## Part I Preliminaries to Cognitive Load Theory

<b>1 Categories of Knowledge: An Evolutionary Approach .....</b>	<b>3</b>
Why Instructional Design Needs to Distinguish Between Biologically Primary and Secondary Knowledge.....	4
Biologically Primary Knowledge.....	5
Biologically Secondary Knowledge.....	6
Instructional Consequences .....	8
Instructional Consequences Associated with Biologically Primary Knowledge.....	8
Instructional Consequences of Biologically Secondary Knowledge.....	11
Conclusions.....	13

## Part II Human Cognitive Architecture

<b>2 Amassing Information: The Information Store Principle.....</b>	<b>17</b>
How Natural Information Processing Systems Store Information.....	17
Evolutionary Biology .....	17
Human Cognition: Long-Term Memory .....	18
Instructional Implications .....	24
Conclusions.....	25
<b>3 Acquiring Information: The Borrowing and Reorganising     Principle and the Randomness as Genesis Principle .....</b>	<b>27</b>
The Borrowing and Reorganising Principle.....	27
Biological Evolution.....	27
Human Cognition .....	28
Instructional Implications.....	31
Conclusions.....	31
Randomness as Genesis Principle.....	32
Biological Evolution.....	32

Human Cognition .....	33
Instructional Implications.....	36
Conclusions.....	37
<b>4 Interacting with the External Environment: The Narrow Limits of Change Principle and the Environmental Organising and Linking Principle.....</b>	<b>39</b>
Narrow Limits of Change Principle .....	40
Biological Evolution.....	40
Human Cognition .....	41
Instructional Implications.....	44
Conclusions.....	45
The Environmental Organising and Linking Principle .....	46
Biological Evolution.....	46
Human Cognition .....	48
Instructional Implications.....	50
Conclusions.....	50
Summary of Structures and Functions of Human Cognitive Architecture.....	51
 <b>Part III Categories of Cognitive Load</b>	
<b>5 Intrinsic and Extraneous Cognitive Load.....</b>	<b>57</b>
Additivity of Intrinsic and Extraneous Cognitive Load.....	58
Element Interactivity.....	58
Element Interactivity and Intrinsic Cognitive Load.....	59
Task Difficulty .....	61
Understanding .....	62
Altering Intrinsic Cognitive Load .....	64
Relations of Intrinsic Cognitive Load to Human Cognitive Architecture .....	65
Element Interactivity and Extraneous Cognitive Load .....	66
Instructional Implications .....	67
Conclusions.....	68
 <b>6 Measuring Cognitive Load.....</b>	<b>71</b>
Indirect Measures of Cognitive Load.....	71
Computational Models .....	71
Performance During Acquisition.....	72
Error Profiles Between Problems .....	72
Subjective Measures of Cognitive Load .....	73
A Subjective Measure of Mental Effort .....	73
A Subjective Measure of Difficulty.....	73

- Variations in Subjective Ratings..... 74
- Consistency of the Subjective Measures ..... 74
- Efficiency Measures..... 75
  - Issues with Calculating Efficiency ..... 77
- Measuring Cognitive Load Through a Secondary Task..... 77
- Physiological Measures of Cognitive Load ..... 80
- Measuring the Different Types of Cognitive Load ..... 81
- Summary ..... 85

**Part IV Cognitive Load Effects**

- 7 The Goal-Free Effect ..... 89**
  - Empirical Evidence for the Goal-Free Effect ..... 91
  - Alternative Explanations of the Goal-Free Effect..... 93
    - A Dual-Space Explanation ..... 93
    - An Attentional Focus Explanation ..... 96
    - A Subjective Measure of Cognitive Load and the Goal-Free Effect..... 97
  - Conditions of Applicability..... 97
  - Instructional Implications ..... 98
  - Conclusions..... 98
- 8 The Worked Example and Problem Completion Effects ..... 99**
  - Basic Empirical Evidence ..... 100
    - Worked Examples in Mathematics and Related Domains ..... 100
    - Worked Examples and Ill-Structured Learning Domains ..... 102
    - Worked Examples in Non-Laboratory-Based Experiments ..... 104
    - Worked Examples and the Alternation Strategy ..... 104
  - The Problem Completion Effect ..... 105
  - Critiques of the Use of Worked Examples..... 106
  - Conditions of Applicability..... 107
  - Instructional Implications ..... 108
  - Conclusions..... 108
- 9 The Split-Attention Effect ..... 111**
  - Various Categories of the Split-Attention Effect ..... 113
    - Worked Examples and the Split-Attention Effect ..... 114
      - Diagrams and Written Explanations..... 116
      - Multiple Sources of Text ..... 119
      - More Than Two Sources of Information ..... 119
      - Split-Attention While Learning to Use a Computer..... 120
  - Split-Attention and Other Cognitive Load Theory Effects ..... 122
  - Temporal Split-Attention ..... 122
  - Alternative Methods to Overcome Split-Attention ..... 124

- Directing Attention and the Split-Attention Effect ..... 124
- The Pop-Up Alternative to Text Integration ..... 125
- Procedural Information and the Split-Attention Effect ..... 126
- Learner Integration of Split-Source Materials ..... 126
- A Meta-Analysis of the Split-Attention Effect ..... 127
- Conditions of Applicability ..... 127
- Instructional Implications ..... 128
- Conclusions ..... 128
  
- 10 The Modality Effect ..... 129**
- The Effect of Replacing Written with Spoken Text ..... 130
- The Modality Effect in Interactive Learning Environments ..... 132
- Factors Moderating the Modality Effect ..... 134
  - Levels of Element Interactivity ..... 135
  - Pacing of Presentations ..... 135
  - An Alternative Explanation for the Reverse Modality Effect ..... 136
  - Reducing Visual Search ..... 137
- Summary of Conditions of Applicability ..... 138
- Instructional Implications ..... 139
- Conclusion ..... 140
  
- 11 The Redundancy Effect ..... 141**
- Some Empirical Evidence for the Redundancy Effect ..... 142
- The Effect of Simultaneously Presented Written and Spoken Text ..... 144
- The Redundancy Effect in Second/Foreign Language Learning ..... 146
- Evidence for the Redundancy Effect in Pre-Cognitive Load Theory Research ..... 148
- Factors Moderating the Redundancy Effect ..... 149
  - Independence of Information Sources ..... 149
  - Levels of Element Interactivity ..... 150
  - Pacing of Presentations ..... 150
  - The Length of Instructional Segments ..... 151
- Summary of Conditions of Applicability ..... 152
- Instructional Implications ..... 153
- Conclusions ..... 154
  
- 12 The Expertise Reversal Effect ..... 155**
- Some Empirical Evidence for the Expertise Reversal Effect ..... 156
  - Longitudinal Studies ..... 157
  - Cross-Sectional Studies Using Worked Examples and Other Forms of Guidance ..... 159
  - Expertise Reversal and the Isolated Elements Effect ..... 162
  - Expertise Reversal and the Variability Effect ..... 163

Pre-Training and the Expertise Reversal Effect .....	164
Expertise Reversal for Multimedia and Hypermedia Representations .....	165
The Expertise Reversal Effect and Aptitude-Treatment Interactions .....	167
Conditions of Applicability of the Expertise Reversal Effect.....	167
Instructional Implications .....	168
Conclusions.....	169
<b>13 The Guidance Fading Effect .....</b>	<b>171</b>
Empirical Evidence for the Guidance Fading Effect .....	172
Effects of Fading Worked-Out Solution Steps.....	173
Knowledge-Dependent Dynamic Provision of Guidance.....	174
The Effect of a Gradual Change in Levels of Support Using Computer-Based Tutors.....	176
Applying Rapid Assessment Techniques to the Design of Adaptive Fading Procedures .....	177
Conditions of Applicability of the Fading Effect.....	181
Instructional Implications .....	182
Conclusions.....	182
<b>14 Facilitating Effective Mental Processes: The Imagination and Self-Explanation Effects.....</b>	<b>183</b>
The Imagination Effect .....	183
The Imagination Effect Prior to Cognitive Load Theory Research .....	185
Empirical Evidence for the Imagination Effect Within a Cognitive Load Theory Context.....	186
The Self-Explanation Effect.....	187
Conditions of Applicability.....	190
Instructional Implications .....	192
Conclusions.....	192
<b>15 The Element Interactivity Effect .....</b>	<b>193</b>
Empirical Evidence for the Element Interactivity Effect.....	194
Element Interactivity and the Split-Attention and Redundancy Effects.....	194
Element Interactivity and Understanding Instructions.....	196
Element Interactivity and the Modality Effect.....	197
Element Interactivity and the Expertise Reversal Effect .....	198
Element Interactivity and the Imagination Effect .....	199
Conditions of Applicability.....	199
Instructional Implications .....	200
Conclusion .....	201

**16 Altering Element Interactivity and Intrinsic Cognitive load** ..... 203

- Pre-training ..... 204
- Focusing on Subgoals ..... 205
- Presenting Declarative and Procedural Information Separately ..... 206
- Reducing Intrinsic Load in Worked Examples ..... 206
- Isolated Elements Effect ..... 208
- 4C/ID Model for Complex Learning ..... 211
- The Variability Effect..... 212
- Variability and Increased Intrinsic Cognitive Load ..... 215
- Conditions of Applicability..... 216
- Instructional Implications ..... 216
- Conclusions..... 217

**17 Emerging Themes in Cognitive Load Theory: The Transient Information and the Collective Working Memory Effects**..... 219

- The Transient Information Effect..... 219
  - The Modality Effect and Transient Information ..... 220
  - Instructional Animations and Transient Information..... 222
  - Animation Versus Static Presentations ..... 223
  - Some Conditions Under Which Animations Can Be Effective ..... 224
  - Learning Human Movement or Motor Skills: A Special Case ..... 226
  - The Role of Biologically Primary Knowledge ..... 227
  - Conditions of Applicability..... 229
  - Instructional Implications ..... 229
  - Conclusions..... 229
- The Collective Working Memory Effect..... 230
  - Conditions of Applicability..... 232
  - Instructional Implications ..... 233
  - Conclusions..... 233

**Part V Conclusions**

**18 Cognitive Load Theory in Perspective** ..... 237

**References**..... 243

**Index**..... 263
