Contents

1 Introduction ................................................. 1
   Split-Brain Research and Symbolic Interaction’s Theory
   of Accounts: An Example of Convergence .................. 3
   Neurosociology and the Self .............................. 4
   Neuroscience and a Sociological Unit of Analysis ........ 5
   Examples of Mutual Interests ............................ 6
   Early Recognitions of Emergents .......................... 7
   Mind as Exerting a True Mental Force Over Its Parts .... 8
   Emotion’s Involvement in Rational Choice ................ 9
   Science’s Rediscovery of Chicago Pragmatism and Curbs
   on the Excesses of the Linguistic Turn .................... 9
   Transcending Exclusive Reductionism ...................... 10
   Some Generalizations About the Emotional Brain .......... 11
   Examples of Neurosociology .............................. 14
   Qualifications of Theories and Methods ................... 15
   Looking Ahead ............................................. 17
   References .................................................. 18

2 The Evolution of the Human Brain ......................... 21
   The Homo Sapiens Family Tree ............................ 24
   Suggestions About the Origins of Speech .................. 29
   Conclusion: Thoughts About Evolution and the Brain
   and the Function of Beliefs ................................ 34
   Important Developments in the Evolution of the Human Brain .. 36
   References .................................................. 37

3 What Is Social About the Human Brain? .................... 39
   Intersubjectivity .......................................... 40
   The Construction of Persons and Their Subjectivities .... 42
   Language, the Brain, and the Construction of One’s Self and Others . 42
   Misidentification Syndromes ................................ 44
   The Brain as Social ........................................ 44
   The Fusiform Facial Area ................................... 48
   The Importance of Eye Gaze in Social Life ................ 51

### Chapter 1: Autism as a Partial Loss of Social Connection
- 53

### Chapter 2: When the Social Environment Fails Our Social Brains:
- 55

### Chapter 3: A Neurosociological Interpretation of Isolation
- 57

### Chapter 4: Conclusion
- 59

### References
- 60

### Chapter 4: The New Unconscious: Agency and Awareness
- 63

#### Balancing Awareness and Unawareness
- 64

#### Consciousness as Center Stage in Symbolic Interaction
- 66

#### The New Unconscious as Procedure and Content
- 67

#### The Unconscious and Political Manipulation
- 78

#### My In-Group Right or Wrong
- 81

#### Conclusion
- 82

### References
- 83

### Chapter 5: Mirror Neurons: A Return to Pragmatism and Implications for an Embodied Intersubjectivity
- 85

#### Thinking as Internal Conversation and Motor Process
- 91

#### Mirror Neurons and Emotion
- 99

#### Conclusion
- 100

### References
- 103

### Chapter 6: The Neuroscience of Emotion and Its Relation to Cognition
- 105

#### Parts of the Brain Related to Emotion
- 112

#### Damasio’s Somatic-Marker Hypothesis
- 116

#### The Somatic-Marker Hypothesis
- 118

#### The Limbic System Debate
- 120

#### Challenges to Cognitive Appraisals Seen as an Inherent Part of Emotions
- 122

#### Conclusion
- 126

### References
- 127

### Chapter 7: The Self in Neuroscience and Social Psychology
- 129

#### Different Aspects of Self
- 129

#### The Brain Processes Behind the Social Self
- 140

#### The Recent Search for Dedicated Brain Areas Underlying the Self
- 142

#### Brain Areas Creating Self According to Zimmer
- 144

#### Epilogue About the Fragility of Self
- 154

### References
- 154

### Chapter 8: Consciousness, Quale, and Subjective Experience
- 157

#### What is Quale?
- 158

#### Thought, Sensations, and Mind
- 160

#### Positions on the Connection Between Consciousness and Qualia
- 163

#### Summary and Conclusions
- 167

### References
- 168
