## Contents

1 **Spontaneous Emission Control in a Plasmonic Structure**  
Hideo Iwase, Yiyang Gong, Dirk Englund, and Jelena Vučković  

2 **Surface Plasmon Enhanced Solid-State Light-Emitting Devices**  
Koichi Okamoto  

3 **Polariton Devices Based on Wide Bandgap Semiconductor Microcavities**  
Ryoko Shimada, Ümit Özgür, and Hadis Morkoç  

4 **Search for Negative Refraction in the Visible Region of Light by Fluorescent Microscopy of Quantum Dots Infiltrated into Regular and Inverse Synthetic Opals**  
R. Moussa, A. Kuznetsov, E. Neiser, and A.A. Zakhidov  

5 **Self-Assembled Guanosine-Based Nanoscale Molecular Photonic Devices**  
Jianyou Li, Hadis Morkoç, and Arup Neogi  

6 **Carbon Nanotubes for Optical Power Limiting Applications**  
Shamim Mirza, Salma Rahman, Abhijit Sarkar, and George Rayfield  

7 **Field Emission Properties of ZnO, ZnS, and GaN Nanostructures**  

8 **Growth, Optical, and Transport Properties of Self-Assembled InAs/InP Nanostructures**  
Oliver Bierwagen, Yuriy I. Mazur, Georgiy G. Tarasov, W. Ted Masselink, and Gregory J. Salamo  

**Index**
Nanoscale Photonics and Optoelectronics
Wang, Z.M.; Neogi, A. (Eds.)
2010, XI, 231 p., Hardcover
ISBN: 978-1-4419-7233-0
