Contents

Part I  Basic Properties

1 New Opportunities on Phase Transitions of Correlated
Electron Nanostructures ................................................ 3
   Jinbo Cao and Junqiao Wu

2 Controlling the Conductivity in Oxide Semiconductors .............. 23
   A. Janotti, J.B. Varley, J.L. Lyons, and C.G. Van de Walle

3 The Role of Defects in Functional Oxide Nanostructures ............ 37
   C. Sudakar, Shubra Singh, M.S. Ramachandra Rao, and G. Lawes

4 Emergent Metal–Insulator Transitions Associated
   with Electronic Inhomogeneities in Low-Dimensional
   Complex Oxides ......................................................... 69
   An-Ping Li and Thomas Z. Ward

5 Optical Properties of Nanoscale Transition Metal Oxides ............ 87
   Janice L. Musfeldt

6 Electronic Properties of Post-transition Metal Oxide
   Semiconductor Surfaces ............................................ 127
   T.D. Veal, P.D.C. King, and C.F. McConville

7 In Search of a Truly Two-Dimensional Metallic Oxide ............ 147
   Priya Mahadevan and Kapil Gupta

Part II  Synthesis and Processing

8 Solution Phase Approach to TiO₂ Nanostructures ................. 157
   John D. Bass and Ho-Cheol Kim

9 Oxide-Based Photonic Crystals from Biological Templates ........ 175
   Michael H. Bartl, Jeremy W. Galusha, and Matthew R. Jorgensen
10 Low Dimensionality and Epitaxial Stabilization in Metal-Supported Oxide Nanostructures: \( \text{Mn}_x\text{O}_y \) on \( \text{Pd}(100) \) \( \text{Mn}_x\text{O}_y \) ......................................................... 209
Cesare Franchini and Francesco Allegretti

Part III Applications

11 One-Dimensional Oxygen-Deficient Metal Oxides ...................... 241
Wei-Qiang Han

12 Oxide Nanostructures for Energy Storage ............................. 269
Yuan Yang, Jang Wook Choi, and Yi Cui

13 Metal Oxide Resistive Switching Memory ............................. 303
Shimeng Yu, Byoungil Lee, and H.-S. Philip Wong

14 Nanostructured Metal Oxides for Li-Ion Batteries ................. 337
Juchen Guo and Chunsheng Wang

Index ..................................................................................... 365
