Contents

ACL2 and Its Applications to Digital System Verification ..................... 1
Matt Kaufmann and J Strother Moore

A Mechanically Verified Commercial SRT Divider .......................... 23
David M. Russinoff

Use of Formal Verification at Centaur Technology ........................... 65
Warren A. Hunt, Jr., Sol Swords, Jared Davis, and Anna Slobodova

Designing Tunable, Verifiable Cryptographic Hardware Using Cryptol ................................................................. 89
Sally Browning and Philip Weaver

Verifying Pipelines with BAT .......................................................145
Panagiotis Manolios and Sudarshan K. Srinivasan

Formal Verification of Partition Management for the AAMP7G Microprocessor ..............................................................175
Matthew M. Wilding, David A. Greve, Raymond J. Richards,
and David S. Hardin

Compiling Higher Order Logic by Proof .......................................193
Konrad Slind, Guodong Li, and Scott Owens

Specification and Verification of ARM Hardware and Software ........221
Anthony C. J. Fox, Michael J. C. Gordon, and Magnus O. Myreen

Information Security Modeling and Analysis ...............................249
David A. Greve

Modeling and Security Analysis of a Commercial Real-Time Operating System Kernel .............................................301
Raymond J. Richards
