Preface	v
List of Contributors	xi
PART I. PHARMACOLOGICAL LABELING OF ION CHANNELS AND RECEPTORS	
1 Fluorescent Calcium Antagonists: <i>Tools for Imaging of L-Type Calcium Channels in Living Cells</i> <i>Thomas Budde</i>	1
2 Targeting Cerebral Muscarinic Acetylcholine Receptors with Radioligands for Diagnostic Nuclear Medicine Studies <i>Daniel W. McPherson</i>	17
3 GABA _A Receptors: <i>Autoradiographic Localization of Different Ligand Sites and Identification of Subtypes of the Benzodiazepine Binding Site</i> <i>Cyrille Sur and John Atack</i>	39
4 Localization of ATP P2X Receptors <i>Xuenong Bo and Geoffrey Burnstock</i>	57
5 Small Conductance Calcium-Activated Potassium Channels in Rat Brain: <i>Autoradiographic Localization Using Two Specific Toxins, Apamin and Scyllatoxin</i> <i>Marc Borsotto</i>	75
6 Mapping N-Type Calcium Channel Distributions with ω -Conotoxins <i>Geula M. Bernstein and Owen T. Jones</i>	93
7 Fluorescent Imaging of Nicotinic Receptors During Neuromuscular Junction Development <i>Zhengshan Dai and H. Benjamin Peng</i>	119
8 High Affinity Scorpion Toxins for Studying Potassium and Sodium Channels <i>Lourival D. Possani, Baltazar Becerril, Jan Tytgat, and Muriel Delepierre</i>	145

PART II. APPLICATIONS OF GREEN FLUORESCENT PROTEIN (GFP)
TECHNOLOGY

- 9 Bicistronic GFP Expression Vectors as a Tool to Study Ion Channels in Transiently Transfected Cultured Cells
Jan Eggermont, Dominique Trouet, Gunnar Buyse, Rudi Vennekens, Guy Droogmans, and Bernd Nilius 167
- 10 Confocal Imaging of GFP-Labeled Ion Channels
Bryan D. Moyer and Bruce A. Stanton 187
- 11 Localization and Quantification of GFP-Tagged Ion Channels Expressed in *Xenopus* Oocytes
Tooraj Mirshahi, Diomedes E. Logothetis, and Massimo Sassaroli 215
- 12 Applications of Green Fluorescent Protein (GFP) Technology: *Watching Ion Channel Biogenesis in Living Cells Using GFP Fusion Constructs*
Scott A. John and James N. Weiss 233
- 13 Tagging Ion Channels with the Green Fluorescent Protein (GFP) as a Method for Studying Ion Channel Function in Transgenic Mouse Models
Joseph C. Koster and Colin G. Nichols 249
- 14 Mutant GFP-Based FRET Analysis of K⁺ Channel Organization
Elena N. Makhina and Colin G. Nichols 261
- 15 Delivering Ion Channels to Mammalian Cells by Membrane Fusion
David C. Johns, Uta C. Hoppe, Eduardo Marbán, and Brian O'Rourke 275
- PART III. FUNCTIONAL ASSAYS IN ION CHANNEL LOCALIZATION
- 16 Detection of Neurons Expressing Calcium-Permeable AMPA Receptors Using Kainate-Induced Cobalt Uptake
Cristóvão Albuquerque, Holly S. Engelman, C. Justin Lee, and Amy B. MacDermott 297
- 17 Crystallization Technique for Localizing Ion Channels in Living Cells
Anatoli N. Lopatin, Elena N. Makhina and Colin G. Nichols 311

18 Imaging of Localized Neuronal Calcium Influx
Fritjof Helmchen 327

19 Using Caged Compounds to Map Functional
 Neurotransmitter Receptors
Diana L. Pettit and George J. Augustine 349

PART IV. ATOMIC FORCE MICROSCOPY

20 Atomic Force Microscopy of Reconstituted Ion Channels
Hoeon Kim, Hai Lin, and Ratneshwar Lal 371

21 Imaging the Spatial Organization of Calcium Channels
 in Nerve Terminals Using Atomic Force Microscopy
Hajime Takano, Marc Porter, and Philip G. Haydon 391

22 Nanoarchitecture of Plasma Membrane Visualized
 with Atomic Force Microscopy
*Hans Oberleithner, Hermann Schillers,
 Stefan W. Schneider, and Robert M. Henderson* 405

23 Dynamic AFM of Patch Clamped Membranes
Kenneth Snyder, Ping C. Zhang, and Frederick Sachs 425

24 Localizing Ion Channels with Scanning Probe Microscopes:
A Perspective
Daniel M. Czapkowsky and Zhifeng Shao 461

Index 483
