Contents

1 Case 1: A Patient with a Mediastinal Mass ........................................ 1
2 Case 2: Stick Out Your Tongue.............................................................. 5
3 Case 3: An Epidural Blood Patch – What Went Wrong? ..................... 7
4 Case 4: A Lack of Communication Leads to a Bad Outcome................. 11
5 Case 5: Hyperkalemia During Coronary Artery Bypass Graft.............. 15
6 Case 6: An Adjuvant to the Cuff-Leak Test ........................................ 17
7 Case 7: *Acinetobacter baumannii* Outbreak in an ICU – Can Our Equipment Be at Fault? ................................................................. 19
8 Case 8: A Complication with the Use of the Intubating Fiberscope ................................................................. 21
9 Case 9: Interscalene Block a Concern in Cardiac Patients? ............... 23
10 Case 10: Epidural Analgesia for Labor – Watch Out.......................... 27
11 Case 11: Past History of Esophagectomy – Any Concern? ............... 29
12 Case 12: A Case of Myasthenia Gravis............................................. 33
13 Case 13: Where Are My Teeth?......................................................... 35
14 Case 14: An Unusual Capnograph Tracing........................................... 37
15 Case 15: A VP Shunt........................................................................... 41
16 Case 16: Shoulder Surgery – Watch Out!......................................... 43
17 Case 17: An Ambulatory Surgical Patient with No Escort .................. 45
18 Case 18: A Complication During Laparoscopy.................................... 49
19 Case 19: A Patient with Amyotrophic Lateral Sclerosis ....................... 51
20 Case 20: Repair of a Thoracic Duct ...................................................... 55
21 Case 21: Occluded Reinforced (Armored) Endotracheal Tube ........ 59
22 Case 22: A Difficult Nasogastric Tube Insertion .............................. 61
23 Case 23: Antiphospholipid Antibody Syndrome – Any Concern for General Anesthesia? ................................................................. 63
24 Case 24: An Airway Surprise ................................................................. 67
25 Case 25: Difficulty with Breathing in the Postoperative Period ........ 69
26 Case 26: Severe Systemic Local Anesthetic Toxicity ......................... 73
27 Case 27: A Motorcycle Accident with Neck Injury .......................... 77
28 Case 28: Thoracic Incisional Injury ..................................................... 81
29 Case 29: Bronchospasm – An Unusual Cause .................................. 83
30 Case 30: Post Bariatric Surgery – Any Concerns? ......................... 85
31 Case 31: Valuable Information from an Implanted Pacemaker ......... 87
32 Case 32: Allen’s Test in an Anesthetized Patient – Is It Possible?..... 89
33 Case 33: A Loss of the Only Oxygen Supply You Have During an Anesthetic .......................................................... 93
34 Case 34: An Aggressive Surgeon ....................................................... 97
35 Case 35: A Pharyngeal Mass ............................................................... 101
36 Case 36: Retained Laps .................................................................. 105
37 Case 37: A “Code Blue” .................................................................. 107
38 Case 38: A Complication of Transesophageal Echocardiography .......................................................... 109
39 Case 39: LMA in Elective Orthopedic Surgery ................................. 111
40 Case 40: What Would You Do? ......................................................... 115
41 Case 41: Preeclampsia .................................................................. 117
42 Case 42: A Failed “Test Dose” ......................................................... 119
43 Case 43: A Simple Cystoscopy with Biopsy .................................... 121
44 Case 44: An Orthopedic Trauma ..................................................... 125
45 Case 45: Blood in the Endotracheal Tube ....................................... 129
46 Case 46: A Longstanding Tracheostomy .......................................... 133
47 Case 47: An Airway Problem During Monitored Anesthesia Care

48 Case 48: Is the PatientExtubated?

49 Case 49: A Leaking Anesthesia Machine

50 Case 50: A Most Important Lesson

51 Case 51: Transsphenoidal Resection of a Pituitary Tumor

52 Case 52: Spinal Reconstruction and Fusion in a Chronic Pain Patient

53 Case 53: A Repeat Back Operation in a Patient Who Has Had Postoperative Visual Loss in the Past

54 Case 54: Respiratory Arrest in the Recovery Room

55 Case 55: Bispectral Index – What Does It Mean?

56 Case 56: Neonatal Laparoscopic Surgery

57 Case 57: Total IV Anesthesia

58 Case 58: An ICU Patient

59 Case 59: A New Onset of Atrial Fibrillation in the Recovery Room

60 Case 60: A Rapid Increase in Core Body Temperature

61 Case 61: Prolonged Surgery

62 Case 62: Persistent Intraoperative Hiccups – What to Do?

63 Case 63: Internal Jugular Cannulation

64 Case 64: Endobronchial Foreign Body

65 Case 65: A Cyst in Fourth Ventricle

66 Case 66: Generalized Convulsions After Regional Anesthesia

67 Case 67: Cardiac Arrest in a Prone Patient

68 Case 68: A Short Patient with a High BMI

69 Case 69: Bleeding After Oral Surgery

70 Case 70: Selecting the Right Size Double Lumen Tube

71 Case 71: A Low Normal Preoperative Blood Glucose Level

72 Case 72: Things to Remember When You Change a Cordis Catheter to a Triple Lumen
73  Case 73: An Intraoperative Malfunctioning Vaporizer ....................... 211
74  Case 74: An Abnormal EKG First Discovered in the Operating Room ................................................................. 215
75  Case 75: A Cardiac Arrest in ICU ................................................................. 219
76  Case 76: A Severe Case of Metabolic Acidosis ......................................... 221
77  Case 77: Bunionectomy Under Both General and Regional Anesthesia ................................................................. 223
78  Case 78: Now What Would You Do? .......................................................... 225
79  Case 79: A Strange Case ............................................................................. 227
80  Case 80: A Chronic Pain Patient ................................................................. 229

Index ................................................................................................................. 231
Case Studies of Near Misses in Clinical Anesthesia
Brock-Utne, MD, PhD, FFA(SA), J.G.
2011, XVI, 236 p. 4 illus., Softcover
ISBN: 978-1-4419-1178-0
