CONTENTS

Preface ........................................................................................................................................ v
Contributors ................................................................................................................................ xi

PART I. EPIDEMIOLOGY/PREVENTION
1 Biology and Molecular Genetics of Colorectal Cancer .................................................. 3
   Scott K. Kuwada, Deborah W. Neklason, and Randall W. Burt
2 Epidemiological Trends in Colorectal Cancer ............................................................ 23
   Susan M. Talbot and Alfred I. Neugut
3 Dietary and Lifestyle Influences on Colorectal Carcinogenesis .................................. 47
   Charles S. Fuchs
4 Screening and Surveillance ......................................................................................... 65
   Arnold J. Markowitz
5 Chemoprevention of Colorectal Cancer .................................................................. 81
   Monica M. Bertagnolli
6 Management of Hereditary Colon Cancer Syndromes ............................................ 99
   Miguel A. Rodriguez-Bigas and Nicholas J. Petrelli

PART II. DIAGNOSTIC AND THERAPEUTIC RADIOLOGY
7 Overview of CT, MRI, and Ultrasound in the Imaging and Staging of Colorectal Cancer ............................................................. 117
   David J. Vining
8 Virtual Colonoscopy for Colorectal Cancer Screening and Surveillance ................. 127
   David T. Rubin and Abraham H. Dachman
9 Preoperative Staging of Rectal Cancer: Endorectal Ultrasound and Endorectal MRI ............................................................... 143
   Spiros Hiotis, Sharon Weber, and W. Douglas Wong
10 Nuclear Medicine in the Diagnosis and Management of Colorectal Cancer .......... 157
    Stanley J. Goldsmith and Lale Kostakoglu
11 Radiation Therapy of Resectable Rectal Cancer ..................................................... 179
    Nora A. Janjan, Matthew Ballo, Christopher Crane, and Marc Delclos
12 Management of Locally Unresectable Rectal Cancer ............................................. 209
    Bruce D. Minsky
13 Radiation Therapy for Hepatic Metastases .............................................................. 233
    John M. Robertson

PART III. SURGERY OF COLORECTAL CANCER
14 Surgical Pathology of Colorectal Cancer .................................................................. 247
    Carolyn C. Compton
15 Surgery of Colon Cancer ......................................................................................... 267
    Alfred T. Culliford IV and Philip B. Paty

PART V. SUPPORTIVE MANAGEMENT

35 Cancer Pain Syndromes in Colorectal and Anal Cancers ........................................ 637
   Nathan I. Cherny

36 Pain Management in Colorectal and Anal Cancers .................................................. 659
   Nathan I. Cherny

37 Sexuality and Fertility in Patients with Colorectal Cancer ...................................... 695
   Megan P. Fleming

38 Complementary and Alternative Medicine Approaches in Colorectal Cancer ....... 717
   Andrew J. Vickers and Barrie R. Cassileth

PART VI. NEW AGENTS IN COLORECTAL CANCER

39 Angiogenesis and Colorectal Cancer: From the Laboratory to the Clinic ............ 739
   Lee S. Rosen and William W. Li

40 Selected Targets and Rationally Designed Therapeutics for Patients
   with Colorectal Cancer: Future Drug Development ........................................ 759
   Eric K. Rowinsky

41 Vaccine Strategies for Colorectal Cancer ............................................................. 795
   Kenneth A. Foon

42 Gene Therapy Strategies for Colorectal Cancer .................................................... 811
   Anand G. Menon, Marjolijn M. van der Ee, Peter J. K. Kuppen,
   and Cornelis J. H. van de Velde

Index ................................................................................................................................... 837
