Contents

1 Introduction ................................................... 1
   Aims of the Book .................................................. 1
   Introduction to Renal Disease from a Pathologist’s Point of View .............. 2
   The Value of a Renal Biopsy ........................................... 3
   Summary: Introduction .................................................. 3
   Further Reading: Introduction ........................................ 3

2 General Points About Renal Biopsy Specimens ................... 5
   Introduction to General Points ........................................ 5
   Common Things Are Common and Diseases Present in Characteristic Ways .................. 5
   Things to Remember About the General Rules ........................................ 5
   Importance of the Request Form to the Pathologist ................................. 6
   Indications for Renal Biopsy .............................................. 6
   Complications of a Renal Biopsy ........................................... 9
   Summary: General Points About Renal Biopsy Specimens ............................. 9

3 Technical Handling of Renal Biopsy Specimens ................. 11
   Types of Renal Biopsy Specimen ......................................... 11
   Fixation and Processing of Specimens ..................................... 11
   Arrangements for Electron Microscopy of Specimens ............................. 14
   Sectioning of Specimens ................................................ 15
   Staining of Specimens .................................................. 16
   Immunohistologic Study of Specimens ..................................... 17
   Summary: Technical Handling of Renal Biopsy Specimens ...................... 18
   Further Reading: Technical Handling of Renal Biopsy Specimens ............. 18

4 How to Look at a Renal Biopsy Specimen: Preliminary Study .... 19
   Immediate Study of Initial Sections ....................................... 19
   Actions After Immediate Study of Initial Sections .................................. 28
   Summary: How to Look at a Renal Biopsy Specimen: Preliminary Study ............ 29
5 How to Look at a Renal Biopsy Specimen: Initial Study of the Kidney .................................................. 31
  Introduction to Initial Study of the Kidney ........................................ 31
  Initial Study of Tubules .................................................................. 31
  Assessment of Atrophy .................................................................. 32
  A Note on Hypertension and the Kidney .......................................... 35
  Initial Study of Glomeruli: Glomerular Size .................................... 38
  Initial Study of Glomeruli: Distribution of Glomerular Abnormalities ............................................................................. 40
  Initial Study of Interstitial Tissues .................................................. 44
  Initial Study of Blood Vessels ......................................................... 45
  Summary: How to Look at a Renal Biopsy Specimen: Initial Study of the Kidney ......................................................... 47
  Further Reading: How to Look at a Renal Biopsy Specimen: Initial Study of the Kidney ......................................................... 48

6 Indication for Biopsy: Nephrotic Syndrome .................................. 49
  Introduction to the Nephrotic Syndrome ......................................... 49
  Detection and Measurement of Proteinuria ...................................... 50
  Value of a Renal Biopsy in the Nephrotic Syndrome ....................... 50
  Approach to the Diagnosis in the Nephrotic Syndrome .................. 51
    Initial Inspection of a Renal Biopsy Specimen in the Nephrotic Syndrome .................................................. 52
    Do Glomeruli Look Normal? Is the Diagnosis Minimal Change Nephropathy? .................................................. 55
    Diagnosis of Minimal Change Nephropathy .................................. 55
    Differential Diagnosis of Minimal Change Nephropathy ................. 56
    Are Glomeruli Abnormal? Is There Membranous Nephropathy? .... 57
    Diagnosis of Membranous Nephropathy ....................................... 59
    Differential Diagnosis of Membranous Nephropathy ..................... 63
    Are Glomeruli Abnormal? Is There a Segmental Sclerosing Disorder? ............................................................. 65
    Segmental Abnormalities at the Tubular Opening ......................... 67
    Segmental Abnormalities Not Only at the Tubular Opening ............ 74
    Human Immunodeficiency Viral Infection and its Effects in the Kidney ................................................................. 77
    Diagnosis of Collapsing Glomerulopathy ..................................... 78
    Other Findings in the Kidney in Human Immunodeficiency Viral Infection ............................................................... 80
    Is the Pathologist Told that the Person Biopsied Has Diabetes Mellitus? Is There Evidence of Diabetic Glomerulopathy? ........ 82
    Value of Renal Biopsy in Diabetes Mellitus .................................. 83
    Diagnosis of Diabetic Glomerulopathy ......................................... 84
    Differential Diagnosis of Diabetic Glomerulopathy ....................... 88

7 Indication for Biopsy: Acute Renal Failure

Introduction to Acute Renal Failure                                                                 | 139  |
Causes of Acute Renal Failure                                                                        | 141  |
Value of a Renal Biopsy in Acute Renal Failure                                                        | 141  |
Acute Abnormalities in Tubules                                                                         | 142  |
Approach to the Diagnosis in Acute Renal Failure                                                       | 145  |
Is There Necrosis in the Kidney?                                                                     | 145  |
Is There the Expected Number of Tubules in the Kidney?                                                | 147  |
Are There Clues to the Cause of Acute Tubular Damage?                                                | 148  |
Common Findings in Renal Biopsy Specimens in Acute Renal Failure                                      | 148  |
Is There Evidence of Renal Vasculitis?                                                                | 150  |
Diagnosis of Vasculitic Glomerulonephritis                                                             | 151  |
Clinical Conditions with Renal Vasculitis                                                             | 158  |
If There is Renal Vasculitis, Are There Clues to Recognisable Conditions?                             | 164  |
Conditions That Can be Differentiated from Pauci Immune Vasculitic Glomerulonephritis: 1 Henoch–Schönlein Nephritis | 165  |
Conditions That Can be Differentiated from Pauci Immune Vasculitic Glomerulonephritis: 2 Lupus Nephritis | 170  |
Conditions That Can be Differentiated from Pauci Immune Vasculitic Glomerulonephritis: 3 Goodpasture’s Disease | 170  |
Conditions That Can be Differentiated from Pauci Immune Vasculitic

- Glomerulonephritis: 4 Cryoglobulinemic Glomerulonephritis .......................... 172

Are Glomeruli Abnormal but There Is No Evidence of Vasculitis? .................. 175

Diagnosis of Acute Postinfective Glomerulonephritis ................................. 175

Diagnosis of Subendothelial Membranoproliferative Glomerulonephritis ................. 176

Impression of Glomerulonephritis Given by Ischemic Glomeruli ....................... 177

Has a Glomerular Disorder Been Excluded in Acute Renal Failure? .................. 177

Has a Glomerular Disorder Been Excluded? Is There a Clue in Interstitial Tissues to the Cause of Acute Renal Failure? .................. 177

Diagnosis of Acute Interstitial Nephritis ..................................................... 178

Causes and Associations of Acute Interstitial Nephritis ................................ 181

Has a Glomerular Disorder Been Excluded? Is There a Clue in Tubules to the Cause of Acute Renal Failure? .................. 183

Findings in Tubules: Myeloma Kidney ............................................................. 184

Findings in Tubules: Myoglobinuria or Crystals ............................................. 186

Has a Glomerular Disorder Been Excluded? Is There a Clue in Blood Vessels to the Cause of Acute Renal Failure? .................. 188

Changes in Blood Vessels: Vasculitis or Embolism ....................................... 189

Acute Renal Ischemia ...................................................................................... 190

Diagnosis of Small Vessel Vasculopathy, also Called Thrombotic Microangiopathy ................................................................................................................. 192

Disorders Associated with Small Vessel Vasculopathy .................................... 194

Summary: Acute Renal Failure ......................................................................... 200

Further Reading: Acute Renal Failure ......................................................... 201

8 Indication for Biopsy: Chronic Renal Failure .............................................. 203

Introduction to Chronic Renal Failure ............................................................ 203

Assessment of Chronic Renal Failure ............................................................. 204

Stages of Chronic Kidney Disease .................................................................. 204

Causes of Chronic Renal Failure ..................................................................... 205

Value of a Renal Biopsy in Chronic Renal Failure ......................................... 206

Findings in Renal Biopsy Specimens in Chronic Renal Failure ..................... 206

Assessment of Renal Biopsy Specimens in Chronic Renal Failure ................ 206

Is There a Glomerular Disorder? ..................................................................... 207

Differentiation of Types of Segmental Sclerosing Glomerular Disorders ................. 209

Differential Diagnosis of Overload Changes in Glomeruli ............................ 214

Is There Evidence of a Glomerular Disorder Other than IgA Nephropathy, Diabetic Glomerulopathy, or a Segmental Sclerosing Condition? ................................................................. 215

Is There No Evidence of a Glomerular Disorder? ........................................ 215
| Contents |
|------------------|------------------|
| Is There Evidence of Chronic Ischemic Damage? | 217 |
| Is There Evidence of a Disorder of Urinary Drainage? | 219 |
| Is There Evidence of a Medullary Disorder? | 220 |
| Is There Evidence of a Cystic Disorder in the Cortex? | 223 |
| Is There Evidence of a Tubular Disorder? | 225 |
| Is There Evidence of an Interstitial Nephritis? | 229 |
| Summary: Chronic Renal Failure | 231 |
| Further Reading: Chronic Renal Failure | 232 |

### 9 Indication for Biopsy: Hematuria
- Introduction to Hematuria | 233
- Detection of Hematuria | 233
- Investigation of Hematuria | 234
- Value of a Renal Biopsy in Hematuria | 234
- Common Findings in Hematuria | 235
- Approach to the Study of Renal Biopsy Specimens in Hematuria | 235
- Initial Assessment of Orthodox Light Microscopic Sections | 236
- Assessment of Immunohistologic Sections: Is There IgA Nephropathy? | 237
- Diagnosis of IgA Nephropathy | 237
- Henoch-Schönlein Nephritis | 240
- If IgA Nephropathy Has Been Excluded, Is There an Abnormality on Electron Microscopy? | 244
- Diagnosis of Thin Glomerular Basement Membrane Disease | 245
- Diagnosis of Hereditary Nephropathy of Alport Type | 246
- Other Findings in Hematuria | 248
- Summary: Hematuria | 250
- Further Reading: Hematuria | 251

### 10 Indication for Biopsy: Proteinuria
- Introduction to Proteinuria | 253
- Types of Proteinuria | 253
- Value of a Renal Biopsy in Proteinuria | 254
- Findings in Proteinuria | 254
- Approach to Study of Renal Biopsy Specimens in Proteinuria | 255
- Is There a Segmental Glomerular Disorder? | 256
- Does the Request Form Give Information About a Systemic Disorder? | 257
- Does the Specimen Appear Normal or Nearly Normal on Light Microscopy? | 258
- The Unsatisfactory Nature of the Terms Mesangial Proliferative Glomerulonephritis and Focal or Segmental Proliferative Glomerulonephritis | 259
- Summary: Proteinuria | 261
- Further Reading: Proteinuria | 261
11 Indication for Biopsy: Renal Allograft

Introduction to Renal Allograft Biopsy Specimens
Reasons for Biopsy of an Allograft Other than Dysfunction
Value of Biopsy of a Renal Allograft
Technical Handling of Renal Allograft Biopsy Specimens
Approach to the Diagnosis in Renal Allograft Biopsy Specimens

Is There Evidence of Acute Rejection?
Antibody-mediated Rejection
Conventional Acute Rejection

Diagnosis of Acute Cellular Rejection, also Called Acute Tubulo-interstitial Rejection
Diagnosis of Significant Acute Cellular Rejection
Diagnosis of Acute Vascular Rejection
Summary of Acute Rejection

Is There Any Other Acute Abnormality Instead of Acute Rejection, or in Addition to It?

Is There Evidence of Chronic Rejection?
Differential Diagnosis of Late Damage in a Renal Allograft

Is There a Glomerular Disorder?
Is There Evidence of a Neoplastic Disorder, or Any Other Disorder?

Summary: Renal Allografts
Further Reading: Renal Allografts

12 Other Indications for Biopsy of Kidneys

Introduction
Investigation of the Kidney in Systemic Disease
Investigation of Metabolic or Other Familial Disorders, and Disorders of Tubular Function
Assessment of Effects of Treatment on the Kidney
Investigation of a Renal Mass
Chance Finding of a Neoplasm in a Renal Biopsy Specimen

Summary: Other Indications for Biopsy of Kidneys
Further Reading: Other Indications for Biopsy of Kidneys
