## Contents

1 Early Postmortem Changes and Stages of Decomposition .......................... 1  
M. Lee Goff

2 Keys for Identification of Immature Insects ........................................... 25  
Patricia J. Thyssen

3 Key for the Identification of Third Instars of European Blowflies (Diptera: Calliphoridae) of Forensic Importance .......................... 43  
Krzysztof Szpila

4 The Utility of Coleoptera in Forensic Investigations .............................. 57  
John M. Midgley, Cameron S. Richards, and Martin H. Villet

5 Phoretic Mites and Carcasses: Acari Transported by Organisms Associated with Animal and Human Decomposition .................................................................................................................. 69  
M. Alejandra Perotti, Henk R. Braig, and M. Lee Goff

6 Indoor Arthropods of Forensic Importance: Insects Associated with Indoor Decomposition and Mites as Indoor Markers ............................................................................................................. 93  
Crystal L. Frost, Henk R. Braig, Jens Amendt, and M. Alejandra Perotti

7 Contemporary Precision, Bias and Accuracy of Minimum Post-Mortem Intervals Estimated Using Development of Carrion-Feeding Insects ........................................................................................................... 109  
Martin H. Villet, Cameron S. Richards, and John M. Midgley

8 Analysing Forensic Entomology Data Using Additive Mixed Effects Modelling ......................................................................................................................... 139  
Elena N. Ieno, Jens Amendt, Heike Fremdt, Anatoly A. Saveliev, and Alain F. Zuur
