Preface

Interagency ISOC-HAB Symposium Introduction

This symposium was held to assess the state-of-the-science and identify research needed to address the increasing risks posed by freshwater harmful algal blooms to human health and ecosystem sustainability. Information obtained through the symposium will help form the scientific basis for developing and implementing strategies to reduce these risks.

All chapters in this book are based on platform sessions or draft workgroup reports that were presented at ISOC-HAB. All chapters were completed after the conclusion of ISOC-HAB. Each chapter was critically reviewed by at least two peers with expertise in the subject matter, revised based on those reviews, and reviewed by the editor before being accepted for publication.

Grateful acknowledgment is given to the National Science and Technology Council’s Committee on the Environment and Natural Resources in the Executive Office of the President for providing guidance, to the sponsoring agencies, to the agency representatives named below who organized the symposium, to the international scientific community members who participated in the symposium, and to EC/R of Durham, NC, the contracting organization that provided logistical support for the symposium and this monograph.
Interagency ISOC-HAB Organizing Committee

H. Kenneth Hudnell, Lead Organizer & Symposium Director
U.S. Environmental Protection Agency
Office of Research and Development
National Health and Environmental Effects Research Laboratory
Research Triangle Park, NC 27711
Neurotoxicologist, 1984–2007

Agency Disclaimers

EPA
This symposium was funded in part by the U.S. Environmental Protection Agency. This document has been reviewed in accordance with the U.S. Environmental Protection Agency policy and approved for publication. Approval does not signify that the contents reflect the views of the Agency, nor does mention of trade names or commercial products constitute endorsement or recommendation for use.

USACE
This work was supported, in part, by the Aquatic Nuisance Species Research Program at the U.S. Army Engineer Research and Development Center (Dr. Al Cofrancesco, Technical Director). Permission has been granted by the Chief of Engineers to publish this material.

CDC
The findings and conclusions in this report are those of the author(s) and do not necessarily represent the views of the Centers for Disease Control and Prevention/the Agency for Toxic Substances and Disease Registry.

NIH/NIEHS
This research was supported in part by the Intramural Research Program of the NIH, National Institute of Environmental Health Sciences. The content of this paper reflects the opinions and views of the authors and does not represent the official views or policies of NIEHS, NIH, or NTP.
