

Contents

1	Introduction	1
1.1	Motivation	1
1.2	Networked and Distributed Control Architectures	2
1.2.1	Networked Control Architectures	2
1.2.2	Cooperative, Distributed Control Architectures	4
1.2.3	A Reactor–Separator Process Example	4
1.3	Background	8
1.4	Objectives and Organization of the Book	10
2	Lyapunov-Based Model Predictive Control	13
2.1	Introduction	13
2.2	Notation	14
2.3	System Description	14
2.4	Lyapunov-Based Control	15
2.5	Model Predictive Control	16
2.6	Lyapunov-Based Model Predictive Control	18
2.7	LMPC with Asynchronous Feedback	19
2.7.1	Modeling of Data Losses/Asynchronous Measurements	20
2.7.2	LMPC Formulation with Asynchronous Feedback	20
2.7.3	Stability Properties	22
2.7.4	Application to a Chemical Reactor	28
2.8	LMPC with Delayed Measurements	33
2.8.1	Modeling of Delayed Measurements	33
2.8.2	LMPC Formulation with Measurement Delays	35
2.8.3	Stability Properties	37
2.8.4	Application to a Chemical Reactor	40
2.9	Conclusions	44
3	Networked Predictive Process Control	47
3.1	Introduction	47
3.2	System Description	48
3.3	Modeling of Measurements	49

- 3.4 Lower-Tier Controller 50
- 3.5 Two-Tier Networked Control Architecture with Continuous/Asynchronous Measurements 51
 - 3.5.1 Upper-Tier Networked LMPC Formulation 52
 - 3.5.2 Stability Properties 54
 - 3.5.3 Application to a Chemical Reactor 59
 - 3.5.4 Application to a Reactor–Separator Process 64
- 3.6 Two-Tier Networked Control Architecture with Continuous/Delayed Measurements 70
 - 3.6.1 Upper-Tier Networked LMPC Formulation 70
 - 3.6.2 Stability Properties 72
 - 3.6.3 Application to a Chemical Reactor 75
 - 3.6.4 Application to a Reactor–Separator Process 77
- 3.7 Application to a Wind–Solar Energy Generation System 82
 - 3.7.1 Wind–Solar System Description 82
 - 3.7.2 Control Problem Formulation and Controller Design 86
 - 3.7.3 Simulation Results 90
- 3.8 Conclusions 97
- 4 Distributed Model Predictive Control: Two-Controller Cooperation 99**
 - 4.1 Introduction 99
 - 4.2 System Description 101
 - 4.3 Lyapunov-Based Control 101
 - 4.4 DMPC with Synchronous Measurements 102
 - 4.4.1 DMPC Formulation 102
 - 4.4.2 Stability Properties 106
 - 4.4.3 Application to a Reactor–Separator Process 109
 - 4.5 DMPC with Asynchronous Measurements 117
 - 4.5.1 Modeling of Asynchronous Measurements 117
 - 4.5.2 DMPC Formulation 117
 - 4.5.3 Stability Properties 120
 - 4.5.4 Application to a Reactor–Separator Process 122
 - 4.6 DMPC with Delayed Measurements 124
 - 4.6.1 Modeling of Delayed Measurements 124
 - 4.6.2 DMPC Formulation 125
 - 4.6.3 Stability Properties 128
 - 4.6.4 Application to a Reactor–Separator Process 130
 - 4.7 Conclusions 133
- 5 Distributed Model Predictive Control: Multiple-Controller Cooperation 135**
 - 5.1 Introduction 135
 - 5.2 System Description 136
 - 5.3 Lyapunov-Based Control 137
 - 5.4 Sequential and Iterative DMPC Designs with Synchronous Measurements 138

- 5.4.1 Sequential DMPC 138
- 5.4.2 Iterative DMPC 143
- 5.4.3 Application to an Alkylation of Benzene Process 149
- 5.5 Sequential and Iterative DMPC Designs with Asynchronous Measurements 160
 - 5.5.1 Modeling of Asynchronous Measurements 160
 - 5.5.2 Sequential DMPC with Asynchronous Measurements 161
 - 5.5.3 Iterative DMPC with Asynchronous Measurements 168
 - 5.5.4 Application to an Alkylation of Benzene Process 174
- 5.6 Iterative DMPC Design with Delayed Measurements 176
 - 5.6.1 Modeling of Delayed Measurements 177
 - 5.6.2 Iterative DMPC Formulation 178
 - 5.6.3 Stability Properties 180
 - 5.6.4 Application to an Alkylation of Benzene Process 182
- 5.7 Handling Communication Disruptions in DMPC 183
 - 5.7.1 Model of the Communication Channel 185
 - 5.7.2 DMPC with Communication Disruptions 186
 - 5.7.3 Stability Properties 189
- 5.8 Conclusions 191
- 6 Multirate Distributed Model Predictive Control 193**
 - 6.1 Introduction 193
 - 6.2 System Description 193
 - 6.3 Modeling of Measurements and Communication Networks 194
 - 6.4 Lyapunov-Based Control 196
 - 6.5 Multirate DMPC 198
 - 6.5.1 Multirate DMPC Formulation 198
 - 6.5.2 Stability Properties 202
 - 6.6 Application to a Reactor–Separator Process 210
 - 6.7 Conclusions 218
- 7 Conclusions 219**
- References 221**
- Index 227**

Networked and Distributed Predictive Control
Methods and Nonlinear Process Network Applications
Christofides, P.D.; Liu, J.; Muñoz de la Peña, D.
2011, XXVIII, 232 p., Hardcover
ISBN: 978-0-85729-581-1
