3 The Pantograph Mk-II: A Haptic Instrument

3.1 Preface to Chap. 3

3.1.1 Contributions of Authors

3.2 Introduction

3.3 Components

3.3.1 Mechanical Structure

3.3.2 Normal Force Sensing

3.3.3 Accelerometer

3.3.4 Motors

3.3.5 Position Sensors

3.3.6 Electronics

3.4 Kinematics

3.4.1 Direct Kinematics

3.4.2 Inverse Kinematics

3.4.3 Differential Kinematics

3.4.4 Kinematic Conditioning

3.4.5 Calibration

3.5 Results

3.5.1 Experimental System Response

3.5.2 Resolution

3.6 Conclusion and Discussion

References

4 Fundamental Limits

4.1 Preface to Chap. 4

4.1.1 Contributions of Authors

4.2 Introduction

4.3 Basic Sampling

4.4 Feedback Dynamics

4.5 Experiments

4.5.1 Device Characterization

4.5.2 Effect of a Reconstruction Filter

4.5.3 Comparative Tests

4.5.4 Discussion

4.6 Conclusion

References

5 On the Synthesis of Haptic Textures

5.1 Preface to Chap. 5

5.1.1 Contributions of Authors

5.2 Introduction

5.3 Assumptions

5.3.1 Parametrization

5.3.2 Limits

5.4 Control Analysis

5.4.1 Control Passivity Condition
5.4.2 Characteristic Number of Algorithms .......................... 77
5.4.3 Conservativity and Passivity in Virtual Environments .... 77
5.5 Analysis of Algorithms ............................................. 78
  5.5.1 Grooved Boundary—Force Normal to Surface (A) .... 80
  5.5.2 Grooved Boundary—Force Normal to Groove (B) ...... 82
  5.5.3 Change of Height (C) ........................................ 82
  5.5.4 Variant 1 Derived from the ‘God-Object’ Method (D) .. 83
  5.5.5 Variant 2 Derived from the ‘God-Object’ Method (E) .. 85
  5.5.6 Flat Wall with Modulated Lateral Friction (F) .......... 86
  5.5.7 Force Shading (G) ......................................... 87
  5.5.8 Summary .................................................. 88
5.6 Experimental Validation ............................................. 89
  5.6.1 Passivity Experiments ....................................... 89
  5.6.2 Conservativity Experiments ................................. 90
  5.6.3 Surface Activity ............................................ 91
5.7 Conclusion .......................................................... 92
Appendix 1: Characteristic Number of Algorithm F .............. 93
Appendix 2: Jacobian Matrix of Algorithm D ....................... 94
Appendix 3: Erratum to “On the Synthesis of Haptic Textures” ... 95
References ............................................................... 96

6 Passive Realization of Nonlinear Virtual Environments ...... 99
  6.1 Introduction ..................................................... 99
  6.2 Related Work ................................................... 100
  6.3 Passively Realized Virtual Environments ..................... 100
    6.3.1 Conservativity and Passivity ............................ 100
    6.3.2 Passively Realized Virtual Environments ............... 102
  6.4 Examples and Discussion ....................................... 105
    6.4.1 Linearized Virtual Environments ....................... 106
    6.4.2 Experimental Results .................................... 109
  6.5 Conclusion and Future Work ................................... 111
References ............................................................... 111

7 Texturing Curved Surfaces ........................................... 113
  7.1 Introduction ..................................................... 113
    7.1.1 3D Surfaces .............................................. 113
  7.2 The God-Object .................................................. 114
    7.2.1 Change of Coordinates ................................... 115
    7.2.2 Locality of the Characteristic Number ................. 118
    7.2.3 Effect of Curvature ...................................... 118
  7.3 Grooved Boundary—Force Normal to Surface (A)—3D Extension 119
    7.3.1 Force Field—3D Flat Plane .............................. 119
    7.3.2 Force Field—3D Curved Surface ........................ 120
    7.3.3 Change of Coordinates—3D Curved Surface ............. 120
    7.3.4 Jacobian—3D Curved Surface ............................ 121
8 Roughness of Virtual Textures and Lateral Force Modulation

8.1 Preface to Chap. 8
8.1.1 Contribution of Authors

8.2 Introduction

8.3 Device and Control

8.4 Texture Force Field

8.5 Experimental Procedure
  8.5.1 Design
  8.5.2 Stimuli
  8.5.3 Subjects

8.6 Results

8.7 Discussion and Conclusion

References

9 Calibration of Virtual Haptic Texture Algorithms

9.1 Preface to Chap. 9
  9.1.1 Contribution of Authors

9.2 Introduction

9.3 Related Work

9.4 Approach
  9.4.1 System Considerations
  9.4.2 Psychophysics

9.5 Materials and Methods
  9.5.1 Algorithms
  9.5.2 Characteristic Number
  9.5.3 Experiment Design
  9.5.4 Subjects and Experimental Procedure

9.6 Results
  9.6.1 Raw Data
  9.6.2 Analysis of the Overall Results

9.7 Discussion and Conclusion

Appendix: Characteristic Numbers
  9.8.1 Algorithm A
  9.8.2 Algorithm F

References
## 10 Conclusions

10.1 Summary .......................................... 155

10.2 Results ............................................ 155

10.2.1 Passivity ....................................... 155

10.2.2 Devices and Algorithms ....................... 156

10.3 Future Work ....................................... 157
