Contents

1 Introduction ................................................................. 1
   Alex R. Piquero and David Weisburd

Part I-A Descriptive Approaches for Research and Policy: Innovative Descriptive Methods for Crime and Justice Problems

2 Crime Mapping: Spatial and Temporal Challenges ......................... 5
   Jerry Ratcliffe

3 Look Before You Analyze: Visualizing Data in Criminal Justice ............ 25
   Michael D. Maltz

4 Group-Based Trajectory Modeling: An Overview .................................. 53
   Daniel S. Nagin

5 General Growth Mixture Analysis with Antecedents and Consequences of Change ......................................................... 69
   Hanno Petras and Katherine Masyn

6 Spatial Regression Models in Criminology: Modeling Social Processes in the Spatial Weights Matrix ............................................. 101
   George E. Tita and Steven M. Radil

7 Mixed Method Research in Criminology: Why Not Go Both Ways? ............ 123
   Shadd Maruna

8 Estimating Costs of Crime ...................................................... 143
   Mark A. Cohen and Roger Bowles
9 Estimating Treatment Effects: Matching Quantification to the Question ................................................................. 163
   Thomas A. Loughran and Edward P. Mulvey

10 Meta-analysis .............................................................................................................................................. 181
   David B. Wilson

11 Social Network Analysis ................................................................. 209
   Jean Marie McGloin and David S. Kirk

12 Systematic Social Observation in Criminology ................................................................. 225
   Stephen D. Mastrofski, Roger B. Parks, and John D. McCluskey

Part II New Directions in Assessing Design, Measurement and Data Quality

13 Identifying and Addressing Response Errors in Self-Report Surveys ........... 251
   James P. Lynch and Lynn A. Addington

14 Missing Data Problems in Criminological Research ................................................................. 273
   Robert Brame, Michael G. Turner, and Ray Paternoster

15 The Life Event Calendar Method in Criminological Research ....................... 289
   Jennifer Roberts and Julie Horney

16 Statistical Power ........................................................................................................................................ 313
   Chester L. Britt and David Weisburd

17 Descriptive Validity and Transparent Reporting in Randomised Controlled Trials ......................................................................................................................... 333
   Amanda E. Perry

18 Measurement Error in Criminal Justice Data ................................................... 353
   John Pepper, Carol Petrie, and Sean Sullivan

19 Statistical Models of Life Events and Criminal Behavior ........................................ 375
   D. Wayne Osgood

Part III-A Estimation of Impacts and Outcomes of Crime and Justice:
Topics in Experimental Methods

20 An Introduction to Experimental Criminology ......................................................... 399
   Lawrence W. Sherman

21 Randomized Block Designs ............................................................................................................ 437
   Barak Ariel and David P. Farrington

22 Construct Validity: The Importance of Understanding the Nature of the Intervention Under Study ......................................................................................................................... 455
   John S. Goldkamp
