## Contents

1. **The Human Genome, Microbiomes, and Disease**
   Jonathan H. Badger, Pauline C. Ng, and J. Craig Venter

2. **Host Genotype and the Effect on Microbial Communities**
   Sebastian Tims, Erwin G. Zoetendal, Willem M. de Vos, and Michiel Kleerebezem

3. **The Human Microbiome and Host–Pathogen Interactions**
   Mark J. Pallen

4. **The Human Virome**
   Matthew Haynes and Forest Rohwer

5. **Selection and Sequencing of Strains as References for Human Microbiome Studies**
   Eline S. Klaassens, Mark Morrison, and Sarah K. Highlander

6. **The Human Vaginal Microbiome**
   Brenda A. Wilson, Susan M. Thomas, and Mengfei Ho

7. **The Human Lung Microbiome**
   Liliana Losada, Elodie Ghedin, Alison Morris, Hong Wei Chu, and William C. Nierman

8. **The Human Skin Microbiome in Health and Skin Diseases**
   Huiying Li

9. **The Human Oral Metagenome**
   Peter Mullany, Philip Warburton, and Elaine Allan

10. **The Human and His Microbiome Risk Factors for Infections**
    Marie-France de La Cochetière and Emmanuel Montassier

11. **Infectogenomics: Aspect of Host Responses to Microbes in Digestive Tract**
    Zongxin Ling and Charlie Xiang

12. **Autoimmune Disease and the Human Metagenome**
    Amy D. Proal, Paul J. Albert, and Trevor G. Marshall
13 Metagenomic Applications and the Potential for Understanding Chronic Liver Disease ............. 277
   Bernd Schnabl

14 Symbiotic Gut Microbiota and the Modulation of Human Metabolic Phenotypes .................. 297
   Lanjuan Li

15 MetaHIT: The European Union Project on Metagenomics of the Human Intestinal Tract ........ 307
   S. Dusko Ehrlich and The MetaHIT Consortium

16 Implications of Human Microbiome Research for the Developing World .......................... 317
   Appolinaire Djikeng, Barbara Jones Nelson, and Karen E. Nelson

Index .......................................................... 337
Metagenomics of the Human Body
Nelson, K.E. (Ed.)
2011, XVII, 351 p., Hardcover
ISBN: 978-1-4419-7088-6
