

# Contents

<b>1</b>	<b>Introduction</b> .....	1
<b>2</b>	<b>How to Measure the Temperature</b> .....	5
	2.1 Thermoscopes and Thermometers .....	5
	2.2 Spectral Temperature .....	12
	2.3 Chemical Temperature .....	23
	Problems .....	27
<b>3</b>	<b>How to Interpret the Temperature</b> .....	29
	3.1 The Temperature as an Equilibrium Parameter .....	30
	3.2 The Temperature Related to an Integrating Factor .....	46
	3.3 The Temperature Related to a Lagrange Multiplier .....	53
	3.4 The Temperature as a Property of the Noise .....	60
	Problems .....	70
<b>4</b>	<b>Fluctuating Temperature</b> .....	73
	4.1 Microcanonical Temperature Distribution .....	74
	4.2 Fluctuations in Finite Phase Space .....	78
	4.3 Near-equilibrium Fluctuations .....	86
	4.4 Superstatistics .....	89
	4.5 Canonical Enhancement .....	92
	Problems .....	98
<b>5</b>	<b>Complications with the Temperature</b> .....	99
	5.1 Colored and Multiplicative Noise .....	100
	5.2 Fisher Entropy .....	115
	5.3 Thermodynamics of Abstract Composition Rules .....	120
	Problems .....	143
<b>6</b>	<b>The Temperature of Moving Bodies</b> .....	145
	6.1 Relativistic Thermodynamics .....	146
	6.2 Disputes About the Temperature at Relativistic Velocities .....	146

- 6.3 Thermodynamics of Energy and Momentum Exchange . . . . . 148
- 6.4 Relativistic Thermal Equilibrium . . . . . 157
- Problems . . . . . 164
  
- 7 The Temperature of no Return . . . . . 165**
  - 7.1 Temperature due to Acceleration: The Unruh Effect . . . . . 166
  - 7.2 Formal Entropy and Temperature for Black Holes . . . . . 170
  - 7.3 Quark Matter Equation of State from Dual Gravity Models . . . . . 200
  - Problems . . . . . 219
  
- 8 The Temperature in Quantum Field Theory . . . . . 221**
  - 8.1 Imaginary Time Formalism . . . . . 221
  - 8.2 Off Equilibrium Field Theory . . . . . 233
  - 8.3 Feynman Path Integral and Canonical Partition Sum . . . . . 238
  - 8.4 Quantization due to Higher-Dimensional Chaotic Dynamics . . . . . 255
  - Problems . . . . . 264
  
- Afterword . . . . . 265**
  
- Solutions . . . . . 269**
  
- References . . . . . 305**
  
- Index . . . . . 309**

Is There a Temperature?  
Conceptual Challenges at High Energy, Acceleration  
and Complexity

Biró, T.S.

2011, XIV, 310 p., Hardcover

ISBN: 978-1-4419-8040-3
