Preface to the Third Edition	v
Preface to the Second Edition	vii
1 The Complex Numbers	1
Introduction	1
1.1 The Field of Complex Numbers	1
1.2 The Complex Plane	4
1.3 The Solution of the Cubic Equation	9
1.4 Topological Aspects of the Complex Plane	12
1.5 Stereographic Projection; The Point at Infinity	16
Exercises	18
2 Functions of the Complex Variable z	21
Introduction	21
2.1 Analytic Polynomials	21
2.2 Power Series	25
2.3 Differentiability and Uniqueness of Power Series	28
Exercises	32
3 Analytic Functions	35
3.1 Analyticity and the Cauchy-Riemann Equations	35
3.2 The Functions e^z , $\sin z$, $\cos z$	40
Exercises	41
4 Line Integrals and Entire Functions	45
Introduction	45
4.1 Properties of the Line Integral	45
4.2 The Closed Curve Theorem for Entire Functions	52
Exercises	56

- 5 Properties of Entire Functions** 59
 - 5.1 The Cauchy Integral Formula and Taylor Expansion for Entire Functions 59
 - 5.2 Liouville Theorems and the Fundamental Theorem of Algebra; The Gauss-Lucas Theorem 65
 - 5.3 Newton’s Method and Its Application to Polynomial Equations 68
 - Exercises 74
- 6 Properties of Analytic Functions** 77
 - Introduction 77
 - 6.1 The Power Series Representation for Functions Analytic in a Disc . . 77
 - 6.2 Analytic in an Arbitrary Open Set 81
 - 6.3 The Uniqueness, Mean-Value, and Maximum-Modulus Theorems; Critical Points and Saddle Points 82
 - Exercises 90
- 7 Further Properties of Analytic Functions** 93
 - 7.1 The Open Mapping Theorem; Schwarz’ Lemma 93
 - 7.2 The Converse of Cauchy’s Theorem: Morera’s Theorem; The Schwarz Reflection Principle and Analytic Arcs 98
 - Exercises 104
- 8 Simply Connected Domains** 107
 - 8.1 The General Cauchy Closed Curve Theorem 107
 - 8.2 The Analytic Function $\log z$ 113
 - Exercises 116
- 9 Isolated Singularities of an Analytic Function** 117
 - 9.1 Classification of Isolated Singularities; Riemann’s Principle and the Casorati-Weierstrass Theorem 117
 - 9.2 Laurent Expansions 120
 - Exercises 126
- 10 The Residue Theorem** 129
 - 10.1 Winding Numbers and the Cauchy Residue Theorem 129
 - 10.2 Applications of the Residue Theorem 135
 - Exercises 141
- 11 Applications of the Residue Theorem to the Evaluation of Integrals and Sums** 143
 - Introduction 143
 - 11.1 Evaluation of Definite Integrals by Contour Integral Techniques . . . 143
 - 11.2 Application of Contour Integral Methods to Evaluation and Estimation of Sums 151
 - Exercises 158

12 Further Contour Integral Techniques	161
12.1 Shifting the Contour of Integration	161
12.2 An Entire Function Bounded in Every Direction	164
Exercises	167
13 Introduction to Conformal Mapping	169
13.1 Conformal Equivalence	169
13.2 Special Mappings	175
13.3 Schwarz-Christoffel Transformations	187
Exercises	192
14 The Riemann Mapping Theorem	195
14.1 Conformal Mapping and Hydrodynamics.....	195
14.2 The Riemann Mapping Theorem.....	200
14.3 Mapping Properties of Analytic Functions on Closed Domains	204
Exercises	213
15 Maximum-Modulus Theorems for Unbounded Domains	215
15.1 A General Maximum-Modulus Theorem	215
15.2 The Phragmén-Lindelöf Theorem	218
Exercises	223
16 Harmonic Functions	225
16.1 Poisson Formulae and the Dirichlet Problem	225
16.2 Liouville Theorems for $\operatorname{Re} f$; Zeroes of Entire Functions of Finite Order	233
Exercises	238
17 Different Forms of Analytic Functions	241
Introduction	241
17.1 Infinite Products	241
17.2 Analytic Functions Defined by Definite Integrals	249
17.3 Analytic Functions Defined by Dirichlet Series	251
Exercises	255
18 Analytic Continuation; The Gamma and Zeta Functions	257
Introduction	257
18.1 Power Series	257
18.2 Analytic Continuation of Dirichlet Series.....	263
18.3 The Gamma and Zeta Functions	265
Exercises	271

- 19 Applications to Other Areas of Mathematics** 273
 - Introduction 273
 - 19.1 A Variation Problem 273
 - 19.2 The Fourier Uniqueness Theorem 275
 - 19.3 An Infinite System of Equations 277
 - 19.4 Applications to Number Theory 278
 - 19.5 An Analytic Proof of The Prime Number Theorem..... 285
 - Exercises 290

- Answers** 291

- References** 319

- Appendices** 321

- Index** 325
