## Contents

1 Analytical Approaches to Palaeolithic Technologies: An Introduction ................................................................. 1
   Stephen J. Lycett and Parth R. Chauhan

2 A Geometric Morphometric Assessment of Plan Shape in Bone and Stone Acheulean Bifaces from the Middle Pleistocene Site of Castel di Guido, Latium, Italy .................................................. 23
   August G. Costa

3 Regional Diversity Within the Core Technology of the Howiesons Poort Techno-Complex ............................................... 43
   Chris Clarkson

4 Questioning the Link Between Stone Tool Standardization and Behavioral Modernity ................................................................. 61
   Gilliane F. Monnier and Kieran P. McNulty

5 The Quantitative Analysis of Mobility: Ecological Techniques and Archaeological Extensions ................................................... 83
   Matt Grove

6 Metrical Variability Between South Asian Handaxe Assemblages: Preliminary Observations ................................................................. 119
   Parth R. Chauhan

7 Quantifying Variation in Landscape-Scale Behaviors: The Oldowan from Koobi Fora ................................................................. 167
   David R. Braun, Michael J. Rogers, John W. Harris, and Steven J. Walker

8 The Mathematics of Chaînes Opératoires ................................................................. 183
   P. Jeffrey Brantingham
