Preface .................................................................. vii

1 History of Thoracic Anesthesiology  ...................................... 1
   Ian Conacher

Part I Preoperative Evaluation

2 Preanesthetic Assessment for Thoracic Surgery  ......................... 11
   Peter Slinger and Gail Darling

3 Thoracic Imaging ................................................................ 35
   Javier Campos and Kalpaj R. Parekh

Part II Thoracic Anatomy, Physiology, and Pharmacology

4 Essential Anatomy and Physiology of the Respiratory System
   and the Pulmonary Circulation ........................................... 51
   J. Michael Jaeger and Randal S. Blank

5 Physiology of the Lateral Decubitus Position, Open Chest
   and One-Lung Ventilation ............................................... 71
   Jens Lohser and Seiji Ishikawa

6 Clinical Management of One-Lung Ventilation .......................... 83
   Jens Lohser and Seiji Ishikawa

7 Nonrespiratory Functions of the Lung ................................ 103
   Lauren Yeazell and Keith Littlewood

8 Pharmacology of the Airways ........................................... 121
   Paul J. Wojciechowski and William E. Hurford

9 Pharmacology of the Pulmonary Circulation .......................... 133
   Cara Reimer and John Granton

10 Perioperative Lung Injury .............................................. 143
    Peter Slinger

Part III Diagnostic and Therapeutic Procedures of the Trachea and Airways

11 Bronchoscopic Procedures .............................................. 155
    Gordon N. Finlayson and Bevan G. Hughes
