Contents

1 Introduction ................................................................. 1
  1.1 An Overview on Cooperative Communications .......... 1
  1.2 Brief History of Cooperative and Relay Channels ....... 5
  1.3 Standardization of Cooperative Communication and Relay
       Technology ......................................................... 6
  1.4 Book Outline ....................................................... 8
References ................................................................. 10

2 Review of Wireless Communications and MIMO
   Techniques ............................................................... 15
  2.1 Characteristics of Wireless Channels ......................... 15
    2.1.1 Path Loss .................................................... 15
    2.1.2 Shadowing Effect ........................................... 18
    2.1.3 Multipath Fading ........................................... 19
  2.2 Techniques to Exploit Spatial Diversity ....................... 25
    2.2.1 Single-Input Multiple-Output (SIMO) System .......... 26
    2.2.2 Multiple-Input Single-Output (MISO) System .......... 35
    2.2.3 Multiple-Input Multiple-Output (MIMO) System ....... 44
  2.3 Capacity of Wireless Channels ................................... 48
    2.3.1 Capacity of AWGN Channels ............................... 48
    2.3.2 Capacity of Flat Fading Channels ....................... 49
    2.3.3 Capacity with Multiple Antennas ....................... 52
  2.4 Diversity-and-Multiplexing Tradeoff ......................... 58
References ................................................................. 63

3 Two-User Cooperative Transmission Schemes ..................... 67
  3.1 Decode-and-Forward Relaying Schemes ......................... 67
    3.1.1 Basic DF Relaying Scheme ................................ 68
    3.1.2 Selection DF Relaying Scheme ............................ 78
    3.1.3 Demodulate-and-Forward Relaying Scheme ............... 81
  3.2 Amplify-and-Forward Relaying Schemes ....................... 87
### 3.2.1 Basic AF Relaying Scheme
- Page 88

### 3.2.2 Incremental AF Relaying Scheme
- Page 100

### 3.3 Coded Cooperation
- Page 102
  - ### 3.3.1 Basic Coded Cooperation Scheme
- Page 103
  - ### 3.3.2 User Multiplexing for Coded Cooperation
- Page 106

### 3.4 Compress-and-Forward Relaying Schemes
- Page 114

### 3.5 Channel Estimation in Single Relay Systems
- Page 115

### References

### 4 Cooperative Transmission Schemes with Multiple Relays
- Page 125
  - ### 4.1 Orthogonal Cooperation
    - ### 4.1.1 Orthogonal Cooperation with AF Relays
    - Page 127
    - ### 4.1.2 Orthogonal Cooperation with DF Relays
    - Page 133
  - ### 4.2 Transmit Beamforming
    - ### 4.2.1 Transmit Beamforming with AF Relays
    - Page 135
    - ### 4.2.2 Transmit Beamforming with DF Relays
    - Page 141
  - ### 4.3 Selective Relaying
    - ### 4.3.1 Selective Relaying with AF Relays
    - Page 147
    - ### 4.3.2 Selective Relaying with DF Relays
    - Page 150
  - ### 4.4 Distributed Space-Time Coding (DSTC)
    - ### 4.4.1 Distributed Space-Time Coding with DF Relays
    - Page 153
    - ### 4.4.2 Distributed Space-Time Coding with AF Relays
    - Page 161
  - ### 4.5 Channel Estimation in Multi-Relay Systems
    - ### 4.5.1 Training Design for AF Multi-Relay Systems
    - Page 168
    - ### 4.5.2 Training Design for DF Multi-Relay Systems
    - Page 173
  - ### 4.6 Other Topics on Multi-Relay Cooperative Communications
    - ### 4.6.1 Multi-Hop Cooperative Transmissions
    - Page 178
    - ### 4.6.2 Asynchronous Cooperative Transmissions
    - Page 187

### References

### 5 Fundamental Limits of Cooperative and Relay Networks
- Page 193
  - ### 5.1 Gaussian Relay Channels
    - ### 5.1.1 Cut-Set Bound of Gaussian Relay Channels
    - Page 194
    - ### 5.1.2 Decode-and-Forward and Degraded Relay Channels
    - Page 197
    - ### 5.1.3 Compress-and-Forward
    - Page 201
  - ### 5.2 Single-Relay Fading Channels
    - ### 5.2.1 Ergodic Capacity
    - Page 203
    - ### 5.2.2 Diversity and Multiplexing Tradeoffs
    - Page 207
  - ### 5.3 Multi-Relay Networks
    - ### 5.3.1 Upper Bound of Gaussian Multi-Relay Networks
    - Page 214
    - ### 5.3.2 Lower bound of Gaussian Multi-Relay Networks and Asymptotic Capacity Results
    - Page 216
    - ### 5.3.3 Multi-Relay Fading Channels
    - Page 219

6 Cooperative Communications with Multiple Sources

6.1 Time/Frequency-Division Multiple Access (TDMA/FDMA)
6.1.1 Round-Robin Scheduling
6.1.2 Opportunistic Scheduling

6.2 Code-Division Multiple Access (CDMA)
6.2.1 Uplink CDMA with Designated Relays
6.2.2 Uplink CDMA with Shared Relays

6.3 Space-Division Multiple Access (SDMA)

6.4 Partner Selection Strategies
6.4.1 Centralized Partner Selection Strategy
6.4.2 Decentralized Partner Selection Strategy
