# Contents

## Part I  Nonlinear and Discontinuous Dynamical Systems

1. **General Solution of a Vibration System with Damping Force of Fractional-Order Derivative** ........................................ 3  
   Z.H. Wang and X. Wang

2. **An Analytic Proof for the Sensitivity of Chaos to Initial Condition and Perturbations** ................................................ 13  
   J.H. Peng and J.S. Tang

3. **Study on the Multifractal Spectrum of Local Area Networks Traffic and Their Correlations** ................................. 23  
   Yan Liu and Jia-Zhong Zhang

4. **A Boundary Crisis in High Dimensional Chaotic Systems** ............... 31  
   Ling Hong, Yingwu Zhang, and Jun Jiang

5. **Complete Bifurcation Behaviors of a Henon Map** ...................... 37  
   Albert C.J. Luo and Yu Guo

6. **Study on the Performance of a Two-Degree-of-Freedom Chaotic Vibration Isolation System** ................................. 49  
   Jing-Jun Lou, Ying-Chun Wang, and Shi-Jian Zhu

7. **Simulation and Nonlinear Analysis of Panel Flutter with Thermal Effects in Supersonic Flow** ................................. 61  
   Kai-Lun Li, Jia-Zhong Zhang, and Peng-Fei Lei

8. **A Parameter Study of a Machine Tool with Multiple Boundaries** ................................. 77  
   Brandon C. Gegg, Steve C.S. Suh, and Albert C.J. Luo
9 A New Friction Model for Evaluating Energy Dissipation in Carbon Nanotube-Based Composites ........................................ 95
Yaping Huang and X.W. Tangpong

10 Nonlinear Response in a Rotor System With a Coulomb Spline .................................................................105
C. Nataraj and Karthik Kappaganthu

11 The Influence of the Cross-Coupling Effects on the Dynamics of Rotor/Stator Rubbing ...........................................121
Zhiyong Shang, Jun Jiang, and Ling Hong

Part II Time-delay Systems

12 Some Control Studies of Dynamical Systems with Time Delay .................................................................135
Bo Song and Jian-Qiao Sun

13 Stability and Hopf Bifurcation Analysis in Synaptically Coupled FHN Neurons with Two Time Delays .......................157
Dejun Fan and Ling Hong

14 On the Feedback Controlling of the Neuronal System with Time Delay .............................................................169
Hao Liu, Wuyin Jin, Chi Zhang, Ruicheng Feng, and Aihua Zhang

15 Control of Erosion of Safe Basins in a Single Degree of Freedom Yaw System of a Ship with a Delayed Position Feedback .................................................................177
Huilin Shang

Part III Switching and Stochastic Dynamical Systems

16 On Periodic Flows of a 3-D Switching System with Many Subsystems .................................................................189
Albert C.J. Luo and Yang Wang

17 Impulsive Control Induced Effects on Dynamics of Complex Networks .................................................................203
Xiuping Han and Xilin Fu

18 Study on Synchronization of Two Identical Uncoupled Neurons Induced by Noise ...................................................217
Ying Wu, Ling Hong, Jun Jiang, and Wuyin Jin

Contents

29 Complex Frequency Analysis of an Axially Moving String with Multiple Attached Oscillators by Using Green’s Function Method .............................................................371
Le-Feng Lü, Yue-Fang Wang, and Ying-Xi Liu

30 Model Reduction on Inertial Manifolds of Navier–Stokes Equations Through Multi-scale Finite Element ............................................................383
Jia-Zhong Zhang, Sheng Ren, and Guan-Hua Mei

31 Diesel Engine Condition Classification Based on Mechanical Dynamics and Time-Frequency Image Processing .................................................................397
Hongkun Li and Zhixin Zhang

32 Input Design for Systems Under Identification as Applied to Ultrasonic Transducers ..............................................................409
Nishant Unnikrishnan, Yicheng Pan, Marco Schoen, Ajay Mahajan, Jarlen Don, and Tsuchin Chu

33 Development of a Control System for Automating of Spiral Concentrators in Coal Preparation Plants ............................................................421
Josh Hoelscher, Yicheng Pan, Manoj Mohanty, Jarlen Don, Tsuchin Chu, and Ajay Mahajan

34 On the Rough Number Computation and the Ada Language ..............................................................437
Trong Wu
