Table of contents

Foreword to the fifth edition
CR Blagg x

List of contributing authors xii

Introduction to the fifth edition
WH Hörl, KM Koch, RM Lindsay, C Ronco and JF Winchester xx

SECTION 1: Pathophysiology of the uremic syndrome
SECTION EDITOR: WH Hörl 1

1. Molecular genetic basis of uremia
   M Födinger and G Sunder-Plassmann 3

2. Uremic toxicity
   RC Vanholder, R de Smet and NH Lameire 15

3. The uremic syndrome and pathophysiology of chronic renal failure
   WH Hörl 57

4. Solute transport mechanisms in dialysis
   T Depner and L Garred 73

5. Optimization of high-flux, hollow-fiber artificial kidneys
   JK Leypoldt and C Ronco 95

6. Peritoneal anatomy and physiology during peritoneal dialysis
   RT Krediet 115

7. The biology of hemodialysis
   S Schmaldienst and WH Hörl 157

8. Pathophysiology of acute renal failure
   M Bonello, R Ratanarat, G Salvatori, H Oudemans Van-Straaten, R Bellomo and C Ronco 181

SECTION 2: Technology of dialysis and associated methods
SECTION EDITOR: Claudio Ronco 201

9. Vascular access for hemodialysis
   B Canaud and S Desmeules 203

10. Peritoneal access and its complications
    SR Ash 231
Table of contents

11. Thrombogenesis and anticoagulation in patients undergoing chronic hemodialysis
   J Böhl er and K-G Fischer

12. Hemodialyzers and related devices
   NA Hoenich, PM Ghezzi and C Ronco

13. Membranes for hemodialysis
   C Ronco, PM Ghezzi and SK Bowry

14. Hemodialysis machines and monitors
   H-D Polaschegg and NW Levin

15. Machines for automated peritoneal dialysis
   C Ronco, M Feriani and R Dell’Aquila

16. Machines for continuous renal replacement therapies
   C Ronco, R Bellomo and A Brendolan

17. Water treatment for contemporary hemodialysis
   G Cappelli and P Inguaggiato

18. Solutions for peritoneal dialysis
   M Feriani, C Ronco and G La Greca

19. Computerized patient record in dialysis practice
   JA Lorch and VE Pollak

20. Online monitoring and feedback-control
   RM Lindsay and D Schneditz

21. Hemodialysis fluid composition
   F Locatelli, S Di Filippo and C Manzoni

22. Adequacy of hemodialysis
   R Suri and PG Blake

23. Adequate peritoneal dialysis
   JM Burkart and TA Golper

24A. Dialysis techniques: peritoneal dialysis
   R Gokal

24B. Dialysis techniques: hemodialysis
   F Locatelli, C Manzoni and S Di Filippo

24C. Dialysis techniques: continuous renal replacement techniques
   C Ronco, A Brendolan and R Bellomo

24D. Dialysis techniques: therapeutic plasma exchange and related techniques
   W Samtleben and MJ Lysaght

24E. Dialysis techniques: hemoperfusion
   JF Winchester

SECTION 3: Clinical aspects of organ failure in dialysis patients
SECTION EDITOR: James F. Winchester

25. Blood pressure control in chronic hemodialysis patients
   GM London, SJ Marchais, AP Guerin and F Metivier
Table of contents

26. Cardiac disease in chronic uremia
   PS Parfrey 765

27. Lipids and atherosclerosis
   C Wanner 791

27A. Homocysteine and atherosclerosis in dialysis patients
   G Sunder-Plassmann and M Födinger 809

28. Acid–base in dialysis
   M Feriani, A Fabris and G La Greca 829

29. Pulmonary aspects of dialysis patients
   ME De Broe, RL Lins and WA De Backer 849

30. Gastrointestinal complications in dialysis patients
   J Gonin, C Kitiyakara and A Santos 865

31. Neurological and neuromuscular disorders in dialysis patients
   A Davenport 883

32. Trace elements in dialysis patients
   PC D’Haese and ME De Broe 903

33. Bleeding disorders in renal failure
   JF Winchester and RM Lindsay 919

34. Management of anemia in patients with chronic kidney disease
   WH Hörl 931

35. Impaired cellular host defense and chronic inflammatory abnormalities in
   end-stage renal disease
   WH Hörl 965

36. Diseases of the native kidneys in dialysis and transplanted patients
   N Lameire, R Vanholder, A Dhondt and W Van Biesen 979

37. Endocrine function in uremia
   MJ Flanigan and V Sy Lim 999

38. Malnutrition and dialysis
   D Fouque and JD Kopple 1013

39. Beta-2-microglobulin amyloidosis
   M Jadoul and C van Ypersele de Strihou 1041

40. Renal osteodystrophy
   F Llach and F Velasquez-Forero 1057

41. Intradialytic complications: pathophysiology, prevention and treatment
   FM van der Sande, NW Levin, JP Kooman, NA Hoenich and KML Lewissen 1105

42. Peritoneal infections, hernias and related complications
   R Gokal 1129

SECTION 4: Special clinical situations
SECTION EDITOR: Karl M. Koch 1159

43. Preservation of native renal function at different stages of renal impairment
   N Lameire, W Van Biesen, R Vanholder and D Churchill 1161
Table of contents

44. Considerations in the management of patients with acute renal failure  
   BA Mueller, MA Kraus, C Ronco and WR Clark  
   1181

45. Renal replacement therapy in children  
   BA Warady and TE Bunchman  
   1203

46. Dialysis in the elderly  
   I Grapsa and DG Oreopoulos  
   1227

47. Pregnancy and dialysis  
   AJ Goody and JG Umans  
   1249

48. Renal replacement therapy for diabetic patients  
   Y Woredekal and EA Friedman  
   1259

49. Social, ethical and legal issues in chronic hemodialysis and transplantation  
   SS Patel and PL Kimmel  
   1273

50. Psychiatric aspects of the dialysis patient  
   PG Wilson  
   1299

51. Quality of life of the dialysis patient  
   J Ahlmen  
   1315

52. Sexual dysfunction in the dialysis patient  
   BF Palmer  
   1333

53. Transplantation: integration, patient selection, use of dialysis in transplant patients  
   N Lameire, W van Biesen, R Vanholder, U Frei  
   1343

54. Human immunodeficiency virus infection in patients with end-stage renal disease  
   TK Sreepada Rao  
   1363

55. Viral hepatitis in dialysis patients  
   M Girndt and H Köhler  
   1379

SECTION 5: Organization and results of chronic dialysis  
SECTION EDITOR: R.M. Lindsay  
   1409

56. Outcomes in dialysis: a global assessment  
   D Bottalico, FK Port and FP Schena  
   1411

57. Economics in dialysis  
   PG Blake and PM Just  
   1455

58. Dialysis in the developing world  
   RS Barsoum  
   1487

59. Exercise for dialysis patients  
   PL Painter  
   1497

60. Assessing the progression of renal disease  
   S Klahr  
   1505

61. The design of randomized clinical trials in dialysis patients  
   T Greene, AK Cheung and R Krediet  
   1521

62. Management of center hemodialysis programs  
   A Kliger  
   1543
# Table of contents

63. Home hemodialysis  
   *R.M Lindsay and R Leitch*  
   1553

64. Peritoneal dialysis program management  
   *JF Winchester*  
   1567

65A. Telemedicine and dialysis: the desk-top model  
   *JW Moncrief*  
   1573

65B. General telemedicine systems  
   *JF Winchester*  
   1575

Index  
   1579
Replacement of Renal Function by Dialysis
Hörl, W.H.; Koch, K.-M.; Lindsay, R.M.; Ronco, C.;
Winchester, J.F. (Eds.)
2004, LXIII, 1604 p., Hardcover
ISBN: 978-1-4020-0083-6
