Contents

Part I  Computational Methods for Microarray, Gene Expression Analysis, and Gene Regulatory Networks

1 A Technical Platform for Generating Reproducible Expression Data from *Streptomyces coelicolor* Batch Cultivations ................................................................. 3

2 MiRNA Recognition with the *yasMiR* System: The Quest for Further Improvements ................................................... 17
Daniel Pasailă, Andrei Sucilă, Irina Mohorianu, Ștefan Panțiru, and Liviu Ciortuz

3 Top Scoring Pair Decision Tree for Gene Expression Data Analysis .................................................................................. 27
Marcin Czajkowski and Marek Krętowski

4 Predictive Minimum Description Length Principle Approach to Inferring Gene Regulatory Networks .......................... 37
Vijender Chaitankar, Chaoyang Zhang, Preetam Ghosh, Ping Gong, Edward J. Perkins, and Youping Deng

5 Parsimonious Selection of Useful Genes in Microarray Gene Expression Data ................................................................. 45
Félix F. González-Navarro and Lluís A. Belanche-Muñoz

6 Hierarchical Signature Clustering for Time Series Microarray Data .................................................................................. 57
Lars Koenig and Eunseog Youn
Contents

7 Microarray Database Mining and Cell Differentiation
  Defects in Schizophrenia ..................................................... 67
  Aurelian Radu, Gabriela Hristescu,
  Pavel Katsel, Vahram Haroutunian,
  and Kenneth L. Davis

8 miRNA Prediction Using Computational Approach ...................... 75
  A.K. Mishra and D.K. Lobiyal

9 Improving the Accuracy of Gene Expression Profile
  Classification with Lorenz Curves and Gini Ratios ....................... 83
  Quoc-Nam Tran

10 Feature Selection in Gene Expression Data Using
  Principal Component Analysis and Rough Set Theory .................... 91
  Debahuti Mishra, Rajashree Dash, Amiya Kumar Rath,
  and Milu Acharya

11 Dramatically Reduced Precision in Microarray Analysis
  Retains Quantitative Properties and Provides Additional
  Benefits ..............................................................................101
  William C. Ray

12 Algebraic Model Checking for Boolean Gene Regulatory
  Networks ............................................................................113
  Quoc-Nam Tran

13 Comparative Advantages of Novel Algorithms Using MSR
  Threshold and MSR Difference Threshold for Biclustering
  Gene Expression Data ........................................................123
  Shyama Das and Sumam Mary Idicula

14 Performance Comparison of SLFN Training Algorithms
  for DNA Microarray Classification ..........................................135
  Hieu Trung Huynh, Jung-Ja Kim, and Yonggwan Won

15 Clustering Microarray Data to Determine Normalization
  Method ..............................................................................145
  Marie Vendettuoli, Erin Doyle, and Heike Hofmann

Part II Bioinformatics Databases, Data Mining, and Pattern
  Discovery Techniques

16 Estimation, Modeling, and Simulation of Patterned
  Growth in Extreme Environments .............................................157
  B. Strader, K.E. Schubert, M. Quintana, E. Gomez, J. Curnutt,
  and P. Boston
17 Performance of Univariate Forecasting on Seasonal Diseases: The Case of Tuberculosis ..................................................171
Adhistya Erna Permanasari, Dayang Rohaya Awang Rambli, and P. Dhanapal Durai Dominic

18 Predicting Individual Affect of Health Interventions to Reduce HPV Prevalence ....................................................181
Courtney D. Corley, Rada Mihalcea, Armin R. Mikler, and Antonio P. Sanfilippo

19 Decision Tree and Ensemble Learning Algorithms with Their Applications in Bioinformatics...............................191
Dongsheng Che, Qi Liu, Khaled Rasheed, and Xiuping Tao

20 Pattern Recognition of Surface EMG Biological Signals by Means of Hilbert Spectrum and Fuzzy Clustering .................201
Ruben-Dario Pinzon-Morales, Katherine-Andrea Baquero-Duarte, Alvaro-Angel Orozco-Gutierrez, and Victor-Hugo Grisales-Palacio

21 Rotation of Random Forests for Genomic and Proteomic Classification Problems .......................................................211
Gregor Stiglic, Juan J. Rodriguez, and Peter Kokol

22 Improved Prediction of MHC Class I Binders/Non-Binders Peptides Through Artificial Neural Network Using Variable Learning Rate: SARS Corona Virus, a Case Study ..........................................................223
Sudhir Singh Soam, Bharat Bhasker, and Bhartendu Nath Mishra

Part III Protein Classification and Structure Prediction, and Computational Structural Biology

23 Fast Three-Dimensional Noise Reduction for Real-Time Electron Tomography .........................................................233
José Antonio Martínez and José Jesús Fernández

24 Prediction of Chemical-Protein Binding Activity Using Contrast Graph Patterns .........................................................243
Andrzej Dominik, Zbigniew Walczak, and Jacek Wojciechowski

25 Topological Constraint in High-Density Cells’ Tracking of Image Sequences .................................................................255
Chunming Tang, Ling Ma, and Dongbin Xu
26  STRIKE: A Protein–Protein Interaction Classification Approach .................................................................263
    Nazar Zaki, Wassim El-Hajj, Hesham M. Kamel, and Fadi Sibai

27  Cooperativity of Protein Binding to Vesicles .........................................................271
    Francisco Torrens and Gloria Castellano

28  The Role of Independent Test Set in Modeling of Protein Folding Kinetics ..................279
    Nikola Štambuk and Paško Konjevoda

Part IV  Comparative Sequence, Genome Analysis, Genome Assembly, and Genome Scale Computational Methods

29  Branch-and-Bound Approach for Parsimonious Inference of a Species Tree from a Set of Gene Family Trees .....................287
    Jean-Philippe Doyon and Cedric Chauve

30  Sequence-Specific Sequence Comparison Using Pairwise Statistical Significance .........................................................297
    Ankit Agrawal, Alok Choudhary, and Xiaoqiu Huang

31  Modelling Short Time Series in Metabolomics: A Functional Data Analysis Approach ..................................................307
    Giovanni Montana, Maurice Berk, and Tim Ebbels

32  Modeling of Gene Therapy for Regenerative Cells Using Intelligent Agents .................................................................317
    Aya Sedky Adly, Amal Elsayed Aboutabl, and M. Shaarawy Ibrahim

33  Biomarkers Discovery in Medical Genomics Data ......................................................327
    A. Benis and M. Courtine

34  Computer Simulation on Disease Vector Population Replacement Driven by the Maternal Effect Dominant Embryonic Arrest ..................................................335
    Mauricio Guevara-Souza and Edgar E. Vallejo

35  Leukocytes Segmentation Using Markov Random Fields ........................................345
    C. Reta, L. Altamirano, J.A. Gonzalez, R. Diaz, and J.S. Guichard
Part V Experimental Medicine and Analysis Tools

36 Ontology-Based Knowledge Discovery in Pharmacogenomics .........................................................357
Adrien Coulet, Malika Smaïl-Tabbone, Amedeo Napoli, and Marie-Dominique Devignes

37 Enabling Heterogeneous Data Integration and Biomedical Event Prediction Through ICT: The Test Case of Cancer Reoccurrence .................................................................367
Marco Picone, Sebastian Steger, Konstantinos Exarchos, Marco De Fazio, Yorgos Goletsis, Dimitrios I. Fotiadis, Elena Martinelli, and Diego Ardigò

38 Complexity and High-End Computing in Biology and Medicine ....................................................377
Dimitri Perrin

39 Molecular Modeling Study of Interaction of Anthracenedione Class of Drug Mitoxantrone and Its Analogs with DNA Tetrameric Sequences ........................................385
Pamita Awasthi, Shilpa Dogra, Lalit K. Awasthi, and Ritu Barthwal

40 A Monte Carlo Analysis of Peritoneal Antimicrobial Pharmacokinetics ........................................401
Sanjukta Hota, Philip Crooke, and John Hotchkiss

Part VI Computational Methods for Filtering, Noise Cancellation, and Signal and Image Processing

41 Histopathology Tissue Segmentation by Combining Fuzzy Clustering with Multiphase Vector Level Sets .................................................................413
Filiz Bunyak, Adel Hafiane, and Kannappan Palaniappan

42 A Dynamically Masked Gaussian Can Efficiently Approximate a Distance Calculation for Image Segmentation .........................................................425
Shareef M. Dabdoub, Sheryl S. Justice, and William C. Ray

43 Automatic and Robust System for Correcting Microarray Images’ Rotations and Isolating Spots .........................433
Anlei Wang, Naima Kaabouch, and Wen-Chen Hu
