Contents

Part I The User’s Experience

1 Better Than New! Ethics for Assistive Technologists ........ 3
   Anita Silvers
   1.1 Introduction ............................................. 3
   1.2 Fear of Technology and Disability Discrimination .......... 4
   1.3 Sources of Assistive Technology Ethics .................... 6
       1.3.1 Engineering Ethics .............................. 6
       1.3.2 Medical Ethics .................................... 7
       1.3.3 At the Intersect of Medical and Engineering Ethics 9
   1.4 The Standard of Normality ............................... 10
   1.5 Justice ................................................ 11
   1.6 Conclusion ............................................. 13
   1.7 Afterword ............................................. 14
   References ................................................ 14

2 The Myth of Neutral Technology ............................. 17
   Jan Miller Polgar
   2.1 Source of the Data ...................................... 18
   2.2 Key Ideas Related to Meaning and Assistive Technology ... 19
       2.2.1 Assistive Technology as a Tool ..................... 19
       2.2.2 Assistive Technology as a Visible Sign of Disability . 20
   2.3 Implications for AT Design and Selection .................. 21
   References ................................................ 22

3 Accessible Technology and Models of Disability .......... 25
   Richard E. Ladner
   3.1 What is Assistive Technology ............................ 25
   3.2 Models of Disability .................................... 26
   3.3 Accessible Technology ................................. 27
   3.4 Concepts from Human–Computer Interaction ............... 28
3.5 New Directions in Accessible Technology .................. 29
3.6 Conclusion ........................................... 30
References ................................................. 31

4 The Importance of Play: AT for Children with Disabilities ............... 33
Albert M. Cook and Kim Adams
4.1 Background .......................................... 33
4.2 Robot Applications for Children ........................ 34
4.3 Robots and Cognitive Development in Children ........... 34
4.4 Robot Use by Very Young Typically Developing Children .. 36
4.5 Integrating Communication and Robotic Manipulation ..... 37
4.6 Summary ............................................ 37
References ................................................. 38

5 Need- and Task-Based Design and Evaluation ............ 41
Albert M. Cook, Jan Miller Polgar, and Nigel J. Livingston
5.1 Introduction .......................................... 41
5.2 Assistive Technology Abandonment ...................... 42
5.3 HAAT Model ......................................... 42
5.3.1 Human ....................................... 42
5.3.2 Activity ...................................... 43
5.3.3 Context ...................................... 43
5.3.4 Assistive Technology ........................... 44
5.4 Case Stories: Applying the HAAT Model ................. 44
5.4.1 Successful Projects ............................. 45
5.4.2 When Projects Don’t Go So Well................... 46
5.5 Discussion and Conclusions ............................. 47
References ................................................. 47

Part II Research and Academic Outreach

6 Challenges to Effective Evaluation of Assistive Technology 51
Richard Simpson
6.1 Introduction .......................................... 51
6.2 Evaluating Technology in the Lab ........................ 52
6.3 Evaluating Technology in the Clinic ................... 53
6.4 Evaluating Technology in the World ..................... 54
6.5 Conclusions .......................................... 55
References ................................................. 55

7 Community Service in University Curricula ............ 57
Nigel J. Livingston
7.1 Introduction .......................................... 57
7.2 The Need and Opportunity ............................. 58
7.3 The CanAssist Model and History ........................ 59
Part III Development and Commercialization

10 The Fast Pace of New Emerging Information and Communication Technologies: The Need for Regulations and Standards ........................................... 97
   Gary E. Birch
   10.1 Introduction ............................................ 97
   10.2 Examples of ICT: A Barrier or an Enabler ............... 98
   10.3 Three Strategies ....................................... 99
   10.4 The Need for Regulations and Standards ................. 100
   10.5 Concluding Remarks .................................... 102
   References ................................................................ 103

11 Small Markets in Assistive Technology: Obstacles and Opportunities .................................................. 105
   Jaimie F. Borisoff
   11.1 Small Market Obstacles .................................. 106
       11.1.1 Obstacles Beyond AT ............................ 106
       11.1.2 AT-Specific Obstacles ....................... 108
   11.2 Small Market Opportunities ............................. 109
   11.3 New Opportunities in Small Market Innovation ......... 111
   11.4 Afterword .............................................. 112
   References .................................................. 112

Index ........................................................................ 115
Design and Use of Assistive Technology
Social, Technical, Ethical, and Economic Challenges
Oishi, M.M.K.; Mitchell, I.M.; Van der Loos, H.F.M. (Eds.)
2010, XX, 117 p., Hardcover
