Contents

1 An Overview of Decision Policies for Production Networks .... 1
   Karl G. Kempf

2 Modeling and Control of Manufacturing Systems .............. 9
   Erjen Lefeber

3 The Ongoing Challenge for a Responsive Demand Supply
   Network: The Final Frontier—Controlling the Factory ........ 31
   Kenneth Fordyce and R. John Milne

4 WIP-Oriented Dispatching in Complex
   Manufacturing Facilities............................................ 71
   Oliver Rose and Zhugen Zhou

5 Controlling a Re-entrant Manufacturing Line via
   the Push–Pull Point ................................................. 103
   Dominique Perdaen, Dieter Armbruster, Karl G. Kempf and
   Erjen Lefeber

6 JEDI: Just-in-Time Execution and Distribution Information
   Support System for Automotive Stamping Operations ......... 119
   Oleg Gusikhin and Erica Klampfl

7 A Control Theoretic Evaluation of Schedule Nervousness
   Suppression Techniques for Master Production Scheduling ...... 143
   Martin W. Braun and Jay D. Schwartz
8 Chance-Constraint-Based Heuristics for Production Planning in the Face of Stochastic Demand and Workload-Dependent Lead Times ........................................ 173
Tarik Aouam and Reha Uzsoy

9 Traffic Flow Models and Service Rules for Complex Production Systems .................................. 209
Christian Ringhofer

10 Autonomous Decision Policies for Networks of Production Systems ........................................ 235
Bernd Scholz-Reiter, Sergey Dashkovskiy, Michael Görges,
Thomas Jagalski and Lars Naujok

11 Optimal Order and Distribution Strategies in Production Networks ........................................ 265
Simone Göttlich, Michael Herty and Christian Ringhofer

12 The Production Planning Problem: Clearing Functions, Variable Lead Times, Delay Equations and Partial Differential Equations. ........................ 289
D. Armbruster
