

Contents

1 Introduction	1
Fabio Paternò	
1.1 Overall View	1
1.2 Motivations	2
1.3 Objectives	3
1.4 Technical and Architectural Aspects	5
1.5 Structure of the Book	6
2 State of the Art in Migration	9
Fabio Paternò, Carmen Santoro and Rasmus Olsen	
2.1 Introduction to Migration Frameworks	9
2.2 Support for Application Migration	11
2.2.1 Middleware Support for Migration	11
2.2.2 Network Mobility Support for Migration	12
2.2.3 Context Management Support for Migration	14
2.3 Migratory Services for Games	14
2.4 Advances Over the State of the Art	15
2.4.1 Advances in Migratory User Interfaces	15
2.4.2 Advances in the Migration of the Application Logic	18
2.4.3 Summary of Main Advances Over the State of Art	19
References	20
3 Migration Opportunities	25
Agnese Grasselli, Alessandro Vangelista and Stefano Bolli	
3.1 Setting the Scene	25
3.2 Multiscreen Ambition	27
3.3 Migration Platform Value Chain	29
References	30
4 The OPEN Migration Platform Architecture	31
Miquel Martin	
4.1 The Concept of Migration	31
4.2 The Advantages of the OPEN Approach	32

4.3	Architectural Overview of the OPEN Platform	33
4.4	Making Applications OPEN-Aware.....	35
4.4.1	The OPEN Adaptors	35
4.4.2	Client and Server Side Applications	36
4.4.3	Partial Migration.....	38
4.5	Platform Communication: The OPEN Dispatchers	38
4.5.1	Communication Models.....	40
4.6	OPEN Platform Architecture	40
4.7	OPEN Interfaces	41
4.7.1	Interface Design Philosophy.....	43
4.7.2	Ensuring Data Consistency.....	43
4.8	Conclusions.....	44
5	User Interface Migration Based on the Use of Logical Descriptions	45
	Giuseppe Ghiani, Fabio Paternò and Carmen Santoro	
5.1	Introduction.....	45
5.2	Architecture.....	47
5.2.1	OPEN Platform Integrated Orchestration.....	48
5.2.2	Stand-Alone Web Migration Orchestration	49
5.3	An Application Example of Total Web Migration	49
5.4	An Application Example of Partial Web Migration	50
5.5	Usability Evaluation	54
5.6	Technical Migration Evaluation.....	56
5.7	Considerations and Open Issues	57
5.8	Conclusions.....	58
	References.....	58
6	Service Migration Network Support	61
	Rasmus Olsen, Kim Højgaard-Hansen, Anders Nickelsen, Huan Cong Nguyen, Miquel Martin, Carmen Santoro, Björn Schindler and Simone Mazzei	
6.1	Network and Deployment Scenarios	61
6.2	Network Domain and Entities.....	61
6.3	Deployment Scenarios	62
6.4	Overview of the Network Support.....	63
6.5	Migration Orchestration and Orchestration Procedure	64
6.6	Context Management.....	66
6.7	Internal Structure, Architecture and Interaction	67
6.7.1	Internal Structure and Architecture.....	67
6.7.2	Interaction with the Context Management Framework	68
6.7.3	Adapting the Context Management Framework.....	69
6.8	Trigger Detection and Management	72
6.8.1	Manual Migration Triggering	73
6.8.2	Automatic Migration Triggering.....	74

- 6.8.3 Score-Based Trigger Decision Approach..... 74
- 6.8.4 Model-Based Trigger Decision Approach 78
- 6.9 Mobility Support..... 81
 - 6.9.1 Requirements for Mobility Support Module 82
 - 6.9.2 Terminal Mobility 82
 - 6.9.3 Session Mobility 84
 - 6.9.4 Architecture of Mobility Support Module 92
- References..... 93

- 7 Dynamic Reconfiguration of Application Logic During Application Migration 95**
 - Holger Klus, Björn Schindler and Andreas Rausch
 - 7.1 Introduction..... 95
 - 7.2 The Application Logic Reconfiguration Module..... 96
 - 7.3 ALR Application Components..... 97
 - 7.4 Application Logic Specification and Reconfiguration..... 99
 - 7.5 Related Work..... 104
 - 7.6 Conclusions and Future Work..... 106
 - References..... 106

- 8 Design and Development of a Migratory Application Based on OPEN Migration Service Platform 109**
 - Giancarlo Cherchi and Francesca Mureddu
 - 8.1 Introduction..... 109
 - 8.2 Aspects of a Migratory Application 109
 - 8.3 Guidelines for Making an Application OPEN-Compliant..... 111
 - 8.3.1 Application Logic 113
 - 8.3.2 User Interface..... 115
 - 8.3.3 Network 116
 - 8.3.4 Context..... 117
 - 8.3.5 Policy..... 118
 - 8.4 Perception and Awareness of the Migration Process 119
 - 8.5 An Example of a Migratory Application: The Social Game..... 120
 - 8.5.1 Scenario 121
 - 8.5.2 Description..... 125
 - 8.5.3 Aspects..... 126
 - 8.5.4 Architecture..... 130
 - 8.5.5 Examples of Migration 132
 - 8.6 Conclusions..... 135

- 9 Next-Generation Migratory Emergency Management Application ... 137**
 - Kay-Uwe Schmidt, Veselina Milanova, Jörg Dörflinger and Susan Marie Thomas
 - 9.1 Introduction..... 137
 - 9.2 Motivating Example 138

- 9.3 Requirements 139
- 9.4 Agile User Interfaces 139
- 9.5 Agile User Interfaces Implemented 141
- 9.6 Agile User Interfaces Evaluated 142
- 9.7 Related Work 146
- 9.8 Conclusions and Future Work..... 147
- References 147

- 10 Integration of User Interface Migration and Application Logic Reconfiguration: An Example in the Game Domain 149**
 Giuseppe Ghiani, Holger Klus, Fabio Paternò, Carmen Santoro and Björn Schindler
- 10.1 Introduction 149
- 10.2 Description of the PacMan Game..... 150
- 10.3 Migration and the Main Architecture of the PacMan Game 150
- 10.4 Application Logic Reconfiguration 151
- 10.5 User Interface Migration 154
- 10.6 State Persistence 157
- 10.7 Integration of the User Interface Migration and Application Logic Reconfiguration 159
- 10.8 Advantages of the OPEN Migration Platform 160
- 10.9 Conclusions 161
- References 161

- 11 The Usability Evaluation and the Programmability Assessment of Migration 163**
 Agnese Grasselli, Alessandro Vangelista and Stefano Bolli
- 11.1 What Does Testing a Migratory Middleware Platform Mean?..... 163
- 11.2 Usability..... 164
 - 11.2.1 The ISO Definition of Usability 164
- 11.3 Programmability 169
 - 11.3.1 Definition..... 170
 - 11.3.2 Programmability Assessment 171
 - 11.3.3 Programmability Validation..... 173
- 11.4 Conclusion About Testing Activity 174
- References 174

- Appendix 177**
 Appendix A: System Usability Scale 177
 Appendix B: Product Reaction Cards 178

- Index 179**

Migratory Interactive Applications for Ubiquitous
Environments

Paternò, F. (Ed.)

2011, XVI, 180 p., Hardcover

ISBN: 978-0-85729-249-0
