models and MLEs for Expected Values	71
5.2	Using Partitioning to Select a Model	74
5.3	Stepwise Selection Procedures	77
5.4	Looking at All Possible Effects	80
	Problems	88
<b>6</b>	<b>Fixed Margins and Logit Models</b>	95
6.1	A Three-Dimensional Example	95
6.2	Logit Models	97
6.3	Logit Models and Ordered Categories	99
6.4	Linear Logistic Response Models	102
6.5	Logistic Regression vs. Discriminant Analysis	105
6.6	Polytomous and Multivariate Response Variables	110
	Problems	116
<b>7</b>	<b>Causal Analysis Involving Logit and Loglinear Models</b>	120
7.1	Path Diagrams	120
7.2	Recursive Systems of Logit Models	123
7.3	Recursive Systems: A More Complex Example	129
7.4	Nonrecursive Systems of Logit Models	133
7.5	Retrospective Epidemiological Studies	135
7.6	Logistic Models for Retrospective Data	137
	Problems	138
<b>8</b>	<b>Fixed and Random Zeros</b>	140
8.1	Sampling Zeros and MLEs in Loglinear Models	140
8.2	Incomplete Two-Dimensional Contingency Tables	142
8.3	Incompleteness in Several Dimensions	146
8.4	Some Applications of Incomplete Table Methodology	150
	Problems	159
Appendix I	Statistical Terminology	165
Appendix II	Basic Estimation Results for Loglinear Models	167
Appendix III	Percentage Points of $\chi^2$ Distribution	171
Appendix IV	Small-Sample Properties of $\chi^2$ Statistics	172

Contents	xiii
References	177
Author Index	191
Subject Index	195
