## Contents

### Part I  Trends in Manufacturing

1  **Taking Control of the Company’s Destiny Through Knowledge** ................................. 3  
   1.1  We are Sure about Some Things .......................................................... 3  
   1.2  We Expect Some Things ................................................................. 4  
   1.3  How Do We Deal with an Uncertain Future? ................................. 5  
   1.4  Paradigms and Capabilities .......................................................... 6  
   1.5  Developing Capabilities Through Knowledge ............................... 7  
   1.6  The Knowledge Dimension of Manufacturing  
       Outsourcing ....................................................................................... 8  

2  **Drivers for Change in Manufacturing** ......................................................... 11  
   2.1  Globalization, Extended Enterprise,  
       Digital Business, Innovation ......................................................... 11  
   2.2  New Versus Old Economy .............................................................. 13  
   2.3  Sustainability: On Top of the Manufacturing Agenda ......................... 15  
   2.4  Quality and Productivity .................................................................. 15  
       References .......................................................................................... 16  

3  **Manufacturing in a Strategic Context** .................................................... 19  
   3.1  What is Manufacturing Strategy ........................................................ 19  
   3.2  Generic Versus Specific Strategies ...................................................... 22  
   3.3  Developing Capabilities ..................................................................... 24  
       References .......................................................................................... 25  

4  **Evolving Paradigms in Manufacturing** .................................................. 27  
   4.1  From Craft to Adaptive Manufacturing ............................................. 27  
   4.2  The Lean Paradigm ............................................................................. 29  
   4.3  Sustainable Manufacturing ................................................................. 30  
       References .......................................................................................... 33
5 The Knowledge Dimension ........................................ 35
5.1 Capabilities Developed Through Knowledge ................ 35
5.2 Knowledge, the Basis for Innovations and Improvements ... 36
References ............................................................... 39

Part II The Engine Driving Industrial Change

6 Industrial Outlook .................................................. 43
6.1 Manufacturing in Turbulent Periods ........................... 43
6.2 Technology Outlook ............................................... 44
6.3 Industrial Production: Who Takes the Lead? ................ 45
6.4 What Defines the Winners? ...................................... 46
References ............................................................... 51

7 Indicators and Initiatives for Industrial Renewal ............ 53
7.1 Education for Growth and Industrial Renewal .............. 53
7.2 The Lisbon Agenda .............................................. 55
7.3 Innovation Driving Industrial Change ....................... 57
7.4 The Learning Economy ......................................... 58
7.5 Social and Environmental Renewal .......................... 59
References ............................................................... 61

8 Research Roadmaps in Manufacturing .......................... 63
8.1 Research Resources in Manufacturing ....................... 63
8.2 Shift in the Manufacturing Research Agenda ................ 64
8.3 The IMS2020 Roadmap ......................................... 65
References ............................................................... 68

9 How Well Are We Doing? .......................................... 69
9.1 Measuring Performance in Companies ....................... 69
9.2 Measuring Performance According to Strategy ............. 72
9.3 Frameworks for Strategic Performance Measurement ...... 74
9.4 Decomposition, the Logic Behind the Strategy ............. 77
9.5 Performance Measurement Implementation .................. 78
9.6 Performance in Supply Chains and Among Partners ........ 82
References ............................................................... 83

Part III Outsourcing: Strategic Opportunities

10 Manufacturing Strategies, Created Through Decisions ...... 87
10.1 Structure and Infrastructure, Hard and Soft Elements of the Strategy ........................................ 87

### Part IV  Innovation and Knowledge Transfer

#### 15 The Innovation Process
- 15.1 What is an Innovation
- 15.2 Innovation Processes
- 15.3 Innovation and Centralized Versus Decentralized Knowledge Creation
- 15.4 Coordinating Innovation Processes: Project Models
- 15.5 Managing Innovation
- 15.6 Innovation and R&D Models
- 15.7 PDCA in Incremental and Radical Innovation
- 15.8 Manufacturing Paradigms and Innovation

#### References

#### 16 What is Knowledge?
- 16.1 Rationalism and Empiricism
- 16.2 Pragmatic and Combined Views on Knowledge
- 16.3 Knowledge and Information
- 16.4 Terms Related to Knowledge
- 16.5 Basic Dimensions of Knowledge
- 16.6 Tacit and Explicit Knowledge
- 16.7 Knowledge Bases and Innovation

#### References

#### 17 Knowledge Creation
- 17.1 Putting Bits and Pieces Together
- 17.2 The Trade-Off Barrier
- 17.3 Conflicts of Interests
- 17.4 Knowledge Conversion
- 17.5 How to Integrate Knowledge Creation into the Development Model
- 17.6 Process Improvement and Knowledge

#### References

#### 18 Knowledge Transfer and Distance
- 18.1 What is Distance
- 18.2 The Cultural Challenge
- 18.3 The Spatial Challenge of the Portfolio of Innovations
- 18.4 ICT Reduces Distance

## Part V Cases

### 21 Supply Chain Integration and Knowledge Transfer—A Case from the Automotive Industry (Case 1)
- 21.1 The Strategic Context
- 21.2 Business Systems and Types of Supply Chain Relations
- 21.3 Integration in the Truck Supply Chain
- 21.4 Fact Based Knowledge Transfer in the Supply Chain

### 22 Quality Improvement in Craft Manufacturing—A Case from Leisure Boat Manufacturing (Case 2)
- 22.1 The Strategic Context
- 22.2 Quality Improvement as an Integrated Part of Craft Manufacturing
- 22.3 Integrating Suppliers into Quality Improvement
- 22.4 Infrastructure for Knowledge Transfer

### 23 Adaptive Manufacturing and Real Time Knowledge—A Case from Furniture Manufacturing (Case 3)
- 23.1 The Strategic Context
- 23.2 The Three Elements of Adaptive Manufacturing
- 23.3 Automatic Data Collection for Creating Knowledge

### 24 Sustainable Manufacturing in SMEs—A Case from Sportswear Manufacturing (Case 4)
- 24.1 The Strategic Context
- 24.2 Competitive and Stable Workforce Through Inclusion
