Contents

Part I  Starting the Cell Division Cycle

1 Escape from Cellular Quiescence ................................................. 3
Elena Sotillo and Xavier Graña

2 Interplay Between Cyclin-Dependent Kinases and E2F-Dependent Transcription ......................................................... 23
Jun-Yuan Ji and Nicholas J. Dyson

3 Regulation of Pre-RC Assembly: A Complex Symphony Orchestrated by CDKs .......................................................... 43
A. Kathleen McClendon, Jeffry L. Dean, and Erik S. Knudsen

Part II  Proliferation Under Duress

4 Mitotic Checkpoint and Chromosome Instability in Cancer . . . . 59
Haomin Huang and Timothy J. Yen

5 Mitotic Catastrophe ................................................................. 79
Jeremy P.H. Chow and Randy Y.C. Poon

6 p53, ARF, and the Control of Autophagy ..................................... 97
Robert D. Hontz and Maureen E. Murphy

Part III  Long-Term Proliferation

7 Regulation of Self-Renewing Divisions in Normal and Leukaemia Stem Cells .......................................................... 109
Andrea Viale and Pier Giuseppe Pelicci

8 Maintenance of Telomeres in Cancer ........................................... 127
Eros Lazzerini Denchi

9 The Senescence Secretome and Its Impact on Tumor Suppression and Cancer .......................................................... 139
Alyssa Kennedy and Peter D. Adams
Part IV  Applications in Preventing and Treating Cancer

10  Cell Cycle Deregulation in Pre-neoplasia: Case Study of Barrett’s Oesophagus ................................. 157
   Pierre Lao-Sirieix and Rebecca C. Fitzgerald

11  Targeting Cyclin-Dependent Kinases for Cancer Therapy .... 167
   Neil Johnson and Geoffrey I. Shapiro

Index ......................................................... 187
Cell Cycle Deregulation in Cancer
Enders, G.H. (Ed.)
2010, VIII, 206 p. 19 illus., 11 illus. in color., Hardcover
