Contents

1 Coherent, Self-Coherent, and Differential Detection Systems ........................................... 1
   Xiang Liu and Moshe Nazarathy

2 Optical OFDM Basics .......................................................... 43
   Qi Yang, Abdullah Al Amin, and William Shieh

3 Nonlinear Impairments in Coherent Optical OFDM Systems and Their Mitigation ...................... 87
   Moshe Nazarathy and Rakefet Weidenfeld

4 Systems with Higher-Order Modulation ...........................................177
   Matthias Seimetz

5 Power-Efficient Modulation Schemes ..................................................219
   Magnus Karlsson and Erik Agrell

6 A Unified Theory of Intrachannel Nonlinearity in Pseudolinear Transmission ................................. 253
   Antonio Mecozzi

7 Analysis of Nonlinear Phase Noise in Single-Carrier and OFDM Systems ................................. 293
   Shiva Kumar and Xianming Zhu

8 Cross-Phase Modulation-Induced Nonlinear Phase Noise for Quadriphase-Shift-Keying Signals ............ 325
   Keang-Po Ho

9 Nonlinear Polarization Scattering in Polarization-Division-Multiplexed Coherent Communication Systems ..................................................343
   Chongjin Xie
10 Multicanonical Monte Carlo for Simulation of Optical Links .........................................................373
   Alberto Bononi and Leslie A. Rusch

11 Optical Regenerators for Novel Modulation Schemes .......................415
   Masayuki Matsumoto

12 Codes on Graphs, Coded Modulation and Compensation of Nonlinear Impairments by Turbo Equalization ......................451
   Ivan B. Djordjevic

13 Channel Capacity of Non-Linear Transmission Systems ................507
   Andrew D. Ellis and Jian Zhao

Index .................................................................................................................539
Impact of Nonlinearities on Fiber Optic Communications
Kumar, S. (Ed.)
2011, XII, 544 p., Hardcover
ISBN: 978-1-4419-8138-7
