Contents

Tumor Microvasculature and Microenvironment: Therapeutic Targets for Inhibition of Tumor Angiogenesis and Metastasis .................. 1
Chikezie O. Madu and Yi Lu

Anticancer Drug Development ........................................ 49
Ajit S. Narang and Divyakant S. Desai

Tumor-Targeted Macromolecular Drug Delivery Based on the Enhanced Permeability and Retention Effect in Solid Tumor ............... 93
Takahiro Seki, Jun Fang, and Hiroshi Maeda

Multidrug Resistance in Solid Tumor and Its Reversal ............... 121
Ho Lun Wong, Xiao Yu Wu, and Reina Bendayan

Targeting of Apoptosis Signaling Pathways and Their Mediators for Cancer Therapy ...................................................... 149
Arun K. Rishi, Xinbo Zhang, and Anil Wali

Role of Telomerase in Cancer Therapeutics .......................... 189
Kyung H. Choi and Michel M. Ouellette

Polymeric Carriers for Anticancer Drugs .............................. 207
Dongin Kim and You Han Bae

Application of Nanobiotechnology in Cancer Therapeutics ......... 245
K. K. Jain

Receptor-Mediated Delivery of Proteins and Peptides to Tumors ...... 269
Christian Dohmen and Manfred Ogris

Protein Transduction Domain-Mediated Delivery of Anticancer Proteins ................................................................. 297
Hiroshi Harada and Masahiro Hiraoka
Pharmaceutical Perspectives of Cancer Therapeutics: Current Therapeutic Uses of Monoclonal Antibodies ............................................. 321 Michael D. Axelson and David E. Gerber

Cancer Vaccines ........................................................................ 365 Zsuzsanna Tabi

RNA Interference for Cancer Therapy ........................................... 399 Kun Cheng and Bin Qin

MicroRNAs as Therapeutic Targets for Cancer ............................ 441 Guofeng Cheng, Michael Danquah, and Ram I. Mahato

Targeted Therapies for Malignant Brain Tumors ............................. 475 Matthew A. Tyler, Adam Quasar Sugihara, Ilya V. Ulasov, and Maciej S. Lesniak

The Complexity of the HIF-1-Dependent Hypoxic Response in Breast Cancer Presents Multiple Avenues for Therapeutic Intervention .......... 521 Tiffany N. Seagroves

Cancer Stem Cells: Potential Mediators of Therapeutic Resistance and Novel Targets of Anti-cancer Treatments ............................... 559 Hong Yan, Jichao Qin, and Dean G. Tang

Image-Guided Photodynamic Cancer Therapy ............................... 581 Zheng Rong Lu and Anagha Vaidya

Functional Imaging of Multidrug Resistance and Its Applications ....... 601 Célia M.F. Gomes

Gene Expression Microarrays in Cancer Research ............................. 645 Jian Yan and Weikuan Gu

Clinical Trials and Translational Applications in Cancer Therapy ....... 673 Dineo Khabele and Derrick Beech

Index ...................................................................................... 685
