
Contents

Preface	v
Dedication	vi
Contributors	ix
1 Celiac Disease: <i>A Brief Overview</i> Debbie Williamson and Michael N. Marsh	1
2 Genotyping Methodologies Stephen Bevan and Richard S. Houlston	11
3 From Linkage to Genes: <i>Positional Cloning</i> , Stephen Bevan and Richard S. Houlston	21
4 Linkage and the Transmission Disequilibrium Test in Complex Traits: <i>Celiac Disease as a Case Study</i> Stephen Bevan and Richard S. Houlston	33
5 Extraction, Separation, and Purification of Wheat Gluten Proteins and Related Proteins of Barley, Rye, and Oats Arthur S. Tatham, Simon M. Gilbert, Roger J. Fido, and Peter R. Shewry	55
6 Structure Elucidation of Gluten-Derived Peptides by Tandem Mass Spectrometry Peter A. van Veelen, Jan W. Drijfhout, and Frits Koning	75
7 Synthetic Peptide Libraries for T-Cell Epitope Identification Hoebert S. Hiemstra, Jan W. Drijfhout, and Frits Koning	89
8 Characterization of HLA–DQ-Specific Peptide-Binding Motifs Yvonne van de Wal, Reinout Amons, and Frits Koning	97
9 Studies of Gliadin-Specific T Cells in Celiac Disease Øyvind Molberg, Stephen N. McAdam, Knut E. A. Lundin, and Ludvig M. Sollid	105
10 Morphometric Analysis of Intestinal Mucosa: <i>The Measurement of Volume Compartments and Cell Volumes in Human Intestinal Mucosa</i> Michael N. Marsh, Peter T. Crowe, Kieran J. Moriarty, and Arzu Ensari	125

11	Morphometry of Rectal Mucosa Arzu Ensari, Michael N. Marsh, Peter T. Crowe, and Kieran J. Moriarty	147
12	Organ Culture of Rectal Mucosa: <i>In Vitro</i> Challenge with Gluten <i>in Celiac Disease</i> Guiseppa Mazzarella, Franco Paparo, Maria Maglio, and Riccardo Troncone	163
13	<i>In Situ</i> Hybridization Conrad G. Beckett and Paul Ciclitira	175
14	Quantification of Cytokine mRNA Expression by Quantitative Polymerase Chain Reaction in Studies of Celiac Disease Ellen M. Nilsen, Finn-Eirik Johansen, and Per Brandtzaeg	185
15	Immunohistochemistry in Research and Diagnosis of Celiac Disease Per Brandtzaeg and Frode L. Jahnsen	203
16	Immunoassay for Detection of IgA Antitissue Transglutaminase in Patients with Celiac Disease Walburga Dieterich, Ernst Otto Riecken, and Detlef Schuppan .	241
17	Antiendomysial and Antigliadin Antibody Tests and Diagnosis of Celiac Disease David J. Unsworth	247
18	Whole Gut Lavage Fluid Analysis: <i>A Minimally Invasive Method for Study of Mucosal Immunity and Inflammation</i> Subrata Ghosh, Anna Dahele, Hazel E. Drummond, Syed S. Hoque, Kenneth Humphreys, and Ian D. R. Arnott ...	257
	Index	279
