Preface	vii
Acknowledgments	ix
Part I “Invariant Variational Problems” by Emmy Noether. Translation of “Invariante Variationsprobleme” (1918)	
Invariant Variational Problems	3
1 Preliminary Remarks and the Formulation of the Theorems	3
2 Divergence Relations and Identities	7
3 Converse in the Case of a Finite Group	10
4 Converse in the Case of an Infinite Group	12
5 Invariance of the Various Elements of the Relations	16
6 An Assertion of Hilbert	19
Part II Invariance and Conservation Laws in the Twentieth Century. The Inception and Reception of the Noether Theorems	
Introduction	25
1 The Inception of the Noether Theorems	29
1.1 From the Theory of Invariants to Special Relativity	29
1.2 The General Theory of Relativity and the Problem of the Conservation of Energy	37
1.3 The Publications of Hilbert and Klein on General Relativity	39
1.4 Emmy Noether at Göttingen	43
1.5 After Göttingen	53
2 The Noether Theorems	55
2.1 Preliminaries	56
2.2 The First Theorem: Conservation Laws	57
2.3 The Second Theorem: Differential Identities	60
2.4 Conclusion: The Discussion of Hilbert’s Assertion	63

3 The Noether Theorems as Seen by Contemporaries and by Historians of Science 65

3.1 References to Noether in the Works of Klein, Hilbert and Weyl, and in Einstein’s Correspondence 65

3.2 The Eulogies of 1935 76

3.3 Personal Recollections 79

3.4 The Introduction to Noether’s *Gesammelte Abhandlungen / Collected Papers* 86

3.5 Translations of the *Invariante Variationsprobleme* 87

3.6 Historical Analyses 88

4 The Transmission of Noether’s Ideas, from Bessel-Hagen to Hill, 1921–1951 91

4.1 Bessel-Hagen and Symmetries up to Divergence 91

4.2 Pauli 1921 and 1941 93

4.3 Weitzenböck 1923 94

4.4 Courant and Hilbert 1924 95

4.5 In Quantum Mechanics 96

4.6 Negative Results 98

4.7 Hill’s 1951 Article 101

5 The Reception of Noether’s First Theorem after 1950 103

5.1 Symmetries and Conservation Laws in Classical Mechanics and Quantum Physics 104

5.2 On Some Encyclopedia Articles 104

5.3 Analysis of Several Works in Mathematics and Mechanics, 1950–1980 105

5.4 Analysis of Several Works in Physics, 1950–1980 117

5.5 The Rediscoveries as Generalizations of “Noether’s Theorem” 121

6 The Reception of Noether’s Second Theorem after 1950 123

6.1 The Second Theorem and General Relativity 123

6.2 The Second Theorem and Gauge Theories 129

7 After 1970—Genuine Generalizations 133

7.1 Jet Bundles and Generalized Symmetries 134

7.2 Characteristics of Conservation Laws and the Converse of the First Theorem 137

7.3 The Formal Calculus of Variations 138

7.4 Symmetries and Conservation Laws for Nonvariational Equations . . 140

7.5 At the end of the twentieth century 144

Conclusion 145

Appendix I. Postcard from Noether to Klein, 15 February 1918 149

Appendix II. Letter from Noether to Klein, 12 March 1918 153

Appendix III. Letter from Klein to Pauli, 8 March 1921	159
Appendix IV. Letter from Noether to Einstein, 7 January 1926	161
Appendix V. Lectures at the Mathematical Society of Göttingen, 1915-1919	167
References	171
Index	199
